MARITIME LABOUR LEGISLATION

Early Transport Legislation for Mercantile Marine

The earliest transport legislation was undertaken for mercantile marine and was continued in a series of Acts since the middle of the nineteenth century, many of them overlapping and interlocking in a complicated and confused way. The Indian Merchant Shipping Act was passed in 1923 (XXI of 1923) with a view to consolidate the earlier enactments and to regulate various matters connected with merchant shipping. The Act is an important legislative measure which for the first time regulates the working conditions of the Indian seamen. The Act is not strictly a piece of labour legislation but an enactment consolidating all earlier laws regarding mercantile marine with certain improvements. Though a good deal of the Act relates to passenger ships, pilgrims ships, safety of the ship and such other matters, Part II of the Act relates solely to the seamen and the conditions of their employment and work. Since its enactment, the Act was amended on several occasions.

Several Amendments to the Indian Merchant Shipping Act, 1923.

Among the important Amending Acts are the Acts passed in 1931, 1949 and 1951. The Government of India ratified I.L.O. Conventions No. 15 (Minimum Age Trimmers and Stokers Convention, 1921), 16 (Medical Examination of Young Persons Sea Convention, 1921) and 22 (Seamen's Articles of Agreement Convention, 1926) and amended the Merchant Shipping Act, 1923 by an Amending Act of 1931 (XI of 1931) to give effect to the principles of the above Conventions by making provisions regarding the employment of children and young persons on board ships and engagement as trimmers and stockers and for medical examination of young persons. The Amending Act of 1949 (LIII of 1949) regulates the supply

³ Chapter XVII contains Rules 1701 to 1743 dealing with conduct and discipline of railway staff in 3 Sections—Railway Servants' Conduct Rules under Rule 1701, Discipline and Appeal Rules for Non-gazetted Staff under Rules 1702 to 1727 and Discipline and Appeal Rules for Gazetted Officers under Rules 1728 to 1743.

of maritime labour and provides for the setting up of Seamen's Employment Offices at ports for the purpose of engaging or supplying seamen for merchant ships. The Amending Act of 1951 (XLII of 1951) provides for the medical examination of seamen and for prescribing their qualifications.

Main Provisions of Indian Merchant Shipping Act, 1923

Part II of the Act deals with Masters and Seamen and regulates the conditions of employment of Seamen and consists of 135 sections containing provisions for (1) Shipping Offices; (2) Certificates of competency; (3) Apprenticeship to sea services; (4) Supply of seamen; (5) Engagement of seamen; (6) Employment of young persons; (7) Engagement of lascars by masters of foreign ships; (8) Discharge of seamen; (9) Payment of wages; (10) Advance and allotment of wages; (11) Rights of seamen in respect of wages; (12) Mode of recovering wages; (13) Property of deceased seamen; (14) Distressed seamen; (15) relief of distressed seamen to whom the Merchant Shipping Acts do not apply; (16) Provisions, health and accommodation; (17) Facilities for making complaints; (18) Protection of seamen from imposition; (19) Provision as to discipline; (20) Leaving seamen or apprentices in India and (21) Official logs.

Recruitment and Employment Offices

The master of an Indian, British or foreign ship can engage a seaman in presence of a Shipping Master in the prescribed manner. The Amending Act of 1949 empowers the Central Government to establish Seamen's Employment Offices at such posts as they think fit, for the purpose of engaging or supplying seamen for merchant ships and generally for regulating the supply of maritime labour and to make Rules¹ for the purpose of enabling the Seamen's Employment Offices to exercise their powers effectively. The Amending Act lays down that in any port where such an office has been established no person shall receive or accept to be entered on board any ship any seaman unless such a seaman is engaged through or supplied by such office. For the purposes of the Act "seaman" includes every person employed or engaged in any capacity on board any ship but does not include ship's officer's, masters, pilots or apprentices duly indentured or registered, unless so declared by the Central Government. All recruitment must be made through the Employment Offices. Contravention of this provision will be deemed to be an offence punishable with a fine which may extend upto Rs. 100/-. The Rules authorise the Central Government to set up Seamen's Employment Board with equal number of members representing the Government, shipowners and seamen after consulting the interests concerned to advise the Government on the working of the Employment Offices. The Central Government has established Seamen's Employment Boards at the ports of Bombay and Calcutta. The Seamen's Employment Boards with members representing the Government, shipowners and seamen were established at the port of Bombay for two years with effect from the 7th June, 1954 and at the port of Calcutta for a period of two years from the 1st of March 1955, with the Director-General of Shipping as Chairman.

Medical Examination of Young Persons as well as Seamen

The Amending Act of 1931 provides for medical examination only of young persons under 18 years before they are engaged or carried to sea to work in any capacity. The Government formulated a scheme for medical examination of seamen every two years by Government doctors generally based on the scheme of I.L.O. Convention No. 73 (Medical Examination Seafarers Convention, 1946) and

¹ The Central Government has framed Seamen's Employment Office Rules in 1954 for Bombay and Calcutta and established Seamen's Employment Offices at these two ports.

introduced the same in Bombay and Calcutta in early 1950. In order to ensure the recruitment of proper persons who are both physically and otherwise fit to perform their duties and to provide for their medical examination and also to prescribe their qualifications, the Act was amended in 1951 (XLII of 1951). The Amending Act of 1951 prohibits the employment of seaman to work in any capacity in any ship unless the seaman is in possession of a certificate in the prescribed form granted by the prescribed authority to the effect that he is physically fit to be employed in that capacity. Contravention of this provision is an offence punishable with a fine which may extend to Rs. 100/-. The Rules² were framed by the Central Government on 16th July, 1951, providing for appointment of medical officers at each of the ports of Calcutta, Bombay or any other port for the medical examination of seamen and prescribing the standards of physical fitness, the nature of medical examination, the form of certificate of fitness etc.

Employment of Young Persons

The Amending Act of 1931 prohibits the employment of young persons below 14 years in any capacity in any ship registered in India and in any foreign going ship except under certain conditions e.g., when they are employed under nominal wages and under the charge of their father or other near relatives, and the employment of young persons below 18 years as trimmers or stockers except under certain specified conditions. It also prohibits the employment of young persons under 18 years in any capacity in any ship without a medical certificate of physical fitness.

Agreement

Under the Act the master of every Indian or British ship, except home-trade ships of a burden not exceeding 300 tons, is required to enter into an agreement with every seaman at the time of engagement, in the prescribed form giving details regarding the voyage, the conditions of work, and wages and also a stipulation, in case of termination of service at any foreign port, for providing him either suitable employment on board a ship bound for the port where he was recruited or free passage to some other port in India as may be agreed upon. The Act lays down special provisions with regard to the agreements with seamen of foreign-going ships and these agreements should be signed by the seamen in presence of the Shipping Masters. The Act provides that every seaman engaged by an Indian or British foreign-going ship must be discharged in presence of a Shipping Master and must obtain from the master, a certificate of his discharge in the form prescribed by the Central Government specifying the period of his service and the time and place of his discharge. By virtue of the Amending Act of 1931, a seaman is also entitled to receive from the master of every ship, except a home-trade ship of less than 300 tons, a certificate stating the quality of his work and whether he has fulfilled his obligations under the Agreement. Contravention of any of the above provisions is an offence punishable with a fine which may extend to Rs. 100/-.

Payment of Wages

A seaman's right to wages begins either at the time at which he commences work or at the time specified in the agreement for his commencement of work or presence on board whichever happens first. The master or owner of every ship shall pay to every seaman his wages within three days after the cargo has been delivered or within three days after the seaman's discharge whichever happens first and the seaman shall at the time of his discharge, be entitled to be

² See the Indian Merchant Shipping (Medical Examination) Rules, 1951.

paid on account a sum equal to one-fourth part of the balance due to him. If the master or owner fails to make payment at that time, the seaman is entitled to a compensation not exceeding the amount of two days' pay for every day of delay but the total amount shall not exceed 10 days double pay. When a seaman is discharged before a Shipping Master in India, he shall receive his wages through him or in his presence. The master of every Indian or British ship before paying off or discharging a seaman, shall deliver to the seaman or to the Shipping Master, an account of his wages and deduction in a prescribed form. Deductions from seaman's wages are not permitted unless it is included in the above account. The seaman after his discharge and settlement of wages, shall sign in presence of the Shipping Master, a release in respect of the past voyage or engagement which should also be signed by the master or owner of the ship and attested by the Shipping Master. The Act regulates the system of making advance to a seaman, of a sum not exceeding one month's wage payable to him and of allotment of any part of his wages during his absence in favour either of a relative or some member of his family to be named in the allotment note. The Act also provides for payment of compensation not exceeding one month's wages in addition to any wages earned if the seaman is discharged otherwise than in accordance with the terms of his Agreement, before the commencement of the voyage or before one month's wages are earned without fault on his part justifying that discharge and without his consent. The Act places restriction on sale of and charge upon wages due or accruing to a seaman or apprentice and seamen are thus protected against attachment or assignment or sale of their wages made prior to their accrual.

Health and Welfare

The provisions of the Act relating to the health and welfare of the seamen cover accommodation, food, medical attendance in case of illness and grant of relief to distressed seamen. Every seaman aboard a ship must be allotted an accommodation of not less than 12 superficial feet and 72 cubic feet. Provision is made that on every ship there must be sufficient provisions and water of good quality and fit for the use of the crew on the scale specified in the agreement with the crew. The Act provides that every foreign-going Indian and British ship and every home-trade ship of more than 300 tons burden shall always keep on board a sufficient supply of medicines and appliances for dealing with sickness and accidents on sea voyage according to the scale prescribed by the Central Government. The owner of the ship has to provide free medical attendance for the master, seaman or apprentice in case of illness. The Act provides for relief to distressed seamen and their maintenance until such time as the local authority is able to provide them with a passage.

Desertion, Absence and Offences against Discipline

A seaman who has been lawfully engaged can leave the ship only after termination of his Agreement and not before. If he deserts from the ship, he shall be guilty of the offence of desertion and be liable to forfeit all or any part of the effects he leaves on board and of the wages which he has thus earned. If the desertion takes place outside India, he shall also be liable to imprisonment for a term which may extend to 12 weeks.

If the seaman neglects or refuses without reasonable cause to join his ship or is absent without leave at any time within 24 hours of the ship's sailing from a port or is absent at any time without leave and without sufficient reason, from his ship or from his duty, he shall be guilty of an offence of absence without leave and be liable to forfeit a portion of wages and also imprisonment for a term which may extend to 10 weeks.

If a seaman commits any of the following offences against discipline e.g. wilful disobedience to any lawful command, continued wilful neglect of duty, assaulting master, mate or certified engineer, combination to disobey lawful commands or to neglect duty or to impede the progress of the voyage, wilful damage to ship and criminal misappropriation or breach of trust in respect thereof, he shall be liable to imprisonment for a term varying from 4 weeks to 12 weeks and also forfeiture of his wages for specified days.

Administration

The Act relating to the employment of seamen is administered by Shipping Masters who are assisted by the Deputy Shipping Masters. It is the duty of the Shipping Master to superintend and facilitate the engagement and discharge of seamen in a manner prescribed by the Act and to provide means for securing their presence on board at the proper time and to perform such other duties relating to seamen as may be specified.

Social Security for Indian Seamen

The provisions of the Workmen's Compensation Act, 1923 apply to persons employed as masters or as seamen on any power-driven ship or on any ship of 50 or more tons, subject to certain modifications.

At present the Indian seamen do not enjoy any Social Insurance Benefits though by virtue of the terms of Agreement they are entitled to medical care, maintenance and repatriation at the cost of the shipowners. The Government of India was considering the introduction of a Scheme of Social Insurance for Indian Seamen and at the instance of the Government, a Social Insurance Scheme for Indian Seamen was prepared by Prof. B. P. Adarkar. Prof. Adarkar's Scheme covers (1) all seamen employed on board ship registered in India, (2) all seamen recruited at a port in British India and (3) all seamen recruited abroad. The following risks will be covered—(1) sickness, (2) employment injury, (3) old age and death of the breadwinner and (4) unemployment. The Scheme will be financed by contributions by insured seamen and their employers and the State may be asked for administration only. The Seamen's Insurance Scheme shall be linked to the general insurance scheme for the industrial workers.

The International Labour Office was requested by the Government of India to send an official acquainted with the subject of Seamen's Insurance to visit India in order to assist in the elaboration of the Scheme of Social Insurance for Indian Seamen. In response to this request, Dr. (Miss) Laura Bodmer was deputed for the purpose in September, 1945. A Joint Report on the Scheme³ was submitted by Dr. Bodmer and Prof Adarkar on the 5th December, 1945. The Adarkar-Bodmer Report emphasizes that the success of an insurance scheme for seamen will largely depend on simultaneous organisation of recruitment⁴ involving a reduction in the number of those admitted to sea service and a system of rotation for seamen who are not in continuous employment.

The Main Features of the Joint Scheme are as follows:—

(1) Unified sickness, employment injury and old age and survivors' insurance for seamen plus insurance for "waiting pay" on condition that measures are taken to organize recruitment and employment in sea service.

³ Social Insurance Scheme for Indian Seamen—A Scheme by Prof. B. P. Adarkar and Joint Report on the Scheme Dr. Laura Bodmer and Prof. B. P. Adarkar, 1946.

⁴ The Seamen's Employment Schemes have already been introduced in Bombay and Calcutta and the successful implementation of this Scheme will be the first step in achieving the ultimate object of introducing a health insurance plan for seafarers. Though the Scheme was under the consideration of the Government for more than ten years, it was thought impossible to give effect to it owing to the uncertainty in getting the qualifying contributions from the seafarers.

(2) Continuation of shipowner's liability to provide medical care, maintenance and wages until the seaman returns to his port of recruitment.

(3) Inclusion, in agreements for seamen engaged on all foreign-going ships, of obligation for shipowner and seamen to comply with the provisions of the Seamen's Insurance Scheme.

(4) Provision of medical care when the seaman stays in the port or in his village if and when medical facilities become available, during a free insurance period, such care to be provided in seamen's clinics and provincial hospitals.

Shipping Directorate⁵

A new organisation called Directorate General of Shipping was set up by the Government of India in June 1950 with headquarters at Bombay with a view to facilitate smooth administration of all matters pertaining to merchant shipping and merchant shipping laws. It regulates the conditions of service of Indian seamen, promotes their welfare and provides for facilities for the training of officers. The offices of the Controller of Indian Shipping and the Seamen's Welfare Directorate have been merged with this Directorate General.

Indian Shipping laws are now being administered by three Ministries—administrative matters by the Commerce Ministry, industrial development like shipbuilding by the Ministry of Industry and Supply and ports and port facilities by the Transport Ministry. The Economy Committee has recommended a co-ordinated administration of shipping under one Ministry so that it would result in considerable economy in expenditure and personnel.

Proposal for Amendment of the Merchant Shipping Act, 1923

An Indian Merchant Shipping Amending and Consolidating Bill is under preparation with the object of consolidating the various enactments relating to merchant shipping and to secure amendments to the existing laws so as to bring them into conformity with the requirements of the modern shipping practice and conditions.

Training of Seamen & Officers

There are four institutions which provide for training for a career on the sea. They are—(1) The Training Ship "Duffrin"; (2) The Nautical and Engineering College, Bombay; (3) The Directorate of Marine Engineering Training College, Calcutta; (4) The Training Ships "Bhadra" and "Mekhala" stationed at Calcutta and Visakhapatnam respectively.

The first three institutions train executive officers and marine engineers for merchant navy. The Nautical and Engineering College at Bombay and the Directorate of Marine Engineering Training College at Calcutta have been made permanent organisations. The Radar Training Centre was opened in October 1953 under the auspices of the Nautical and Engineering College.

⁵ The Merchant Shipping and Lighthouse (Amendment) Act, 1949 (LII of 1949) amended the Indian Merchant Shipping Act, 1923 by providing appointment of the Director-General of Shipping by the Central Government and delegation of powers to him.

The fourth institutions are intended for the training of ratings. They train about 1000 ratings annually.

Seamen's Welfare

Substantial amounts have been sanctioned by the Central Government for the construction and equipment of Seamen's Clubs and Hostels in Indian ports. Welfare Officers have been appointed in major Indian ports and also in some foreign ports. The Welfare Officers co-ordinate the welfare activities in the respective ports and also assist in arranging medical and hospital facilities for the seamen. Clinics for seamen have been set up in Bombay and Calcutta and some beds have been specially reserved in local hospitals for seamen. Canteens for seamen have been opened in Bombay and Calcutta. A Seamen's Hostel was already constructed in Calcutta and arrangements have also been made to construct a building for Indian Seamen's Hostel at Madras.

INDIAN MERCHANT SHIPPING ACT, 1923 (XXI OF 1923)

Statement of Objects and Reasons¹

The object of this Bill is to consolidate as far as may be the Indian Acts relating to merchant shipping. The first Act now on the Indian Statute Book dealing with that subject was passed in 1838 and the last in 1920 and during this period of nearly a century, a large number of Acts have been from time to time enacted by the Legislature. The result is that the law has become increasingly difficult to refer to and the case for consolidation is very strong.

2. Attempts have been made on several occasions in the past to remedy this state of affairs. In 1867, again in 1882 and more particularly in the years 1893 to 1896, Bills attempting to effect a complete or partial consolidation were brought before the Legislature. These attempts failed for a variety of causes with which it is unnecessary to enter in detail, but a possible cause common to all was the fact that consolidation and amendment were undertaken at the same time. If, as seems probable, the effects to consolidate and amend at the same time were contributory to the failures in the past, such course is not less undesirable in 1922, for the volume of law to be dealt with is far greater and the legislative machinery is far more complex. The present Bill, therefore, does not attempt to go beyond consolidation and that not even of the whole of the law which is not feasible for reasons which will be dealt with later.

* * * * *

3. The Bill has been prepared and considered by the Statute Law Revision Committee and they consider it a useful step towards the classification of the Statute Book.

* * * * *

They would recommend that the passage of the present Bill should be suspended at some convenient stage in its consideration by the Indian Legislature, and that an Amending Bill drawn to harmonise with this consolidating measure should, when all controversial points have been decided, be referred for amalgamation with the present Bill.

INDIAN MERCHANT SHIPPING (AMENDMENT) ACT, 1949 (LIII OF 1949)

Statement of Objects and Reasons²

This Bill seeks further to amend the Indian Merchant Shipping Act, 1923, with a view to vesting powers in the Central Government to establish or cause to be established, seamen's employment offices at ports in India. At present the number of seamen seeking employment at Indian ports is far in excess of the number of engagements available and this gives scope for corruption in securing engagements. In a number of other maritime

countries this problem has been solved by the establishment of Seamen's Employment Offices which make arrangements for the supply of maritime labour generally on the principle of rotation. The functions of the Employment Offices now contemplated will include the regulation of the supply of maritime labour in a similar manner.

INDIAN MERCHANT SHIPPING (AMENDMENT) ACT, 1951 (XLII OF 1951)

Statement of Objects and Reasons³

Section 37D of the Indian Merchant Shipping Act, 1923 (XXI of 1923), provides for the medical examination of young persons below 18 years of age only, before they can be engaged or carried to sea to work in any capacity in any ship. In order to ensure the recruitment of proper persons who are both physically and otherwise fit for the performance of their duties, it is necessary to provide for the medical examination of all persons who may wish to join the seafaring profession and to prescribe their qualifications.

2. The Standards of medical examination of, and the tests to be passed by, seamen will have to be sufficiently flexible in the first instance and, consequently, the Bill leaves the matter to be regulated by rules made in this behalf, the subjects on which rules may be made being set out in the Bill.

(3) Such copy, if purporting to be so made and certified as aforesaid, shall, in any legal proceeding relating to such desertion, be admissible in evidence.

108. Facilities for proving desertion in proceeding for forfeiture of wages.—(1) Whenever a question arises whether the wages of any seaman or apprentice are forfeited for desertion from a ship, it shall be sufficient for the person insisting on the forfeiture to show that the seaman or apprentice was duly engaged in or belonged to the ship, and either that he left the ship before the completion of the voyage or engagement or, if the voyage was to terminate in ¹⁰⁴[India] and the ship has not returned, that he is absent from her and that an entry of his desertion has been duly made in the official log-book.

(2) The desertion shall thereupon, so far as relates to any forfeiture of wages under this Part, be deemed to be proved unless the seaman or apprentice can produce a proper certificate of discharge or can otherwise show to the satisfaction of the Court that he had sufficient reasons for leaving his ship.

109. Application of forfeitures.—(1) Where any wages or effects are under this Act forfeited for desertion from a ship, they shall be applied towards reimbursing the expenses caused by the desertion to the master or the owner of the ship and, subject to that reimbursement shall be paid into the public treasury and carried to the account of ¹⁰⁵[the Central Government].

¹⁰³ & ¹⁰⁵ Subs. by the A.O. 1937.

(2) For the purposes of such re-imbursement the master or the owner or his agent may, if the wages are earned subsequent to the desertion, recover them in the same manner as the deserter could have recovered them if not forfeited; and the Court in any legal proceeding relating to such wages may order them to be paid accordingly.

(3) Where wages are forfeited under the foregoing provisions of this Act in any case other than for desertion, the forfeiture shall, in the absence of any specific provision to the contrary, be for the benefit of the master or owner by whom the wages are payable.

110. Decision of questions of forfeiture and deduction in suits for wages.—

Any question concerning the forfeiture of or deductions from the wages of a seaman or apprentice may be determined in any proceeding lawfully instituted with respect to those wages notwithstanding that the offence in respect of which the question arises, though by this Act made punishable by imprisonment as well as forfeiture, has not been made the subject of any criminal proceeding.

111. Ascertainment of amount of forfeiture out of wages.—(1) If a seaman contracts for wages by the voyage or by the run or by the share and not by the month or other stated period of time, the amount of forfeiture to be incurred under this Act shall be an amount bearing the same proportion to the whole wages or share as a month or any other period hereinbefore mentioned in fixing the amount of forfeiture (as the case may be) bears to the whole time spent in the voyage or run.

(2) If the whole time spent in the voyage or run does not exceed the period for which the pay is to be forfeited, the forfeiture shall extend to the whole wages or share.

112. Payment of fines imposed under agreement to shipping-master.—

(1) Every fine imposed on a seaman for any act of misconduct for which his agreement imposes a fine shall be deducted and paid over as follows, namely:—

- (i) if the offender is discharged at any port or place in ¹⁰⁶[India], and the offence and such entries in respect thereof as aforesaid are proved, in the case of a foreign-going ship to the satisfaction of the shipping-master before whom the offender is discharged, and in the case of a home-trade ship to the satisfaction of the shipping-master at or nearest to the place at which the crew is discharged, the master or owner shall deduct such fine from the wages of the offender and pay the same over to such shipping-master; and
- (ii) if before the final discharge of the crew in ¹⁰⁶[India], any such offender as aforesaid enters into any of His Majesty's ships ¹⁰⁷[or any ships belonging to the Government] or is discharged at any place not in ¹⁰⁶[India], and the offence and such entries as aforesaid are proved to the satisfaction of the officer in command of the ship into which he so enters or of the Consular Officer, officer of Customs, or other person by whose sanction he is so discharged, the fine shall thereupon be deducted as aforesaid, and an entry of such deduction shall then be made in the official log-book (if any) and signed by such officer or other person, and on the return of the ship to ¹⁰⁶[India], the master or owner shall pay over such fine in the case of foreign-going ships to the shipping-master before whom the crew

is discharged, and in the case of home-trade ships to the shipping-master at or nearest to the place at which the crew is discharged.

(2) If any master or owner neglects or refuses so to pay over the fine, he shall for each such offence incur a penalty not exceeding six times the amount of the fine retained by him.

(3) An act of misconduct for which any such fine has been inflicted and paid shall not be otherwise punished under the provisions of this Act.

113. Penalty for enticing to desert.—If a person by any means whatever persuades or attempts to persuade a seaman or apprentice to neglect or refuse to join or proceed to sea in or desert from his ship, or otherwise to absent himself from his duty, he shall for each offence in respect of each seaman or apprentice be liable to a fine which may extend to one hundred rupees.

114. Penalty for harbouring deserters.—If a person wilfully harbours or secretes a seaman or apprentice who has wilfully neglected or refused to join or has deserted from his ship, knowing or having reason to believe the seaman or apprentice to have so done, he shall for every seaman or apprentice so harboured or secreted be liable to a fine which may extend to one hundred rupees.

115. Penalty on stowaways and discipline of stowaways and seamen carried under compulsion.—(1) If a person secretes himself and goes to sea in a ship without the consent of either the owner, consignee or master, or of a mate, or of the person in charge of the ship or of any other person entitled to give that consent, he shall be liable to a fine which may extend to two hundred rupees, or to imprisonment for a term which may extend to four weeks.

(2) Every sea-faring person whom the master of a ship is under the authority of this Act or any other law compelled to take on board and convey, and every person who goes to sea in a ship without such consent as aforesaid, shall, so long as he remains in the ship, be subject to the same laws and regulations for preserving discipline and to the same fines and punishments for offences constituting or tending to a breach of discipline as if he were a member of, and had signed the agreement with, the crew.

116. Procedure where seaman or apprentice not shipped in India is imprisoned on complaint of master or owner.—(1) If any seaman or apprentice who is not shipped in ¹⁰⁸[India] is imprisoned on complaint made by or on behalf of the master or owner of the ship or for any offence for which he has been sentenced to imprisonment for a term not exceeding one month, then—

(a) while such imprisonment lasts, no person shall, without the previous sanction in writing of the ¹⁰⁹[Central Government] or of such officer as ¹⁰⁹[it] may appoint in this behalf, engage any native of India to serve as a seaman on board such ship; and

(b) the ¹¹⁰[Central Government] or such officer as ¹¹⁰[it] may appoint in this behalf may tender such seaman or apprentice to the master or owner of the ship in which he is engaged to serve, and if such master or owner, without assigning reasons satisfactory to the ¹¹⁰[Central Government] or to such officer as aforesaid, refuses to receive him on board, may require such master or owner to deposit in the local shipping office—

118. On change of master documents to be handed over to successor.—

(1) If during the progress of a voyage the master of any ship registered in ¹¹²[India] is removed or superseded or for any other reason quits the ship and is succeeded in the command by some other person, he shall deliver to his successor the various documents relating to the navigation of the ship and the crew thereof which are in his custody, and shall in default be liable to a fine which may extend to one thousand rupees.

DOCK AND PORT LABOUR LEGISLATION

Indian Dock Labourers Act, 1934

The Government of India ratified the I. L. O. Convention No. 32, Protection against Accident (Dockers) Convention (Revised) 1932, regarding protection of dock workers against accidents in the loading and unloading of ships and enacted

¹ Published under the Ministry of Transport (Merchant Shipping) Notification No. DGS/SEOC/CR—1 dated the 5th March, 1955 in the Gazette of India Extraordinary, 1955, Part I—Sec. 1, p. 121.

the Indian Dock Labourers Act in 1934 (XIX of 1934) with the object of making provisions for the safety of persons engaged in work at the docks from practically every danger to which they may be exposed in their calling, or against which the revised Convention requires protection. The Act contains an extensive code of regulations providing for the safe maintenance of approaches over wharves, docks or quays and means of access to ship lying at wharves or quays used by the workers. It also provides for first aid in cases of accidents, for submission of report on accidents and for testing of all lifting machinery. The Act does not contain specific provisions to safeguard the interest of the dock labourers. The provisions of the Act had not been brought into force and were held up due to constitutional changes introduced by the Government of India Act of 1935 and later by the outbreak of war. The Act has come into force on the 10th February, 1948, the day when the ratification of the Convention was registered with the International Labour Office.

Indian Dock Labourers Regulations, 1948

The Government of India framed Regulations on the 10th January, 1948 in exercise of the powers conferred by the Act. The Regulations lay down in details the various safety measures to be adopted by different authorities and persons in connection with the loading and unloading of cargo or fuel. The safety of working places and their approaches, lighting and fencing of workplaces and their approaches, access to and from ships, safety measures for transport of workers to and from a ship by water, safety of workers employed in removing or replacing hatch coverings and beams, safety measures in stacking and unstacking, stowing and unstowing of cargo, fencing of machineries, life electric conductors and steam pipes and maintenance of first-aid equipments, ambulances and life saving appliances. The Regulations were amended on several occasions with a view to remove certain defects detected in course of their working. Important amendments were made in August, 1953 placing on the employers the responsibility for reporting the accidents which hitherto rested on the port authorities. The employers have been made responsible for providing first-aid facilities on ships not berthed alongside of a wharf or quay except where they enter into a written agreement with the shipping authorities. The distinction between machinery and plant carried on board a ship and that which is not carried on board has now been removed by an amendment of Regulation 26 with effect from the 22nd August, 1953.

The Act and the Regulations framed thereunder, apply to the major ports of Bombay, Calcutta, Madras, Vishakhapatnam and Cochin and are being at present administered by the Chief Adviser, Factories, Government of India.

Regulation of Working Conditions of Dock Workers

The Royal Commission on Labour in India in their Report published in 1931 recommended a policy of decasualisation for the purpose of regulating the numbers of dock workers according to actual requirements and not according to the whims and caprice of employers or middlemen. In order to reduce the hardship on account of unemployment or under-employment due to excess of dock workers over actual requirement, the Government of India accepted the recommendations of the Commission. The Labour Investigation Committee also commented on the insecurity of the services of dock workers and recommended a scheme of decasualisation. The Government without formulating any scheme of compulsory registration, were attempting to induce the Port Trust authorities for formulating schemes of decasualisation. The attempt not being successful, the Government decided to make statutory provisions for regulating the employment of labour in

docks, with a view to eliminate the hardships caused to them on account of casual nature of their employment.

Dock Workers (Regulation of Employment) Act, 1948 (IX of 1948)

The draft Bill for regulating the employment of dock workers on the lines of U. K. Act of 1946 was discussed in the Labour Ministers' Conference held in New Delhi on the 16th and 17th April, 1947 and also in the Eighth Labour Conference held on 21st and 22nd April, 1947. The Bill was introduced in the first Session of the Dominion Parliament on the 19th November, 1947 by the Hon'ble Labour Minister and the Bill was referred to the Select Committee on the 21st November, 1947. The Select Committee submitted Report on the 28th January, 1948 and the Bill was passed in February, 1948 (Act IX of 1948). The Act received the assent of the Governor-General on the 4th March, 1948.

Main Provisions of the Act IX of 1948

The Act authorises the Central Government, in case of major ports and State Governments, in respect of other ports, to frame schemes for registration of dock workers with a view to regulate their recruitment and registration for securing greater regularity of employment and to provide for terms and conditions of employment of dock workers, whether registered or not, their hours of work, rates of remuneration and conditions of holidays and pay. The Act prescribes a minimum pay for registered workers if employment or full employment is not available to them and also for their training and welfare. The Act also empowers the appropriate Government to constitute an Advisory Committee of not exceeding fifteen, consisting of an equal number of members representing the Government, the dock workers and their employers to advise it in the framing and administration of the schemes formulated under the Act. The Government will make rules providing for composition of the Advisory Committee, manner of selection of members and their terms of office, allowance, if any, and the quorum. The Act also provides for appointment of Inspectors and prescribes the method and manner of lodging complaints with the Inspectors and also the duties of the Inspectors in relation to such complaints.

Dock Workers (Regulation of Employment) Amendment Act, 1949

The Act was amended in 1949 (XXIX of 1949) with a view to give corporate status to the constituted authority responsible for the administration of the schemes made by the Government.

Dock Workers Advisory Committee Rules, 1949

The Dock Workers (Advisory Committee) Rules were published on 1st June, 1949 and are applicable to all the major ports of India. The Rules provide for constitution and function of the Advisory Committee consisting of 15 members to be appointed by the Central Government for a term of 3 years—5 each representing the Central Government, employers and dock workers. The Advisory Committee was constituted with the Chief Labour Commissioner (Central) as the Chairman.

Dock Workers (Regulation of Employment) Schemes

Under the Act, Dock Workers Regulation of Employment Schemes were framed by the Central Government for dock workers in the ports of Bombay on the 27th January, 1951, Calcutta on the 5th October, 1951 and Madras on the 8th March, 1952. The object of the schemes are to ensure greater regularity of employment for dock workers and to ensure that an adequate number of workers is available. The provisions of the above Schemes are more or less similar.

The Schemes are at present applicable to certain specified categories of stevedore workers in the ports of Bombay, Calcutta and Madras.

A Dock Labour Board will be constituted under the Schemes in each of the above three ports. The Board will have an Executive Officer or Administrative Body for the purpose of carrying on day-to-day administration of the Schemes. The said officer will maintain an employers register and a dock workers register and also a Reserve Pool register for the workers and will allocate the registered workers to the registered employers making the fullest possible use of the reserve pool. No registered employer can employ any worker other than a worker allocated to him. The schemes provide for a guaranteed minimum of 12 days' wages and dearness allowance to the workers in the Reserve Pool plus attendance money for those days on which work cannot be provided for them at the rate of one rupee per day. The schemes also provide for payment of disappointment money to the workers for all those days on which they present themselves for work and on which the work cannot proceed for any reason and they would not be provided with alternative work. The Board shall prescribe the rates of wages, allowances, overtime, hours of work, rest intervals, holidays with pay and other conditions of service of registered dock workers. The wage period, time for payment of wages and deductions therefrom will be regulated under the provisions of the Payment of Wages Act, 1936.

All workers in the employment of registered stevedores at the commencement of the schemes are eligible for registration and fresh registration to the Reserve Pool will be made by a Registration Committee on the basis of the age, physical fitness, capacity and experience of the candidates. The recruited workers will be on three months' probation before they are registered on a permanent basis. The schemes also provide for appointment of an Appellate Tribunal to hear and dispose of the appeals from the orders of the Board, the Administrative Body or the Special Officer as the case may be. The cost of operating the scheme shall be defrayed by payment made by the registered employers according to the percentage of levy on the gross wages of different categories of workers not exceeding 50% as fixed by the Board.

For the purpose of administering the Schemes, the Central Government constituted the Bombay Dock Labour Board in April, 1951 (reconstituted in April, 1954), the Calcutta Dock Labour Board on the 2nd September, 1952 and the Madras Dock Labour Board in July, 1953. The Madras Dock Labour Board began to operate from the 16th August, 1954. All the Boards are tripartite in character and consist of 12 members representing in equal numbers, the members representing (1) the Central Government (2) dock workers and (3) employers of dock workers and shipping companies. The Bombay Stevedores' Association and Madras Stevedores' Association have been notified by the Central Government as the Administrative Body for the purposes of the Bombay and Madras Schemes respectively.

Enquiry Committee to Report on the Working of the Schemes

Representations have been received by the Government that the benefit of these schemes or similar schemes should be extended to other categories of dock workers also. The working of the schemes have also evoked a number of complaints from the Shipping Companies and Stevedore employers as well as from the workers. The Shipping Companies and Stevedore employers complained about increasing indiscipline among workers, fall in their efficiency and output, adoption of go-slow tactics and the workers complained that the employers were not carrying out their obligations and they were not getting a fair deal from the Dock Labour Boards set up under the Schemes. The Government, on the recommendation of the

Dock Workers Advisory Committee decided to set an Enquiry Committee to report on the working of these Schemes.

By a Resolution dated the 14th January, 1955, the Government of India, in the Ministry of Labour appointed the Dock Workers (Regulation of Employment) Enquiry Committee with Sri S. S. Vasist, lately Adviser, Railway Board, New Delhi as Chairman and 9 members "(1) to enquire into the Dock Workers (Regulation of Employment) Schemes in Bombay, Calcutta and Madras, to examine all difficulties encountered by the parties interested in the working of the schemes and to recommend what modifications, if any, in the schemes are necessary; (2) to enquire into the necessity and feasibility of decasualising other categories of labour covered by the Dock Workers (Regulation of Employment) Act, 1948 (IX of 1948) at the three ports whether by inclusion into the existing schemes or by the framing of special schemes, and (3) to prepare amendments to existing schemes or to frame new schemes for the further categories of labour, if any, recommended for decasualisation."

Dock Workers (Regulation of Employment) Enquiry Committee, 1955.

The Committee submitted its Report to the Central Government on the 7th September, 1955. The Report contains several important findings and recommendations. The Committee observed that there was progressive deterioration in the turn-rounds of ships in the ports of Bombay and Calcutta up to 1954 and the Dock Labour Boards did not function as effectively and as efficiently as they should be due to certain defects in the schemes themselves and lack of executive authority to enforce decisions. The Committee felt that effective representation of the Government in the Boards was necessary to secure proper implementation of the schemes. The Committee observed that the Boards had failed to maintain judicious balance between supply and demand and to meet the demands resulting from short-term or seasonal fluctuations, the Boards should be authorised to permit temporary registrations.

The Committee recommended that simple rules should be framed under the Dock Workers (Regulation of Employment) Act, 1948 with the object of regulating the employment of all dock workers and also for regulating employment of new categories of workers. The Committee recommended that wages paid to all workers engaged in loading and unloading of cargoes must be linked with productivity for the purpose of securing reasonable output from workers and maintaining the turn-round of ships at an acceptable level and that the existing system of time rate wages should be replaced by a system of "payment by result" with the provision for an "incentive bonus". The Committee recommended payment of guaranteed minimum monthly wages and further recommended that the minimum number of days in a month for which wages should be guaranteed should be increased progressively from its present level of 12 days to 21 days. The Committee also recommended payment of gratuity and provident fund and suggested that the Calcutta and Madras Dock Labour Boards should provide for payment of gratuity to registered workers as was done by the Bombay Dock Labour Board and a provident fund scheme should be introduced by the Madras Dock Labour Board as was done by the other two Boards. The Committee recommended that the Boards should come into picture before any agreement between the employers and employees was adopted and the Boards should also help in promoting settlement of disputes and should submit reports of their endeavours to the Central Government who should also give due weight to these reports. The Committee recommended that the Boards should adopt a liberal policy for providing welfare and amenities to the workers—amenities within dock area should be provided by the Port Authorities and outside the dock area by the Boards and the Boards should pay special attention to the provision of adequate and suitable housing for workers.

The Committee recommended that the Central Government should exercise effective supervision of the working of the schemes at different ports and co-ordinate all important measures and for these purposes should depute a high level officer who should be the Chairman of the Advisory Committees.

On the basis of the findings and recommendations of the Dock Workers (Regulation of Employment) Enquiry Committee 1955, the Central Government has formulated Revised Drafts of the Calcutta, Madras and Bombay Schemes in March, 1956 repealing the Calcutta Dock Workers (Regulation of Employment) Scheme, 1951, Madras Dock Workers (Regulation of Employment) Scheme, 1952 and Bombay Dock Workers (Regulation of Employment) Scheme, 1951. The Drafts of these Schemes have been published in the Gazette of India for eliciting public opinion.

The main feature of the Revised Schemes is the importance attached to the system of "payment by results." Workers paid by results generally earn more than those paid on time-work in the same occupation or trade, and the dock workers will be benefited considerably.

The Dock Labour Boards at ports will prescribe forms of productivity in respect of cargoes of different kinds. A worker will be entitled to daily wage proportionate to the standard of output and he will also receive a liberal incentive bonus if his output is more than the specified standard.

The Dock Labour Boards will be concerned with matters of policy and will not be responsible for the day-to-day implementation of the decisions. The powers of handling personnel matters should be exercised by senior officers having sufficient authority like the Chairman and the Deputy Chairman (to whom many of the powers of the Chairman may be vested under the Revised Schemes) with provision for appeal to the Central Government against the order of the Chairman.

Indian Ports Act, 1908

The Indian Ports Act, 1908, as amended in 1922 and 1931 *inter alia* prohibits the employment of children under 12 years of age in handling goods in ports to which the Act applies. The Employment of Children Act, 1938 prohibits employment of children below 15 in any occupation involving the handling of goods within the limits of any port.

Marking of Heavy Packages Act, 1951 & Rules, 1951

The Government of India introduced the Marking of Heavy Packages Bill in the Parliament on the 11th August 1950 to give effect to the I.L.O. Convention No. 27—Marking of Weight (Packages transported by Vessels, Convention, 1929. The Bill was passed by the Parliament (XXXIX of 1951) and received the assent of the President of the 25th June, 1951. The Act applies to packages or objects weighing not less than one metric ton which is equal to one hundred kilogrammes or 2204.6 standard pounds or 26.8 standard maunds, consigned for transport by sea or inland water-way from any place in India. Under the Act every person consigning a heavy package, the gross weight of which is one thousand kilogrammes or more for transport by sea or inland water, should mark thereon plainly and durably the gross weight of the package. Where there is no means of determining the correct weight of the package, the anticipated maximum and minimum may be marked on the package, e.g., between one and two metric tons. Contravention of the provision regarding marking of the packages is punishable with fine up to Rs. 500/-.

The Marking of Heavy Packages Rules, 1951 which came into force on the 1st November, 1951 require that the gross weight of a heavy package shall be marked thereon in metric tons, kilogrammes, standard pounds or standard maunds in English and also in the regional language, with a kind of paint which cannot be easily effaced.

INDIAN DOCK LABOURERS ACT, 1934 (XIX OF 1934)

Statement of Objects and Reasons

The International Labour Conference at its Twelfth Session held in 1929 adopted a Draft Convention concerning the protection against accidents of workers, employed in loading ships. At its Sixteenth Session held in 1932 the Conference adopted a Revised Draft Convention incorporating in the original Draft Convention certain amendments proposed by Government who had experienced difficulties of a practical nature in considering the question of ratifying the original Convention. The revised Draft Convention is of exactly the scope and character as the original Draft Convention adopted in 1929 and differs from it only in certain matters of technical detail.

After consulting the Local Governments and through them the Port Trusts and commercial bodies the Government of India came to the conclusion that the Revised Draft Convention should be ratified on behalf of India.

The Bill is intended to give effect in India to the Revised Draft Convention.

(3) The following classes of dangerous occurrences shall forthwith be reported to the Inspector in the manner prescribed in clause (1), whether personal injury or disablement is caused or not:—

- (i) collapse or failure of lifting machinery;

(ii) breakages of ropes, chains or other appliances used in raising or lowering of persons or goods; and

(iii) collapse or failure of means of access to or from a ship.

(4) The notice so given under clause (1) or clause (3) shall be confirmed within 48 hours of the occurrence by sending a written report to the Inspector in Form XII.

13. Washing facilities.—There shall be provided and maintained in good and clean condition for the use of workers engaged in loading or unloading coal and dangerous and noxious goods suitable facilities for washing at conveniently accessible places.

14. Notices.—Notices shall be exhibited in prominent positions at every dock, wharf, or quay stating—

- (a) the position of each first-aid box and the place where the person in charge thereof can be found,
- (b) the position of stretchers or other appliances, and
- (c) the position of the ambulance carriage or, where such is not provided, the position of the nearest telephone and the name and telephone number of the hospital or other place from which such carriage may be obtained.

PART III

15. Responsibilities.—It shall be the duty of the owner, master, officer-in-charge or agents of the ship to comply with Regulations 16 to 24.

16. Access between shore and ship.—If a ship is lying at a wharf or quay for the purpose of loading or unloading or coaling there shall be safe means of access for the use of workers at such times as they have to pass from the ship to the shore or from the shore to the ship as follows:—

- (a) where reasonably practicable the ship's accommodation ladder or a gangway or a similar construction not less than twenty-two inches wide, properly secured and fenced throughout on each side to a clear height of two feet nine inches by means of upper and lower rails, taut ropes or chains or by other equally safe means, except that in the case of the ship's accommodation ladder such fencing shall be necessary on one side only provided that the other side is properly protected by the ship's side.
- (b) in other cases a ladder of sound material and adequate length which shall be properly secured to prevent slipping:

Provided that nothing in this regulation shall be held to apply to cargo stages or cargo gangways if other proper means of access is provided in conformity with these Regulations:

Provided also that as regards any sailing vessel not exceeding 250 tons net registered tonnage and any mechanically propelled vessel not exceeding 150 tons gross registered tonnage this regulation shall not apply if and while the conditions are such that it is possible without undue risk to pass to and from the ship without the aid of any special appliances.

17. Access from ship to another vessel.—(1) If a ship is alongside another vessel, and workers have to pass from one to the other, safe means of access shall be provided for their use, unless the conditions are such that it is possible to pass from one to the other without undue risk and without the aid of any special appliance.

(2) If the other vessel is a sailing barge, flat, keel, lighter or other similar vessel of relatively low freeboard, the means of access shall be provided by the ship which has the higher freeboard.

18. Access between deck and hold.—(1) If the depth from the level of the deck to the bottom of the hold exceeds five feet, there shall be maintained safe means of access from the deck to the hold in which work is being carried on.

(2) Save as hereinafter provided such access shall be afforded by ladder, and by ladder cleats or cups on the coamings, and shall not be deemed to be safe—

- (a) unless the ladders between the lower decks are in the same line as the ladder from the top deck if the same is practicable having regard to the position of the lower *hatch* or *hatches*;
- (b) unless the ladders provide a foothold of a depth including any space behind the ladder of not less than $4\frac{1}{2}$ inches for a width of 10 inches and a firm handhold;
- (c) unless the cleats or cups provided on coamings (i) provide a foothold of a depth including any space behind the cleats or cups of not less than $4\frac{1}{2}$ inches for a width of 10 inches and a firm handhold; (ii) are so constructed as to prevent

- a man's foot slipping off the side, (iii) are placed vertically one above the other and in the same lines as the ladders to which they give access;
- (d) unless the cargo is stowed sufficiently far from the ladder to leave at each rung of the ladder foothold of a depth including any space behind the ladder of not less than $4\frac{1}{2}$ inches for a width of 10 inches and a firm handhold;
- (e) unless there is room to pass between a winch or other obstruction and the coamings at the place where the ladder leaves the deck; or
- (f) if the ladder is recessed under the deck more than is reasonably necessary to keep the ladder clear of the *hatchway*:

Provided that such access may be afforded—

- (i) where the provision of a ladder on a bulkhead or in a trunk *hatchway* can be shown to be reasonably impracticable by cleats or cups complying with the requirements of clause (c);
- (ii) by ladders or steps, separate from any *hatchway* or sloping from deck to deck, if such ladders or steps comply with the requirements of clauses (b), (d) and (e).
- (3) Shaft tunnels shall be equipped with adequate handhold and foothold on each side.
- 19. Lighting for processes on ships.**—When the processes are being carried on—

- (a) the places in the hold and on the decks where work is being carried on,
- (b) the means of access provided in pursuance of Regulations 16 and 17, and
- (c) all parts of the ship to which workers may be required to proceed in the course of their employment.

shall be efficiently lighted, due regard being had to the safety of the ship and cargo, of all workers and of navigation of other vessels and to the provisions of any law and of any rules, regulations, orders or bye-laws having the force of law.

20. Beams used for hatch coverings.—All fore and aft beams and thwartship beams used for *hatch* covering shall have suitable gear for lifting them on and off without it being necessary for any person to go upon them to adjust such gear.

21. Marking of beams and hatch coverings.—(1) All hatch coverings shall be kept plainly marked to indicate the deck and *hatch* to which they belong and their position therein:

Provided that this regulation shall not apply in cases where all the *hatch* coverings of a ship are interchangeable or, in respect of marking of position, where all *hatch* coverings of a *hatch* are interchangeable.

(2) Sub-regulation (1) shall also apply to fore and aft beams and to thwartship beams as it applies to *hatch* coverings.

22. Maintenance of beams and hatch coverings.—All fore and aft beams and thwartship beams used for *hatch* coverings and all *hatch* coverings shall be maintained in good condition.

23. Hand grips.—Adequate hand grips shall be provided on all *hatch* coverings, having regard to their size and weight, unless the construction of the *hatch* or the *hatch* coverings is of a character rendering the provisions of hand grips unnecessary.

24. Handling of noxious and dangerous goods.—No person shall be allowed to enter any hold of a vessel wherein there is given off dust, fumes or other impurities of such a nature and to such an extent as is likely to be injurious or offensive to the workers, or any dust in substantial quantities, unless—

- (i) all practical steps have been taken to remove the dust, fumes or other impurities which may be present and to prevent any further ingress thereof, and the responsible authority under this part has satisfied himself that the said hold is free from dust, fumes or other impurities and fit for persons to enter the same, or
- (ii) the person entering such a hold has been provided with suitable protective equipment.

PART IV

25. Responsibilities.—It shall be the duty of the owner of machinery or plant used in the processes and in the case of machinery or plant carried on board a ship not being a ship registered in India, it shall also be the duty of the master or chief officer of such a ship to comply with Regulations 26 to 43.

26. Competent persons.—In this part, save as otherwise expressly defined in Regulation 28, the expression "competent person" means an official of a workshop in India

approved for any of the specified purposes in respect of testing, examination, annealing or certification of plant, lifting machinery or gear by the Central Government or by an authority nominated by the Central Government in that behalf, and any other person who is recognised as a 'competent person' for the purposes of the national regulations in force in other countries for the implementation of the Protection against Accidents (Dockers) Convention (Revised) 1932 adopted by the International Labour Conference.

27. Lifting machinery.—(1) All *lifting machinery* shall have been tested and examined by a competent person in the manner set out in Schedule II before being taken into use.

(2) All derricks and permanent attachments, including bridle chains, to the derrick, mast and deck used in hoisting or lowering shall be inspected once in every twelve months and be thoroughly examined once at least in every four years by a responsible person.

(3) All other *lifting machinery* shall be thoroughly examined by a responsible person once at least every twelve months.

(4) For the purposes of the regulations thorough examination means a visual examination, supplemented if necessary by other means such as a hammer test, carried out as carefully as the conditions permit, in order to arrive at a reliable conclusion as to the safety of the parts examined; and if necessary for the purpose, parts of the machinery and gear, shall be dismantled.

28. Special types of loose gear.—The following classes of gear, namely:—

(1) chains made of malleable cast iron;

(2) plate link chains;

(3) chains, rings, hooks, shackles and swivels made of steel;

(4) pitched chains;

(5) rings, hooks, shackles and swivels permanently attached to pitched chains, pulley blocks or weighing machines;

(6) hooks and swivels having screw-threaded parts or ball bearings or other case-hardened parts; and

(7) Bordeaux connections,

shall be thoroughly examined by a competent person once at least in every twelve months.

For the purposes of this regulation thorough examination means a visual examination supplemented if necessary by other means, carried out as carefully as the conditions permit, in order to arrive at a reliable conclusion as to the safety of the parts examined, and if necessary for the purpose, parts of the gear shall be dismantled.

For the purposes of 'thorough examination' of the gear carried on board a ship, the Master or the Chief Officer of the ship shall be deemed to be the 'competent person'.

29. Other loose gear.—(1) No chain, ring hook, shackle, swivel or *pulley block* shall be used in hoisting or lowering unless it has been tested and examined by a competent person in the manner set out in Schedule II.

(2) All chains other than bridle chains attached to derricks or masts and all rings, hooks, shackles and swivels used in hoisting or lowering shall unless they have been subjected to such other treatment as an Inspector may, subject to confirmation by the Central Government, approve, be effectually annealed under the supervision of a competent person and at the following intervals:—

(i) half-inch and smaller chains, rings, hooks, shackles and swivels in general use, once at least in every six months,

(ii) all other chains, rings, hooks, shackles and swivels in general use once at least in every twelve months:

Provided that nothing in this sub-regulation shall apply to any of the gear mentioned in Regulation 28:

Provided also that in the case of such gear used solely on cranes and other hoisting appliances worked by hand twelve months shall be substituted for six months in sub-clause (i) and two years for twelve months in sub-clause (ii).

Provided also that where an Inspector is of opinion, that, owing to the size, design, material or infrequency of use of any such gear or class of such gear, the requirement of this regulation as to annealing is not necessary for the protection of workers, he may by certificate in writing (which he may in his discretion revoke) and subject to confirmation by the Central Government exempt such gear or class of gear from such requirement subject to such conditions as may be specified in such certificate.

(3) All chains, other than bridle chains attached to derricks or masts, and all rings, hooks, shackles, swivels and all *pulley blocks* shall be inspected by a responsible person

immediately before being taken into use unless they have been inspected within the preceding three months.

(4) All chains, rings, hooks, shackles or swivels used in hoisting or lowering which have been lengthened, altered or repaired by welding shall before being again taken into use be adequately tested and re-examined by a competent person in the manner set out in Schedule II.

30. Ropes.—(1) No rope shall be used in hoisting or lowering unless—

(a) it is of suitable quality and free from patent defect; and

(b) in the case of wire rope, it has been examined and tested by a competent person in the manner set out in Schedule II.

(2) Every wire rope in general use for hoisting or lowering shall be inspected by a responsible person once at least in every three months, provided that after any wire has broken in such rope it shall be inspected once at least in every month.

(3) No wire rope shall be used in hoisting or lowering if in any length of eight diameters the total number of visible broken wires exceeds ten per cent. of the total number of wires or the rope shows signs of excessive wear, corrosion or other defect which, in the opinion of the person who inspects it, renders it unfit for use.

(4) A thimble or loop splice made in any wire rope shall have at least three tucks with a whole strand of the rope and two tucks with one half of the wires cut out of each strand and the strands in all cases shall be tucked against the lay of the rope:

Provided that this regulation shall not operate to prevent the use of another form of splice which can be shown to be as efficient as that laid down in this regulation.

31. Register of periodical examination.—A Register in Form II shall be maintained in which shall be entered particulars of:—

(a) annual inspections and quadrennial examinations required by regulation 27(2);

(b) annual examination required by regulation 27(3);

(c) test and examination under regulation 30(1)(b) of wire rope—Form VI.

(2) Certificates shall be prepared of the annealing of chains, etc., under regulation 29(2) in Form VII, and unless the required particulars have been entered in the register in Form II, shall be attached to that register.

(3) Certificates shall be prepared of the annual thorough examination of the gear mentioned in regulation 28 in Form VIII.

33. Maintenance and production of register and certificates.—The register and the certificates attached to the register—

(a) shall be kept on the premises unless some other place has been approved in writing by an Inspector;

(b) shall be produced on demand before an Inspector; and

(c) shall be retained for at least four years after the date of the last entry.

34. Machinery etc., not to be brought into use until the necessary entries are made in the Register.—No machinery, chain, rope or other gear in respect of which an entry is required to be made in the register in Form II, or in respect of which a certificate is required to be attached to such register, whether as an alternative to an entry in Form II or otherwise or in respect of which a certificate is required to be prepared, shall be used unless and until the required entry has been made, or the required certificate has been so attached or prepared, as the case may be.

35. Pulley blocks.—No Pulley block shall be used in hoisting or lowering unless the safe working load is clearly stamped upon it.

36. Safe working load for chain and wire rope slings.—Means shall be provided to enable any person using a chain or wire rope sling to ascertain the safe working load

for such chain or wire rope sling under such conditions as it may be used. Such means shall consist—

- (a) as regards chain slings, of marking the safe working load in plain figures or letters upon the sling or upon a tablet or ring of durable material attached securely thereto, and
- (b) as regards wire rope slings, of either the means specified in clause (a) or a notice or notices, so exhibited as to be easily read by any person concerned, stating the safe working loads for the various sizes of wire rope slings used.

37. Maintenance of chains.—Chains shall not be shortened by tying knots in them; and suitable packing shall be provided to prevent the links coming into contact with sharp edges of loads of hard material.

38. Fencing of motors, etc.—All motors cogwheels, chain and friction gearing, shafting, live electric conductors and steam pipes shall (unless it can be shown that by their position and construction they are equally safe to every worker as they would be if securely fenced) be securely fenced so far as is practicable without impeding the safe working of the ship and without infringing any rules, regulations, orders, or byelaws, having the force of law.

39. Precautions against accidental fall of loads.—(1) Cranes and winches shall be provided with such means as will reduce to a minimum the risk of the accidental descent of a load while being raised or lowered; in particular, the lever controlling the link motion reversing gear of a crane or winch shall be provided with a suitable spring or other locking arrangement.

(2) The end of a wire rope used for hoisting or lowering shall be securely attached to the winding drum of the winch by means of a clamp or other suitable means.

40. Fencing of and access to cranes.—The driver's platform on every crane or trip driven by mechanical powers shall be securely fenced and shall be provided with safe means of access. In particular where access is by a ladder—

- (a) the sides of the ladder shall extend to a reasonable distance beyond the platform or some other suitable handhold shall be provided;
- (b) the landing place on the platform shall be maintained free from obstruction;
- (c) in cases where the ladder is vertical and exceeds thirty feet in height, a resting place shall be provided, approximately midway between the platform and the foot of the ladder.

41. Safe working load for cranes, etc.—Every crane and derrick shall have the safe working load plainly marked upon it, and every shore crane if so constructed that the safe working load may be varied by the raising or lowering of the jib or otherwise, shall have attached to it an automatic indicator of safe working loads, provided that in cases where the jib may be raised or lowered, provision on the crane of a table showing the safe working loads at the corresponding inclinations or radio of the jib shall be considered sufficient compliance.

42. Steam.—Adequate measures shall be taken to prevent exhaust steam from, and so far as is practicable live steam to any crane or winch obscuring any part of the gangways, stages, wharf, or quay where any person is employed in the *processes*.

43. Derricks.—Appropriate measures shall be taken to prevent the foot of a derrick being accidentally lifted out of its socket or support.

PART V

44. Responsibilities.—It shall be the duty of every person who by himself, his agents, or employees carries on the processes, and of all agents, employees and workers employed by him in the processes, to comply with Regulations 45 to 57-A;

Provided that, where the processes are carried on by a stevedore or other person other than the owner of the ship, it shall be the duty of the owner, master or officer-in-charge of the ship to comply with Regulation 50 so far as it concerns—

- (1) any hatch not taken over by the said stevedore or other person for the purpose of the processes, and
- (2) any hatch which, after having been taken over by the said stevedore or other person for the purpose of the processes—
 - (i) has been reported by written notice in Form I to the owner, master or officer-in-charge of the ship, by or on behalf of the said stevedore or other person as being a hatch at which the processes have been completed or completed for the time being, and,

- (ii) either has been left by the said stevedore or other person fenced or covered as required by Regulation 50 or has been taken into use by or on behalf of the owner of the ship, and in either case has been so reported by such written notice as aforesaid.

It shall be the duty of the owner, master or officer-in-charge of the ship to give immediately a written acknowledgement in Form I of such written notice as aforesaid.

45. Escape from holds, etc.—Precautions shall be taken to facilitate the escape of the workers when employed in a hold or on 'tween decks' in dealing with coal or other bulk cargo.

45-A. Access to and from undecked vessels.—When, in a vessel which is not decked, workers have to carry on the processes in a hold, the depth of which exceed 5 feet, there shall be safe means of access to and from the hold for their use, and when a ladder is to be used in the hold, it shall be equipped at the top with hooks or other means for firmly securing it.

46. Loading of lifting machinery.—(1) No *lifting machinery*, chains or other lifting appliance shall be loaded beyond the safe working load:

Provided that a crane may be loaded beyond the safe working load in exceptional cases to such extent and subject to such conditions as may be approved by the engineer-in-charge or other competent person, if on each occasion—

- (a) the written permission of the owner or his responsible agent has been obtained, and
- (b) a record of the over-load is kept:

Provided also that, where the load upon a single sheave *pulley block* is attached to the *pully block* instead of to the chain or rope passing round the sheave, the load on the *pully block* shall be deemed for the purpose of this regulation to be half the actual load.

(2) No load shall be left suspended from a crane, winch, or other machine unless there is a competent person actually in charge of the machine while the load is so left.

47. Drivers of cranes, etc.—No person under 18 years of age and no person who is not sufficiently competent and reliable shall be employed as driver of a crane or winch whether driven by mechanical power or otherwise, or to give signals to a driver or to attend to cargo falls on winch-ends or winch bodies.

48. Passages to be kept clear.—Where goods are placed on a wharf or quay,—

- (a) a clear passage leading to the means of access to the ship required by Regulation 11 shall be maintained on the wharf or quay; and
- (b) if any space is left along the edge of the wharf or quay, it shall be at least three feet wide and clear of all obstructions other than fixed structures, plant and appliances in use.

49. Deck and cargo-stages.—No deck-stage or cargo-stage shall be used in the *processes* unless it is substantially and firmly constructed and adequately supported, and, where necessary, securely fastened.

(2) No truck shall be used for carrying cargo between ship and shore on a stage so steep as to be unsafe.

(3) Any stage which is slippery shall be made safe by the use of sand or otherwise.

50. Hatches not in use.—(1) If any hatch of a hold accessible to any worker and exceeding five feet in depth, measured from the level of the deck in which the *hatch* is situated to the bottom of the hold, is not in use for the passage of goods, coal or other material, or for trimming, and the coamings are less than two feet six inches in height, such *hatch* shall either be fenced to a height of three feet or be securely covered and similar measures shall be taken, when necessary to protect all other openings in a deck which might be dangerous to the workers:

Provided that this requirement shall not apply (i) to vessels not exceeding 200 tons net registered tonnage which have only one *hatchway*, and (ii) to any vessel during meal times or other short interruptions of work during the period of employment.

(2) *Hatch* coverings shall not be used in the construction of deck or cargo stages, or for any other purpose which may expose them to damage.

(3) *Hatch* coverings shall be replaced on the hatches in the positions indicated by the markings, made thereon in pursuance of Regulation 21.

51. Handling at intermediate decks.—No cargo shall be loaded or unloaded by a fall or sling at any intermediate deck unless either the *hatch* at that deck is securely covered

or a secure landing platform of a width not less than that of one section of *hatch* coverings has been placed across it:

Provided that this regulation shall not apply to any process of unloading the whole of which will be completed within a period of half an hour.

52. Hooks for bales, etc.—When the working space in a hold is confined to the square of the *hatch*, hooks shall not be made fast in the bands or fastenings of bales of cotton, wool, cork, gunny bags or other similar goods, nor shall canhooks be used for raising or lowering a barrel when, owing to the construction or condition of the barrel or of the hooks, their use is likely to be unsafe.

Nothing in this regulation shall apply to breaking out or making up slings.

53. Skeleton decks.—When work is proceeding on any skeleton deck, adequate staging shall be provided unless the space beneath the deck is filled with cargo to within a distance of two feet of such deck.

54. Stowing and unstowing.—Where stacking, unstacking, stowing or unstowing of cargo or handling in connection therewith cannot be safely carried out unaided reasonable measures to guard against accident shall be taken by shoring or otherwise.

55. Hatches in use.—(1) All hatch covers exceeding 125 lbs. in weight and all beams of any hatch in use shall be handled with the help of a winch or crane or other mechanical means.

(2) The beams of any *hatch* in use for the *processes*, shall, if not removed be adequately secured to prevent their displacement.

56. Signallers.—When cargo is being loaded or unloaded by a fall at a *hatchway*, a signaller shall be employed, and where more than one fall is being worked at a *hatchway*, a separate signaller shall be employed to attend to each fall:

Provided that

(i) this regulation shall not apply, in cases where a barge lighter or other similar vessel is being loaded or unloaded if the driver of the crane or winch working the fall has a clear and unrestricted view of those parts of the hold where work is being carried on; and

(ii) where the inspector is of opinion that, owing to the nature of the crane or winch or other appliance in use or by reason of any special arrangements, the requirements of this regulation are not necessary for the safety of workers, he may by certificate in writing (which he may in his discretion revoke) suspend such requirements subject to such conditions as may be specified in such certificate.

57. Transport of workers.—When any worker has to proceed to or from a ship by water for the purpose of carrying on the *processes*, proper measures shall be taken to provide for his safe transport. Vessels used for this purpose shall be in charge of a competent person, shall not be overcrowded, and shall be properly equipped for safe navigation and maintained in good condition.

57-A. Handling of caustic and corrosive substances.—When during a process involving the handling of any caustic or corrosive substance there is likelihood of any spillage or leakage of the substance, no person shall be allowed to work without wearing suitable protective clothing or other equipment.

PART VI

58. Removal of fencing, safety appliances, etc.—(1) No person shall, unless duly authorised or in case of any emergency remove or interfere with any fencing, gangway, gear, ladder, hatch covering, life-saving means or appliances, lights, marks, stages or other things whatsoever required by these Regulations to be provided. If removed, such things shall be restored at the end of the period during which their removal was authorised or at the end of the emergency as the case may be, by the persons last engaged in the work that necessitated such removal.

(2) The fencing required by Regulation 7 shall not be removed except to the extent and for the period reasonably necessary for carrying on the work of the dock or ship, or for repairing any fencing. If removed, it shall be restored forthwith at the end of that period by the persons engaged in the work that necessitated its removal.

59. Workers to use proper means of access.—Every worker shall use the means of access provided in accordance with Regulations 16, 17 and 18, and no person shall authorise or order another to use means of access other than those provided in accordance therewith.

60. **Persons not to go upon beams for adjusting gear.**—No person shall go upon the force and aft beams or thwartship beams for the purpose of adjusting the gear for lifting them on and off nor shall any person authorise or order another to do so.

PART VII

61. **Employers' responsibility for machinery, etc.**—No employer shall allow the use by workers of machinery or gear which does not comply with the Regulations in Part IV.

62. **Employers' responsibility for safe access, lighting, and handling of noxious and dangerous goods.**—If the persons whose duty it is to comply with Regulations 16, 17, 19 and 24, fail so to do, then it shall also be the duty of employers of the workers, for whose use the means of access, lights and protective equipment, as the case may be, are required, to comply with the said Regulations within the shortest time reasonably practicable after such failure.

PART VIII

63. **Abstracts to be affixed.**—The Abstracts of the Indian Dock Labourers Act, 1934, and of these Regulations which are to be affixed in accordance with section 8 of the said Act in some conspicuous place near the main entrance of every dock, wharf, quay or similar premises where the *processes* are carried on, shall consist of sections 3(1), 3(2), 4(a), 4(b), 9, 10(2), of the said Act (Form X) and Regulations 2(g), 2(m), 3—5 and 7, 19, 33—55, 57—62 and Schedule II (Form XI).

SCHEDULE II

Manner of Test and Examination before taking Lifting Machinery and Gear into use

REGULATIONS 27 (1), 29 (1) and 30 (1).—(a) Every inch with the whole of the gear accessory thereto (including derricks, goose necks, eye plates, eye-bolts or other attachments) shall be tested with a proof load which shall exceed the safe working load as follows:—

Safe working load				Proof load	
Up to 20 tons	25 per cent. in excess.
20—50 tons	5 tons in excess.
Over 50 tons	10 per cent. in excess.

The proof load shall be applied either (i) by hoisting moveable weights or (ii) by means of a spring or hydraulic balance or similar appliance, with the derrick at an angle to the horizontal which shall be stated in the certificate of the test. In the former case, after the moveable weights have been hoisted, the derrick shall be swung as far as possible in both directions. In the latter case the proof load shall be applied with the derrick swung as far as practicable first in one direction and then in the other.

(b) Every crane and other hoisting machine with its accessory gear shall be tested with a proof load which shall exceed the safe working load as follows:—

Safe working load				Proof load	
Up to 20 tons	25 per cent. in excess.
20—50 tons	5 tons in excess.
Over 50 tons	10 per cent. in excess.

The said proof load shall be hoisted and swung as far as possible in both directions. In the case of a jib-crane if the jib has a variable radius, it shall be tested with a proof load as defined above at the maximum and minimum radii of the jib. In the case of hydraulic cranes or hoists, where, owing to the limitation of pressure it is impossible to hoist a load 25 per cent. in excess of the safe working load, it shall be sufficient to hoist the greatest possible load.

(c) Every article of loose gear (whether it is accessory to a machine or not) shall be tested with a proof load at least equal to that shown against the article in the following table:—

Article of Gear				Proof load
Pitched chains used with hand operated Pulley Blocks and Rings, Hooks, Shackles or Swivels permanently attached thereto				One and a half times the safe working load.
Other chains	Twice the safe working load.
Other Rings	
Other Hooks	
Other Shackles	
Other Swivels	
Hand operated Pulley Blocks used with Pitched Chains and Rings, Hooks, Shackles or Swivels permanently attached thereto.				One and a half times the safe working load.
Other Pulley Blocks—				
Single Sheave Blocks	Four times the safe working load.
Multiple Sheave Block with safe working load up to and including 20 tons	Twice the safe working load.
Multiple Sheave Block with safe working load over 2 tons up to and including 40 tons	Twenty tons in excess of the safe working load.
Multiple Sheave Block with safe working load over 40 tons	One and a half times the safe working load.

Provided that where an Inspector is of opinion that, owing to the size, design, construction, material or use of any such loose gear or class of such gear any of the above requirements are not necessary for the protection of workers, he may by certificate in writing (which he may in his discretion revoke), and subject to confirmation by the Central Government exempt such gear or class of gear from such requirements, subject to such conditions as may be stated in the certificate.

(d) After being tested as aforesaid, all machines with the whole of the gear accessory thereto and all loose gear shall be examined, the sheaves and the pins of the pulley block being removed for the purpose, to see that no part is injured or permanently deformed by the test.

(e) In the case of wire rope, a sample shall be tested to destruction and the safe working load shall not exceed one-fifth of the breaking load of the sample tested.

(c) An Inspector shall ascertain at each inspection how far any defects disclosed at a previous inspection have been rectified and how far any orders previously issued by him have been complied with. His findings and any defects which may come to light during the current inspection, together with any orders passed by him under the Act or these Regulations shall be recorded in an Inspection Register maintained in accordance with clause (d) below.

An extract from the record including the orders of the Inspector together with any remarks he may wish to make or any defects found to exist in such ship, premises, lifting machinery or gear that he may wish to bring to notice shall be sent to the owner, master, officer-in-charge or agents of the ship or the person in general management and control of the premises, or the person who by himself, his agents or his employees carries on the process, as the case may be in Form 'IX'.

Fencing of working places and approaches.—(1) Every regular approach over a dock, wharf or quay which workers have to use for going to or from a working place at which the processes are carried on and every such working place on shore shall be maintained with due regard to the safety of the workers.

(2) In particular, the following parts shall, as far as is practicable having regard to the traffic and working be securely fenced, so that the height of the fence shall be in no place less than two feet six inches, and the fencing shall be maintained in good condition ready for use :—

(a) all breaks, dangerous corners, and other dangerous parts or edges of a dock, wharf or quay;

(b) both sides of such footways over bridges, caissons, and dock gates as are in general use by workers and each side of the entrance at each end of such footway for a sufficient distance not exceeding five yards:

Provided that in the case of fences which were constructed before the date of promulgation of these regulations, it shall be sufficient if the height of the fence is in no place less than two feet three inches.

PART III

* * * * *

19. Lighting for processes on ships.—When the processes are being carried

- (a) the places in the hold and on the decks where work is being carried on,
- (b) the means of access provided in pursuance of Regulations 16 and 17, and
- (c) all parts of the ship to which workers may be required to proceed in the course of their employment,

shall be efficiently lighted, due regard being had to the safety of the ship and cargo, of all workers and of navigation of other vessels and to the provisions of any law and of any rules, regulations, orders or bye-laws having the force of law.

* * * * *

PART IV

* * * * *

33. Maintenance and production of register and certificates.—The register and the certificates attached to the register—

- (a) shall be kept on the premises unless some other place has been approved in writing by an Inspector;
- (b) shall be produced on demand before an Inspector; and
- (c) shall be retained for at least four years after the date of the last entry.

34. Machinery, etc., not to be brought into use until the necessary entries are made in the register.—No machinery, chain rope or other gear in respect of which an entry is required to be made in the register in Form II, or in respect of which a certificate is required to be attached to such register whether as an alternative to an entry in Form II or otherwise, or in respect of which a certificate is required to be prepared, shall be used unless and until the required entry has been made, or the required certificate has been so attached, or prepared, as the case may be.

35. Pulley blocks.—No pulley block shall be used in hoisting or lowering unless the safe working load is clearly stamped upon it.

36. Safe working load for chain and wire rope slings.—Means shall be provided to enable any person using a chain or wire rope sling to ascertain the safe working load for such chain or wire rope sling under such conditions as it may be used. Such means shall consist—

- (a) as regards chain slings, of marking the safe working load in plain figures or letters upon the sling or upon a tablet or ring of durable material attached securely thereto, and
- (b) as regards wire rope slings, of either the means specified in clause (a) or a notice or notices, so exhibited as to be easily read by any person concerned, stating the safe working loads for the various sizes of wire-ropes slings used.

37. Maintenance of chains.—Chains shall not be shortened by tying knots in them; and suitable packing shall be provided to prevent the links coming into contact, with sharp edges of loads of hard material.

38. Fencing of motors, etc.—All motors, cogwheels, chain and friction gearing, shafting, live electric conductors and steam pipes shall (unless it can be shown that by their position and construction they are equally safe to every worker as they would be if securely fenced) be securely fenced so far as is practicable without impeding the safe working of the ship and without infringing any rules, regulations, orders or bye-laws, having the force of law.

39. Precautions against accidental fall of loads.—(1) Cranes and winches shall be provided with such means as will reduce to a minimum the risk of the accidental descent of a load while being raised or lowered; in particular, the lever controlling the link motion reversing gear of a crane or winch shall be provided with a suitable spring or other locking arrangement.

(2) The end of a wire rope used for hoisting or lowering shall be securely attached to the winding drum of the winch by means of a clamp or other suitable means.

40. Fencing of and access to cranes.—The driver's platform on every crane or tip driven by mechanical power shall be securely fenced and shall be provided with safe means of access. In particular, where access is by a ladder—

- (a) the sides of the ladder shall extend to a reasonable distance beyond the platform or some other suitable handhold shall be provided;

- (b) the landing place on the platform shall be maintained free from obstruction;
- (c) in cases where the ladder is vertical and exceeds thirty feet in height a resting place shall be provided approximately midway between the platform and the foot of the ladder.

41. Safe working load for cranes, etc.—Every crane and derrick shall have the safe working load plainly marked upon it, and every shore crane if so constructed that the safe working load may be varied by the raising or lowering of the jib or otherwise, shall have attached to it an automatic indicator of safe working loads, provided that in cases where the jib may be raised or lowered, provision on the crane of a table showing the safe working loads at the corresponding inclinations of radii of the jib shall be considered sufficient compliance.

42. Steam.—Adequate measures shall be taken to prevent exhaust steam from, and so far as is practicable live steam to, any crane or winch obscuring any part of the gangways, stages, wharf, or quay where any person is employed in the processes.

43. Derricks.—Appropriate measures shall be taken to prevent the foot of a derrick being accidentally lifted out of its socket or support.

PART V

44. Responsibilities.—It shall be the duty of every person who by himself, his agents, or employees carries on the processes and of all agents, employees and workers employed by him in the processes to comply with Regulations 45 to 57-A.

Provided that where the processes are carried on by a stevedore or other person other than the owner of the ship, it shall be the duty of the owner, master or officer-in-charge of the ship to comply with Regulation 50 so far as it concerns—

(1) any hatch not taken over by the said stevedore or other person for the purpose of the processes, and

(2) any hatch which, after having been taken over by the said stevedore or other person for the purpose of the processes—

(i) has been reported by written notice in Form I to the owner, master or officer-in-charge of the ship, by or on behalf of the said stevedore or other person as being a hatch at which the processes have been completed or completed for the time being and

(ii) either has been left by the said stevedore or other person fenced or covered as required by Regulation 50 or has been taken into use by or on behalf of the owner of the ship, and in either case has been so reported by such written notice as aforesaid.

It shall be the duty of the owner, master or officer-in-charge of the ship to give immediately a written acknowledgment in Form I of such written notice as aforesaid.

Access to and from undecked vessels.—When in a vessel, which is not decked, workers have to carry on the processes in a hold, the depth of which exceeds 5 feet, there shall be safe means of access to and from the hold for their use, and when a ladder is to be used in the hold, it shall be equipped at the top with hooks or other means for firmly securing it.

46. Loading of lifting machinery.—(1) *No lifting machinery*, chains or other lifting appliance shall be loaded beyond the safe working load:

Provided that a crane may be loaded beyond the safe working load in exceptional cases to such extent and subject to such conditions as may be approved by the engineer in charge or other competent person, if on each occasion—

- (a) the written permission of the owner or his responsible agent has been obtained, and
- (b) a record of the overload is kept:

Provided also that, where the load upon a single sheave, *pulley block* is attached to the *pulley block* instead of to the chain or rope passing round the sheave, the load on the *pulley block* shall be deemed for the purpose of this Regulation to be half the actual load.

(2) No load shall be left suspended from a crane, winch or other machine unless there is a competent person actually in charge of the machine while the load is so left.

47. Drivers of cranes, etc.—No person under 18 years of age and no person who is not sufficiently competent and reliable shall be employed as driver of a crane or winch, whether

(3) Any stage which is slippery shall be made safe by the use of sand or otherwise.

50. Hatches not in use.—(1) If any *hatch* of a hold accessible to any worker and exceeding five feet in depth, measured from the level of the deck in which the *hatch* is situated to the bottom of the hold, is not in use for the passage of goods, coal or other material, or for trimming, and the coamings are less than two feet six inches in height, such *hatch* shall either be fenced to a height of three feet or be securely covered and similar measures shall be taken, when necessary to protect all other openings in a deck which might be dangerous to the workers.

Provided that this requirement shall not apply (i) to vessels not exceeding 200 tons net registered tonnage which have only one *hatchway*, and (ii) to any vessels during meal times or other short interruptions of work during the period of employment.

(2) *Hatch* coverings shall not be used in the construction of deck or cargo stages, or for any other purpose which may expose them to damage.

(3) *Hatch* coverings shall be replaced on the hatches in the positions indicated by the markings made thereon in pursuance of Regulation 21.

Nothing in this Regulation shall apply to breaking out or making up slings.

SCHEDULE II—MANNER OF TEST AND EXAMINATION BEFORE TAKING LIFTING MACHINERY AND GEAR INTO USE

REGULATIONS 27 (1), 29 (1) AND 30 (1).—(a) Every winch with the whole of the gear accessory thereto (including derricks, goose necks, eye plates, eye-bolts or other attachments) shall be tested with a proof load which shall exceed the safe working load as follows:—

Upto 20 tons	25 per cent. in excess.
20—50 tons	5 tons in excess.
Over 50 tons	10 per cent. in excess.

The proof load shall be applied either (i) by hoisting movable weights or (ii) by means of a spring or hydraulic balance or similar appliance, with the derrick, at an angle to the horizontal which shall be stated in the certificate of the test. In the former case, after the movable weights have been hoisted, the derrick shall be swung as far as possible in both directions. In the latter case, the proof load shall be applied with the derrick swung as far as practicable first in one direction and then in the other.

(b) Every crane and other hoisting machine with its necessary gear shall be tested with a proof load which shall exceed the safe working load as follows:—

<i>Safe working load</i>	<i>Proof load</i>
Upto 20 tons	25 per cent. in excess.
20—50 tons	5 tons in excess.
Over 50 tons	10 per cent. in excess.

The said proof load shall be hoisted and swung as far as possible in both directions. In the case of a jib-crane if the jib has a variable radius, it shall be tested with a proof load as defined above at the maximum and minimum radii of the jib. In the case of hydraulic cranes or hoists, where, owing to the limitation of pressure, it is impossible to hoist a load 25 per cent. in excess of the safe working load, it shall be sufficient to hoist the greatest possible load.

(c) Every article of loose gear (whether it is accessory to a machine or not) shall be tested with a proof load at least equal to that shown against the article in the following table:—

<i>Article of Gear</i>	<i>Proof load</i>
Pitched chains used with hand operated Pulley Blocks and Rings, Hooks, Shackles or Swivels permanently attached thereto.	One and a half times the safe working load.
Other Chains Other Rings Other Hooks Other Shackles Other Swivels	Twice the safe working load.
Hand operated Pulley Blocks used with pitched chains and Rings, Hooks, Shackles or Swivels permanently attached thereto.	One and a half times the safe working load.
Other Pulley Blocks— Single Sheave Block	Four times the safe working load.
Multiple Sheave Block with safe working load up to and including 20 tons.	Twice the safe working load.
Multiple Sheave Block with safe working load over 20 tons up to and including 40 tons.	Twenty tons in excess of the safe working load.
Multiple Sheave Block with the safe working load over 40 tons.	One and a half times the safe working load.

Provided that where an Inspector is of opinion that, owing to the size, design, construction, material or use of any such loose gear or class of such gear, any of the above requirements are not necessary for the protection of workers, he may by certificate in writing (which he may in his discretion revoke), and subject to confirmation by the Central Government exempt such gear or class of gear from such requirement, subject to such conditions as may be stated in the certificate.

(d) After being tested as aforesaid, all machines with the whole of the gear accessory thereto and all loose gear shall be examined, the sheaves and the pins of the pulley block being removed for the purpose, to see that no part is injured or permanently deformed by the test.

(e) In the case of wire rope a sample shall be tested to destruction and the safe working load shall not exceed one-fifth of the breaking load of the sample tested.

DOCK WORKERS (REGULATION OF EMPLOYMENT) ACT, 1948 (IX OF 1948)

Statement of Objects and Reasons.¹

The demand for dock labour is intermittent depending on the arrival and departure of vessels, the size and nature of their cargo as well as seasonal and cyclical fluctuations. In the ports, therefore, there is usually labour in excess of minimum requirements and the general tendency on the part of employers is to ensure larger reserves than necessary in order to provide ample margin against emergencies. The main problem connected with dock labour is to devise measures so as to reduce the hardship due to unemployment or under-employment to the utmost extent possible. The Royal Commission on Labour recommended as far back as 1931 that a policy of decasualisation should be adopted "with a view to regulate the number of dock labourers in accordance with requirements and to ensure that the distribution of employment depends not on the caprice of intermediaries, but on a system which as far as possible gives all efficient men an equal share." Government had accepted the recommendation and efforts were made to induce Port Trusts to formulate necessary schemes of decasualisation. The voluntary attempt was not, however,

¹ Gazette of India, 1947, Part V, page 432.

a success and a scheme for compulsory registration was formulated in 1939 but was not proceeded with due to the outbreak of war.

2. Although the operation of certain measures introduced during the war, such as rationing and organised distribution of food supplies, facilitated the registration of labour at major ports, the problem, in the main, has remained unsolved. It is now proposed to undertake legislation giving power to the Central Government in respect of major ports and to the Provincial Governments in respect of other ports, to frame a scheme for the registration of dock workers with a view to securing regularity of employment and for regulating the employment of dock workers whether registered or not, in a port. In particular, the scheme may provide *inter alia* for the terms and conditions of employment of workers whether registered or not, including rates of remuneration, hours of work and conditions as to paid holidays. It may also provide for payment to registered workers of minimum pay for days on which work may not be available to them and for their training and welfare.

3. Provision is also made in the Bill for the constitution of an Advisory Committee consisting of not more than 15 members representing the Government, the dock workers and the employers of dock workers in equal proportion. In the framing and administration of the schemes the appropriate Government will take the advice of this Committee.

DOCK WORKERS (REGULATION OF EMPLOYMENT) AMENDMENT ACT, 1949 (XXIX OF 1949)

Statement of Objects and Reasons.²

A scheme made by the appropriate Government under the Dock Workers (Regulation of Employment) Act, 1948, may *inter alia*, provide, "for constituting or prescribing the authority to be responsible for the administration of the scheme." The constituted authority in the discharge of its functions may have to borrow or raise money and issue debentures, etc., for the purpose of securing any debt or mortgaging or charging any of its property and it is therefore desirable that the authority should be clothed with a corporate status in certain cases. As the Act does not in express terms confer power to create a Corporation or to give corporate status to any body functioning under it, a specific amendment of the Act is being undertaken for this purpose.

When a registered dock worker is so returned to the Reserve Pool, his record book or wage card shall be returned to the Administrative Body.

(3) The Special Officer shall consider any written report received under paragraph (1) or (2) and if, after investigating the matter, he notifies the registered dock worker and the Administrative Body that he is satisfied that the registered dock worker has failed to comply with a lawful order as aforesaid, the registered dock worker shall not be entitled to any payment, or to such part of any payment under clause 34 as the Special Officer thinks fit in respect of the wage period in which such failure occurred or continues.

- (e) is to be given a notice of termination of his employment in accordance with paragraph (1) (b) of clause 37:

he may, within fourteen clear days of the date of the order or, as the case may be, of the date of the receipt of the notice terminating his employment, prefer an appeal in writing to the Appeal Tribunal:

Provided that the Appeal Tribunal may, for reasons to be recorded, admit an appeal preferred after the expiry of fourteen days:

Provided further that no such appeal shall lie where due notice has been given of the removal of the name of the registered dock worker from the register or record in accordance with the instructions of the Board, if the ground of removal is that the registered dock worker falls within a class or description of dock workers whose names are to be removed from the register or record in order to reduce the size thereof:

Provided further, that an appeal shall lie where the registered dock worker alleges that he does not belong to the class or description of dock workers referred to in the preceding proviso.

(2) The Appeal Tribunal shall, as soon as practicable, hear and decide the appeal, and if the appeal is allowed, it shall have power to order that the appellant shall be entitled to receive any payment or any part thereof which may be held to be due to him under clause 34 or that he shall be grouped in accordance with the decision of the Tribunal from such date as it may fix or that his name shall be restored in the register or record as from such date as it may fix. The Appeal Tribunal shall also have the power to vary, modify or alter the penalty imposed but it shall not have power to increase any penalty imposed or to impose a more severe penalty.

(3) An appellant shall not be entitled to be represented by a legal practitioner before the Appeal Tribunal, but he shall be entitled to be represented by a representative of the registered trade union of which he is a member or by a registered dock worker.

40. Suspension of notice in case of certain appeals.—Where an appeal is lodged in accordance with the provisions of clause 38, the Appeal Tribunal may suspend the operation of the order appealed from (except where the order is of dismissal or of disentitlement under clause 35) pending the hearing and disposal of the appeal.

40-A. Special provisions for action in an emergency.—(1) If at any time the Chairman of the Board is satisfied that an emergency has arisen which will seriously affect the working of the port, he may, by order in writing and for such period as he may from time to time specify therein, make a declaration to that effect:

Provided that no such declaration shall be made except with the previous approval of the Central Government.

(2) So long as an order under sub-clause (1) is in force, the following provisions shall apply, namely:—

(b) at the same time as the payment under sub-paragraph (a), such amount whether by way of percentage on the gross wages shown as due to monthly workers in the return made under clause 30 (5) or as otherwise agreed; as the Board may in either case from time to time notify by public notice.

(2) In determining what payments are to be made by registered employers under paragraph (1) of this clause, the Board may fix different percentages for different categories of work or workers, provided that the percentages shall be so fixed that the like percentages will apply to all dock employers who are in like circumstances.

(3) The Board shall not sanction any levy exceeding fifty per cent. of gross wages without the prior approval of the Central Government.

(4) A registered employer shall on demand make a payment to the Board by way of deposit, or provide such other security for the purposes of the payment of the gross wages set out in clause 30(6) and the percentage payments set out in paragraphs (1) (a) and (b) of this clause, as the Board may consider necessary.

(5) The Administrative Body shall furnish from time to time to the Board all such statistical and other information as may reasonably be required relating to the operation and finance of the Scheme.

INDIAN PORTS (AMENDMENT) ACT, 1922 (XV OF 1922)

Statement of Objects and Reasons¹

The General Conference of the International Labour Organisation of the League of Nations convened at Washington on the 29th October, 1919, adopted a Draft Convention concerning the minimum age for admission of children to industrial employment. Article 6(c) of the Convention prohibits, *inter alia*, the employment of children under twelve years of age in handling of goods in docks, quays and wharves, but excluding transport by hand. On the recommendation of the Legislative Assembly and the Council of States, the Governor-General in Council has ratified the whole of the Convention and the Government of India are now under an obligation to make the provisions of the Article 6(c) effective. The object of the present Bill is to fulfil this obligation so far as the employment of children in the handling of goods in docks, quays and wharves is concerned.

INDIAN PORTS (AMENDMENT) ACT, 1931 (XI OF 1931)

Statement of Objects and Reasons²

It is doubtful whether section 6 of the Indian Ports Act, 1908, as at present worded, empowers the Local Government to frame rules prohibiting the employment of children in the handling of goods on the waterside of vessels in ports, although it seems clear that the intention of the Legislature was to prohibit child labour throughout the limits of ports. The object of this Bill is to resolve this doubt by providing against the employment of children under the age of twelve years in the handling of goods anywhere within the ports to which the Act applies.

MARKING OF HEAVY PACKAGES ACT, 1951 (XXXIX OF 1951)

Statement of Objects and Reasons¹

The Convention concerning the Marking of the Weight on Heavy Packages transported by vessels adopted by the International Labour Conference in 1929 has been ratified by India. The Convention requires that any package or object of one thousand kilogrammes (one metric ton) or more gross weight consigned within the territory of any Member country for transport by sea or inland water-way should have its gross weight plainly and durably marked upon it on the outside before it is loaded on a ship or vessel. This will prevent heavy unmarked packages from being lifted by mechanical means which are intended for smaller loads. The purpose of the Bill is to give effect to the Convention in India.

7. **Marking of approximate weight in certain circumstances.**—Where at the place from where a heavy package is consigned there are no means available for determining the correct weight of the package, the anticipated minimum and maximum weight of the package in metric tons, kilogrammes, standard pounds or standard maunds shall be marked thereon in the manner herein before specified.

ROAD TRANSPORT LABOUR LEGISLATION

Motor Transport Labour

Motor transport workers form majority of road transport labour in India. The principle of statutory regulation of conditions of work of motor transport workers came under the consideration of the Royal Commission on Labour in India but the Commission came to the conclusion that the regulation of hours of work of motor bus workers in the cities as well as in the countries would be very difficult. After consultation with the Provincial Governments and Transport Advisory Council, the Government of India introduced a Bill on the 18th March, 1938 to consolidate and amend the law relating to the motor vehicles.

Motor Vehicles Act, 1939 (IV of 1939)

The Motor Vehicles Act, 1939 (IV of 1939) regulates the minimum age of employment, hours of work and rest periods of motor drivers. The Act prohibits the employment of any person under 18 years of age as a driver of motor vehicle and any person under 20 years as a driver of a transport vehicle, except in the employment of Central Government in which case the minimum age is 18 years. The Act limits the hours of work of drivers in the case of transport vehicles to 9 in a day and 54 in a week and provides for a rest period of at least half an hour after 5 hours of continuous work.

Framing of Rules by State Governments

The State Government is empowered by rules made under the Act to grant such exemption as it thinks fit to meet cases of emergency or of delays by reason of circumstances which could not be foreseen. The State Government or the Regional Transport Authority is also authorised under the rules to require the employer to fix beforehand the hours of work of drivers and to record the hours so fixed. The State Government may prescribe the circumstances under which and the period during which the driver although not engaged in work but required to remain in or near the vehicles may be deemed to be an interval of rest.

Payment of Wages Act extended to Motor Transport Workers

The provisions of the Payment of Wages Act, 1936 have been applied to motor omnibus services in the States of Assam, Bihar, West Bengal, Madras, Coorg,

Delhi and Punjab, to Government transport concerns and private transport companies in Punjab, motor goods transport services in Delhi and to motor vehicles plying under stage carriage permits and public carriers permits in Orissa.

Central Government's Five-Year Labour Programme

In the Five Year Labour Programme drawn by the then Labour Department of the Government of India in September, 1946, there was a proposal to enact Central legislation for regulating the conditions of work in road transport and other services, viz., tramways and motor vehicles plying for passenger or goods traffic. No legislation has yet been undertaken by the Central Government to regulate the working conditions of road transport workers.

Planning Commission's First Five Year Plan & Draft Second Five Year Plan

The Planning Commission in the First Five Year Plan¹ recommended the enactment of Central legislation for regulating the conditions of work in motor transport services. The Central Government has not yet undertaken the proposed legislation. The Draft Outline of Second Five Year Plan² published in February, 1956 contains a recommendation for enacting Central legislation to regulate conditions of work in transport services.

Regulation of Working Conditions of Motor Transport Workers

Two non-official Bills were introduced in the Lok Sabha in September, 1955 and one unofficial Bill in the Rajya Sabha in March, 1956 for regulating the working conditions of motor transport workers.

Motor Transport Labour Bill, 1955 (Bill No. 41 of 1955)³ was introduced by Sri A. K. Gopalan on the 2nd September, 1955 and the Motor Vehicles (Amend-

² Second Five-Year Plan, Planning Commission—A Draft Outline, February, 1956, Chapter XII—Labour Policy and Programme, page 173.

³ Statement of Objects and Reasons.—In spite of the fact that Road Transport occupies a very important place in the economy and life of our country, there is at present no comprehensive legislation regarding the conditions of labour in this industry.

The present Bill drafted as an All-India measure seeks to regulate the conditions of motor transport workers who form the majority of road transport labour.

Memorandum Regarding Delegated Legislation

Clause 5.—Relates to rest houses. When a bus has to halt for the night or for long period of hours, there should be rest houses for drivers and conductors. At present in most places no such provisions are made and the transport workers are asked to shift for themselves resulting in ruination of their health due to stay under insanitary conditions. Often the required rest is not obtained.

Apart from the point of view of workers' own health, the safety of the passengers also requires rest for the motor transport workers which can be had only if proper rest houses are maintained.

Clause 6.—Relates to recreation facilities. The period of rest which a motor transport worker gets during his journey and the halt before his return can be usefully and beneficially spent if such facilities are provided for.

Clause 7.—Deals with uniform, foot-wear and other like amenities. The rules requiring the employers to provide these amenities may be framed after due consultation with parties concerned, as was done in the case of plantation industry.

Clause 9.—Relates to weekly holidays, which can be brought into force only when rules are framed after proper consultation with all the parties concerned so that the workers get the benefit of one day's rest and regular transport services are not affected thereby.

Clause 19.—Wants compulsory insurance of motor transport workers. There are greater chances of accidents in motor transport. It is necessary, therefore, that all transport work-

ment) Bill, 1955 (Bill No. 44 of 1955)⁴ was introduced on the 16th September, 1955 by Sri T. B. Vithal Rao. The provisions of these two Bills relate to hours of work and limitations of employment, weekly holidays, compensatory days of rest, spread over, night work and wages for night work, leave with wages, accumulation of leave, sickness leave and sickness benefits, provident fund, gratuity, medical facilities, canteens, rest house, reading room and recreational facilities and insurance of motor transport workers by employers.

Another non-official Bill named the Motor Vehicles (Amendment) Bill, 1956 (XI of 1956)⁵ was introduced in the Rajya Sabha on the 9th March, 1956 by Sri S. N. Majumdar, for substituting Section 65 of the Motor Vehicles Act, 1939 on the similar lines as the above two non-official Bills introduced in the Lok Sabha.

International Standards for Road Transport Workers

The International Labour Organisation has adopted Convention No. 67 Hours of Work and Rest Periods (Road Transport) in 1939 prescribing hours of work of professional drivers of transport vehicles at 8 a day and 48 a week including the time spent for work done during the running time of vehicles, time spent in subsidiary work, periods of mere attendance and breaks for rest and interruptions of work.

The International Labour Organisation has also adopted three Recommendations, No. 64 Night Work (Road Transport), 65 Methods of Regulating Hours (Road Transport) and 66 Rest Periods (Private Chauffeurs) in 1939. The Recommendations authorise the competent authorities in each country to determine the classes of transport for which night work will be authorised and to suggest methods for regulating the working hours of transport drivers and to grant minimum daily and weekly periods of rest to drivers of private vehicles.

Central Legislation for Transport Workers

According to 1951 census road transport provided employment to about 900,000 persons. With the general expansion in economic and trade activities during the First Five Year Plan, this number must have increased considerably. A large-scale expansion of production in automobile and other industries and the proposed increase in the mileage of national and State highways and roads envisaged under the Second Five Year Plan would lead to a further increase in the number of road transport workers. In view of the above, the question of improvement of the conditions of work of motor transport workers, requires urgent consideration.

ers are insured. The rules for the same relating to premium, periods of contribution, etc., may be framed after full consultation with all parties concerned.

Parties concerned means, representatives of the Central Government, State Governments, private employers and workers' representatives including—representatives of All-India Federation and unions, if any.

These proposals, though of a normal character, are found necessary because only after full consultations with parties concerned, can they be effectively implemented. The delegation of powers to the Central Government is made because of necessity for uniformity in the rules relating to the above provisions. (Gazette of India Extraordinary, 1955, Part II—Section 2, page 341.)

⁴ Statement of Objects and Reasons.—In spite of the fact that Road Transport occupies a very important place in the economy and life of our country, there is no comprehensive legislation at present regarding the conditions of labour in this industry.

The Amendments suggested in the Bill, if incorporated in the Motor Vehicles Act, 1939, will regulate the conditions of motor transport workers who form the majority of road transport labour in India. (Gazette of India Extraordinary, 1955, Part II—Section 2, p. 363.)

⁵ For Statement of Objects and Reasons, see Gazette of India, 1956, Part II—Section 2, page 86.

The question of enacting a Central legislation for transport workers was discussed in the 15th Session of the Standing Labour Committee held at Delhi on the 4th and 5th April, 1956 with the Union Minister of Labour in the Chair. In a Memorandum,⁶ the Central Ministry of Labour states that while it may not be practicable at this stage to introduce any general legislation to cover all road transport workers, it would seem appropriate to make a beginning with legislation for workers employed in public motor transport. As certain aspects of their conditions of employment are already covered under the existing laws, the proposed legislation is unlikely to impose any undue burden on the employers.

There was a general agreement that there should be a separate Central legislation for motor transport workers covering their conditions of work and welfare on the analogy of similar enactments for workers in factories, mines and plantations. It was decided that the draft legislation prepared by the Central Government would be considered by an *ad hoc* Committee.

Road Transport Corporations Act, 1950 (LXIV of 1950)

The Central Government enacted the above legislation to enable the State Governments to set up Transport Corporations with the object of providing efficient, adequate, economical and properly co-ordinated system of road transport services.

Under the Act, the State Government is authorised to constitute Road Transport Corporation and the Corporation has to provide for its employees, conditions of service including fair wages, establishment of provident fund, living accommodation, places for rest and recreation and other amenities. The Corporation can also take steps for the purpose of advancing the skill of the persons employed therein. The Corporation has power to make regulations for providing the conditions of appointment and service and the scales of pay of officers and servants of the Corporation other than Chief Executive Officer or General Manager and the Chief Accounts Officer.

ROAD TRANSPORT CORPORATIONS ACT, 1950 (LXIV OF 1950)

Statement of Objects and Reasons¹

The Road Transport Corporations Act, 1948 (XXXII of 1948) was enacted with a view to enable the Provincial Governments, who may so desire, to establish Road Transport Corporations. This Act has been found defective because the provisions of sections 3(2), 4 and 5 of the Act, in so far as they require certain provisions to be made by a Provincial law, are *ultra vires* of the Government of India Act, 1935, as adapted. Under the latter Act, the power to legislate in respect of trade and commerce is given to the Provincial Legislatures and the power to legislate for the incorporation of trading corporations is given to the Central Legislature. The creation of statutory transport corporations has been held as amounting to incorporation of trading corporations, and, as such, *ultra vires* of the Provincial Legislature. In order to remove the above-mentioned legal flaw, it is proposed to replace the existing Act, by a comprehensive Act, enabling such of the Provincial Governments, who may so desire, to set up transport corporations, with the object of providing efficient, adequate, economical and properly co-ordinated system of road transport services.

The Indian Aircraft Act of 1934 was amended in March, 1944 by Act V of 1944 for licensing of air transport undertakings and prohibition of all operations of air transport without a licence. The Indian Aircraft Rules of 1937 were also amended by inserting the provisions for licensing of air transport services. The Rule framed for such purpose, provides that after the 1st October, 1946, no air transport service shall be established or shall operate in India except under the authority of, and in accordance with, a licence issued by the Air Transport

Licensing Board set up for the purpose. The constitution and functions of the Board were framed. Another Rule provides for submission of monthly operational return and annual financial return by the operating companies to the Board.

Air Transport Inquiry Committee

The Government of India in the Ministry of Communication adopted a Resolution on the 8th February, 1950 noting with concern that the air transport industry had not found stability and suggesting that the operation of air transport services should be placed on a firm economic footing. The Government, therefore, set up the Air Transport Inquiry Committee with Mr. Justice G. S. Rajadhyakha of Bombay High Court as Chairman and two other members to enquire into and report upon and make recommendations in regard to the following matters, *viz*:—“(a) the present state of the air transport industry in India in regard to both internal and external services; (b) the short-coming, if any, in the organisation and management of the industry as a whole or in regard to any individual company or companies; (c) the major difficulties and defects in the industry as at present constituted; (d) the manner in which Indian air services, internal and external, could best be operated with the maximum economy having due regard to all relevant factors, including passenger fares and freight and mail rates during the five years 1950-54, providing also for adequate development of the air services and for such purpose,—(1) the reasonable needs of the industry of assistance from the State and the manner and extent of such assistance and cost thereof to the State, (2) regulation of the industry and control over its management by the State, (3) any necessary re-organisation of the industry, and (e) the desirability, practicability and economic consequences of the operation of the said air services under State ownership and management, either direct or through a body corporate, and the cost of acquisition of such ownership”.

Committee's Conclusions & Recommendations

The Report of the Committee was signed on the 15th September, 1950. The Committee has made several recommendations about the reasonable cost of operation for reorganisation of air transport industry in the matter of composition of crew, flight crew salaries, emoluments of crew, reasonable flight crew utilisation, hourly operating cost dependant upon skill and efficiency of management, etc. The Committee has noted that crew utilisation in some case was as high as 130—140 hours flying in a month and has recommended that the flying hours of pilots should be limited to 1000 hours per year, following the practice in U.S.A. and Australia even though the International Civil Aviation Organisation has not prescribed any limitation to maximum flying hours for crew members. Prescription of limits in regard to flight crew utilisation is essential from the point of view of pilot's fatigue. The Committee has considered the question of the practicability of reducing costs in India by adopting the American and Australian systems of flight crew of the captain and co-pilot in place of the standard Indian flight crew of captain, co-pilot and radio operator, but has recommended that the situation be kept under review with the object of introducing a two-man flight crew as soon as practicable consistently with the highest standards of safety.

The Committee has recommended that the Government should follow the principle of financial and other assistance to air transport industry at some stage or other. The task of meeting reasonable needs of the industry for the future should be entrusted to the Air Transport Licensing Board which should be reconstituted and the Board's office should be distinct from the Civil Aviation Directorate. The Committee has recommended that the Training Programme of the Director General of Civil Aviation should be reviewed after carefully assessing the needs of the industry and the available supply during the next five years.

The Committee has recommended that the employees of air transport companies should, for the purpose of industrial disputes regarding terms and conditions of service, pay and allowances etc., be treated as falling within the union sphere, in order to secure basic uniformity in their wages and salary structure.

Though under the Industrial Policy Resolution dated the 6th April, 1948, the development of air transport industry was left to private enterprise under Governmental planning and regulation, the Committee has come to the conclusion that there is a good case for the air transport services being owned and operated by the State. The Committee has suggested that the operations of the air transport services, on State ownership, should be entrusted to a statutory Corporation and the Chairman should be an outstanding businessman with administrative ability and experience. The Corporation should be given complete autonomy from Departmental control except following the main policies as laid down by the Government and the Corporation should work on purely commercial lines.

Planning Commission on Civil Aviation

The First Five Year Plan of the Planning Commission has recommended the merger of the existing air transport companies into a single agency in charge of all scheduled air transport operations and has further recommended that the Government should have a controlling interest in the proposed new Corporation.

Air Corporations Act, 1953 (XXVII of 1953)

The Government of India examined the recommendations of the Planning Commission and decided to acquire the undertakings of all the existing air transport companies and to establish two statutory Corporations, one for international air services and the other for domestic air services. The Government introduced the Air Corporations Bill in the House of the People on the 21st March, 1953. The Air Corporations Act 1953 (XXVII of 1953) establishes two Corporations to be known as "the Indian Airlines Corporation" and "the Air India International Corporation" to provide safe, efficient, adequate, economical and properly co-ordinated air transport services, internal or international or both and to facilitate the acquisition of undertakings belonging to certain existing air companies by the two Air Corporations. The Corporations should act on business principles.

Officers & Employees of the existing Air Companies

The Act provides that all employees of the existing air transport companies excepting a director, manager, managing agent or any other person entitled to manage the whole or a substantial part of the business and affairs of the company, employed by such companies immediately prior to 1st day of July, 1952 shall be employees of the newly formed Corporations, without affecting their terms and conditions of service.

Central Government's Rule-making Powers

The Act authorises the Central Government to give directions to either of the Corporations as to the exercise and performance by the Corporation of its functions and the Corporation shall be bound to give effect to any such directions. The Act authorises the Central Government to make rules regarding the terms and conditions of service of the general managers of the two Corporations and such other categories of officers as may be specified from time to time and also for training of the employees of either of the Corporations or other persons and the amount of fees to be charged from them.

Advisory and Labour Relations Committees

The Act provides for appointment of Advisory Committee by the Central Government in consultation with the Corporation concerned for the purpose of

advising the Corporation in respect of matters referred to it and the constitution of a Labour Relations Committee by each Corporation consisting of equal number of representatives of the Corporation and its employees for the purpose of advising the Corporation on matters relating to the welfare of the employees or which are likely to promote and secure amity and good relations between the two.

Corporations' Power to make Regulations

The Act authorises the Corporations, with the previous approval of the Central Government, to make regulations for carrying out their functions. Such regulations may provide for the terms and conditions of service of officers and other employees of the Corporation other than the general manager and other officers and for issue of passes by the Corporation to its officers and other employees, free of cost or at concessional rate.

Air Corporations Rules, 1954

The Central Government framed the Air Corporations Rules on the 26th November, 1954 providing for particulars of the annual report to be submitted by the Corporation to the Central Government. The Rules also provide for training of operational staff and courses for theoretical and practical training, selection of candidates, levy of fees, payment of stipends and allowances during training.

The Rules also provide for constitution of Labour Relations Committee by each of the Corporations consisting of an equal number of representatives of not less than six and not more than twelve, of the Corporation and its employees. The Labour Relations Committee is to advise the Corporations on all matters relating to the welfare of the employees or which are likely to promote and secure amity and good relations between the two. In the case of difference of opinion between the Corporation and the Committee, the opinion of the Corporation shall prevail. The tenure of the office of a member of the Committee shall be two years and the officers of the Committee shall include a Chairman and a Secretary. The Chairman of the first Labour Relations Committee shall be the Chairman of the Corporation or a member of the Committee appointed by the Chairman. Thereafter the Corporation shall elect a representative of the Corporation or a representative of the employees to be the Chairman in alternate years. The Secretary shall be elected by the Committee for a period of one year from amongst the representatives of the Corporation or its employees so that if, for any term, the Chairman is a representative of the Corporation, the Secretary for that term shall be a representative of the employees and *vice-versa*. The functions of the Committee shall be purely advisory and the Corporation may or may not accept the advice tendered to it by the Committee.

Indian Airlines Corporation Services Committee

The Indian Airlines Corporation at their second meeting held on the 7th August, 1953 set up a Services Committee with Shri W. R. Puranik, Retired Judge of Nagpur High Court as Chairman, Shri S. B. Bapat, I.C.S., Joint Secretary, Ministry of Home Affairs as Member and Sri G. P. Shahani, Secretary of the Air Transport Licensing Board as Secretary "to make recommendations on (i) rationalisation of pay scales for different categories of personnel and formulation of a suitable wage-structure; (ii) the procedure to be followed in bringing existing personnel on the approved new pay scales; (iii) the principles to be followed for determining seniority as between personnel of same category belonging to different companies doing more or less similar duties; and (iv) formulation of common service conditions in the matter of leave, holidays, travelling allowance rules, insurance facilities, bonus, allowances, provident fund, gratuity, pension schemes, residential accommodation, etc., etc."

The Services Committee took into account as far as possible (a) the previous practice in the several companies before nationalisation; (b) present practice in private industry; (c) present practice in governmental and semi-governmental organisations; and (d) the views placed by different individuals and groups on behalf of the employees and the Corporation.

The Committee recognised the general principle that remuneration should be commensurate with the nature and importance of the work done but felt that the Corporation should take a middle course between the lowest figure below which the employee's basic wage cannot be allowed to fall and the highest figure above which it should not be allowed to rise. The Committee accepted certain principles to find out a rational wage structure and the recommended wage structure in 19 general salary ranges, was based on a balanced application of the said principles.

The Committee made recommendations regarding (1) dearness allowance, (2) place allowance, (3) house rent allowance, (4) overtime allowance, (5) transport or conveyance allowance, (6) charge allowance, (7) entertainment allowance, (8) refreshment (emergency duty) allowance, (9) washing allowance, (10) travelling allowance for rail journey, (11) mileage allowance for duty journey by road, (12) daily allowance on tour, (13) travelling and out-station allowances on temporary transfer, (14) allowance on permanent transfer, (15) command pay, (16) efficiency bonus, overtime allowance and other allowances for flying crew, etc.

The Committee's recommendations regarding service conditions were classified under (1) recruitment, (2) probation, (3) promotion, (4) retrenchment, (5) superannuation, (6) tenure, (7) increments, (8) retirement benefits—pension, contributory provident fund, non-contributory provident fund, gratuity, (9) leave—(a) privilege leave, (b) casual leave, (c) sick leave, (d) accident or disability leave, (e) extraordinary leave without pay, (10) other types of leave—(a) quarantine leave, (b) maternity leave, (c) study leave, (11) holidays—(a) weekly holidays, (b) festival holidays, (12) compensation, (13) free and concessional air passages, (14) medical facilities, (15) housing, (16) bonus, (17) discipline, (18) rules of conduct, (19) punishment and procedure, (20) suspension, (21) appeal, (22) revision, (23) training, (24) canteens, (25) co-operative multi-purpose societies, (26) sports and physical culture, (27) library and reading room, etc.

The Committee suggested that the Labour Relations Committee should be the proper body to recommend appropriate machinery for handling complaints and grievances of the employees and should assist in framing rules for prevention and settlement of disputes and for stoppage and shut-down of work. The Committee further suggested that the Corporation should utilise the machinery of the Labour Relations Committee for mutual understanding and co-operation between the employees and the management.

Indian Airlines Corporation Employees Service Regulations, 1955

The Services Committee's suggestions and recommendations were duly considered by the Indian Airlines Corporation and regulations regarding service conditions of (1) Flying Crews, (2) Aircraft Engineering Department and (3) Employees other than Flying Crews and Aircraft Engineering Department were framed, after approval of the Central Government and came into force from 1st January, 1955. The Employees Service Regulations have been published in the Gazette of India under a notification dated the 6th April, 1955 and are set out under the following headings—(1) general, (2) definitions, (3) recruitment and appointment, (4) promotion and seniority, (5) service records, (6) pay and allowances, (7) travelling and daily allowances, (8) leave, (9) compensation, (10) medical facilities, (11) uniforms, (12) discipline and appeals, (13) retirement benefits, for all the three categories of employees; and (1) free and concessional air passages and (2) holidays, for the two categories of employees other than Flying Crews.

Employees Conduct Rules & Disciplinary Procedure Regulations, 1955

The Indian Airlines Corporation also framed regulations regarding Rules of Conduct and Disciplinary Procedure with the previous approval of the Central Government and enforced them with effect from the 1st of January, 1955. These Regulations were published in the Gazette of India under a notification dated the 16th April, 1955. Under the regulations an employee is a wholetime servant of the Corporation and he is debarred from engaging in any other business, occupation or accepting any fees, emolument, etc., from any party or permitting any of his relations to accept the same or from taking part in the promotion, registration or management of any commercial undertakings. He is not permitted to speculate in investment and should avoid habitual indebtedness. The term "misconduct" includes acts of omission or commission of 44 items clearly mentioned in the regulations. Under the disciplinary procedure, penalties of different kinds may be imposed upon the employees for good and sufficient cause.

I. L. O. Study on Civil Aviation Workers

The International Labour Organisation has adopted several Conventions and Recommendations regarding conditions of work, industrial safety, protection of health, etc., of different categories of transport labour engaged in railways, docks, sea services and motor transport but no International Standard has so far been prescribed to protect the Civil Aviation Workers.

As the safety of air travel depends much on the number of hours the pilot can fly and as it is reasonable that the civil aviation workers should be provided with the conditions of service comparable with other workers, the Governing Body of the International Labour Organisation has called an *ad-hoc* meeting on Conditions of Employment in Civil Aviation. The Committee will discuss the hours of work of flight personnel after retirement or grounding and review the conditions of employment in civil aviation generally. Though the I. L. O. urged the desirability of a study on the conditions of labour in air transport as early as in 1929, and reiterated the same in 1948, no definite step was taken so long in this respect.

The International Labour Office is collecting informations for the use of the Committee. Many countries have adopted regulations limiting flying hours either at one stretch or in the course of a day and also imposing further restrictions on the number of flying hours in a month, quarter or year, but there is no uniformity in such regulations. There is no criterion to determine after how many hours pilot fatigue sets in. The safety factor is of vital importance to the public travelling by air and in some cases of accidents, it was found that the pilot was on duty for more than 20 hours and therefore the pilot fatigue was to a greater extent, responsible for the accident. Similarly frequent landings and take-offs, flying at lower altitude and in inclement weather, with quick meals and frequent briefings, are also causes of pilot fatigue. Apart from the safety factor, the flight personnel should have scheduled hours of duty and periods of rest like other categories of workers.

A discussion with the employers and workers under the auspices of the International Labour Organisation, will provide valuable suggestions for formulating an international standard for protection of aircraft crews and flight personnel generally.

AIR CORPORATIONS ACT, 1953 (XXVII OF 1953)

Statement of Objects and Reasons¹

The Government for some time past have been considering the question as to the best manner in which the existing air services in India could be co-ordinated and rationalised with a view to improving air transport facilities.

2. This question was examined by the Planning Commission in May, 1952, when it was agreed that under the present conditions of traffic load and intensity of operation, development of the air transport industry on an economic basis could be achieved only if there was a single agency in charge of all scheduled air transport operations.

3. The recommendation of the Planning Commission has been further examined in detail. It is now proposed to acquire the undertakings of all the existing air transport companies and to establish two Corporations, one for the operation of long-distance international air services and the other for domestic air services and for services to neighbouring countries, such as Pakistan, Ceylon, Iran, Afghanistan and Burma. It is proposed that the undertakings of the Air-India International Limited, should be acquired and the relevant air services operated by a Corporation wholly owned and managed by the State but bearing the same name, viz., Air-India International. The undertaking of the other air companies would be acquired by another State Corporation called "Indian Airlines".

4. The two Air Corporations will take over the undertakings of all existing air companies as going concerns and all the personnel of those companies who were employed by them on the 30th June, 1952, would be transferred to the two Corporations and their terms and conditions of service, unless altered by the Corporations, will continue to be the same. Employees appointed bonafide after that date and prior to the date of taking over may also be taken over by the Corporations.

5. The compensation to be paid to existing air companies for the acquisition of their undertakings will be based on the valuation of their assets after making due allowance for all liabilities. The assets will be valued with reference to the cost which each company incurred when it acquired a particular asset and provision for depreciation is made somewhat on the lines of the provisions contained in the Indian Income-tax Act, 1922. There are minor variations with respect to certain items of assets, viz., aircraft, aero-engines, etc. The principles of compensation are detailed in the Schedule appended to the Bill and the amount of compensation in the case of each company is to be settled in agreement with the company on the basis of those principles. In the absence of agreement, the assessment of compensation would be made by a Tribunal for the constitution of which provision is made in the Bill. The Tribunal will consist of three members appointed by the Central Government one of whom will be a Judge of a High Court.

6. For the purpose of ascertaining what liabilities actually vest in the two Corporations, the Bill requires existing air companies to furnish particulars of all their liabilities and obligations within a specified time and incidentally power is given to the two Corporations to challenge before Tribunal any particular transaction involving liability if the transaction had not been entered into in good faith or if it was considered imprudent.

7. Once the undertakings of the existing air companies vest in the two Corporations the operation of scheduled air transport services will become a monopoly of the two Corporations.

8. It shall be the duty of each of the two Corporations to provide safe, efficient, adequate, economical and properly co-ordinated air transport services at reasonable charges both internal and international and the Bill contains adequate provisions for the exercise of suitable control by the Central Government on the activities of the two Corporations, which include power to issue directions.

9. The Bill also makes the provisions for certain incidental matters like the setting up of an Air Transport Council to which may be referred matters of common interest to the two Corporations, and a Labour Relations Committee for promoting and securing amity and good relations between employers and employees.

45. Power of Corporations to make regulations.—(1) Each of the Corporations may, with the previous approval of the Central Government, by notification in the Official Gazette, make regulations not inconsistent with this Act or the rules made thereunder for the administration of the affairs of the Corporation and for carrying out its functions.

CHILD LABOUR LEGISLATION

CHILD LABOUR LEGISLATION

Regulation of Child Labour in India

The regulation of child labour was first undertaken in India in the year 1881 when the first Indian Factories Act was enacted (XV of 1881) and this regulation was subsequently mentioned in connection with labour legislations in specific industries, viz., factories, plantation, mines, ports, shipping, etc. Independent legislation for child labour was enacted for the first time in 1938 when the Employment of Children Act was passed with a view to check the abuses in connection with employment of children in workshops which are outside the scope of factory legislation.

Employment of Children Act, 1938 (XXVI of 1938)

The Royal Commission on Labour has drawn attention to the serious abuses in connection with the employment of children in workshops to which the Factories Act did not apply. The object of the Employment of Children Act, 1938 (XXVI of 1938) was designed solely to fight the evil of child labour in workshops. The Act raises the minimum age of children employed in the handling of goods on railways and at ports, to 15 years. The Act prohibits the employment of children under the age of 15 years in occupations connected with the transport of passengers, goods or mails, by a railway and in occupations involving the handling of goods within the limits of ports. The infringement is punishable with a fine which may extend to Rs. 500. Although the International Labour Conference accepted Revised Convention concerning Minimum Age (Industry) in 1937, fixing 13 years in the case of India as the minimum age for employment of children in the transport of passengers, goods or mails by rail and the handling of goods at docks, the Act fixed the minimum age of children at 15 years.

Employment of Children (Amendment) Act, 1939 (XV of 1939)

The Act was amended in 1939 with a view to raise the minimum age of children employed in the occupations mentioned in the Schedule to 12 years. The Amending Act prescribes that in addition to the provisions of 1938 Act, no child who has not completed his 12th year, shall be employed in any of the scheduled occupations, viz., bidi-making; carpet-weaving; cement manufacture; cloth printing; dyeing and weaving; manufacture of matches, explosives and fire-works; mica cutting and splitting; shellac manufacture; soap manufacture; tanning and wool cleaning.

Factories Act, 1948 (LXIII of 1948)

The minimum age of 12 years under the Amending Act of 1939 was raised to 14 years for admission of children for employment in workshops engaged in the processes mentioned in the Schedule, under section 119 of the Factories Act, 1948 with effect from 1st of April, 1949.

Employment of Children (Amendment) Act, 1951 (XLVIII of 1951)

The Act was again amended in 1951 to give effect to the provisions of I. L. O. Convention No. 90 relating to night work of young persons which has been ratified by India. The Amending Act prohibits employment of children under 15 years in any occupation connected with transport of passengers, goods or mails by railways or within the limits of any port and further prohibits employment of young persons between 15 and 17 years of age during night in railways and ports.

Application

The Act extends to the whole of India except the State of Jammu and Kashmir.

Steps by State Governments

The Act empowers the State Governments to add any description of the processes to the Schedule after giving due notice in the official Gazette. The Governments of Madras and Coorg have prohibited the employment of children as cleaners in workshops attached to motor transport companies. The Government of Uttar Pradesh has added the brassware and glass bangle industries to the Schedule by a notification published in the U. P. Government Gazette dated the 4th September, 1948.

Administration

The Act is administered by the Chief Inspector of Factories in most of the States. The Chief Labour Commissioner (Central) administers the Act in connection with the employment of children in Central undertakings and the Chief Labour Commissioner (Central), Regional Labour Commissioners, Conciliation Officers (Central) and Labour Inspectors (Central) have been notified as Inspectors in respect of railways. The Central Government has appointed the Conciliation Officers (Central) to administer the Act in regard to the ports of Madras, Visakhapatnam, Bombay, Calcutta and Cochin.

Children (Pledging of Labour) Act, 1933 (II of 1933)

Servile labour was not confined to adults alone and parents or guardians used to secure loans or advances on pledging the labour of their children. The Royal Commission on Labour found evidence of such practices in several industrial centres. The Commission condemned the system of mortgaging the labour of children and recommended the expediency of penalising the giving of advances to secure the labour of children and the execution of bond pledging the labour of persons under 15 years on account of consideration to be void.

The Children (Pledging of Labour) Act, 1933 (II of 1933) is designed to stop the malpractice of pledging the labour of young children by their parents to the employer in lieu of a loan or advance. The Act declares void an agreement, written or oral, to pledge the labour of a child below 15 years by the child's parent or guardian in return for any payment or benefit. However, an agreement made without detriment to a child and not made in consideration of any benefit other than reasonable wages to be paid for the child's services and terminable at not more than a week's notice is not to be deemed to be an illegal agreement. A person who knowingly enters into an agreement with a parent or an employer who knowingly employs a child is liable to a fine up to Rs. 200/-. A parent who knowingly pledges the labour of his child is liable to punishment with a fine not exceeding Rs. 50/-.

The Act is practically a dead letter as nothing is done to enforce it. The pledging of child's labour continues to be as prevalent and passes as unnoticed as before the enactment of this legislation. The Labour Investigation Committee found such cases in bidi workshops in Madras City, Vellore and in Mysore¹. It is reported to be in existence in some of the bidi factories in Hyderabad and Bangalore².

Constitutional & Statutory Protection to Child Labour in India

We find that legislative measures have been adopted in India for protection of children and young persons against exploitation under the Factories Act, 1948,

The Directive Principles of the State Policy embodied in Article 39 of the Constitution of India has reaffirmed the policy of protection of children against exploitation. Under Article 45 of the Constitution, the State shall endeavour to provide for free and compulsory education for all children until they complete 14 years within a period of 10 years from the commencement of the Constitution, *viz.* from 26th of January, 1950. Article 24 of the Constitution prohibits employment of children below 14 years in any factory, or mine or any other hazardous employment, this being guaranteed under the Fundamental Rights.

International Protection to Child Labour³

The International Labour Conference adopted 14 Conventions and 8 Recommendations relating to children and young persons since its inception in 1919, out of which India has ratified 4 Conventions. The Asian Regional Conference of the I.L.O. is also considering measures for the protection of young workers in Asian countries.

"In adopting the above Conventions and Recommendations, the Conference has directed attention to the fixing of the minimum age of admission to employment of all types raising it progressively to high age level. It has sought to restrict the labour of young persons in occupations that are deemed to be dangerous or prejudicial to their physical, mental or moral development. It has promoted the restriction of night work and provision for rest".⁴ Eight Conventions and two Recommendations fix the minimum age for admission to employment in various occupations. Three Conventions and one Recommendation relate to the medical examination of young persons to determine their fitness for employment. Three Conventions and two Recommendations concern night work of young persons. Other Recommendations relate to vocational training and apprenticeship for preparing the young people for employment. Besides these Conventions dealing exclusively with young people, there are many Conventions containing special provisions regarding young people covering hours of work, weekly rest, annual paid holidays, industrial health, safety, etc.

Apprentices Act, 1850 (XIX of 1850)

The Act provides that a child between 10 and 14 years of age may be bound apprentice by his father or guardian to learn any fit trade, craft or employment for a term not exceeding seven years so that it be not prolonged beyond the time when such child shall be of the full age of twenty one years, or in the case of a female, beyond the time of her marriage. Every contract of apprenticeship shall be in writing setting forth the conditions agreed upon, particularly specifying the age of the apprentice, the term for which he is bound and what he is to be taught. The contract shall be signed by the person to whom the apprentice is bound and by the apprentice if he is of 14 years or more and shall be deposited in the office of the Chief Magistrate of the place or the district.

The master or his agent has power to chastise the apprentice for misbehaviour. If the master or his agent neglects to provide for the apprentice or to teach him according to contract or is guilty of cruelty or other ill-treatment, the Magistrate may summon him and cancel the contract and impose a fine.

EMPLOYMENT OF CHILDREN ACT, 1938 (XXVI OF 1938)

Statement of Object and Reasons¹

The Twenty-third Session of the International Labour Conference adopted a Convention in which a special Article for India was inserted, fixing the minimum age at which children may be employed or may work in the transport of passengers, goods or mails by rail, or in the handling of goods at docks, wharves or quays at 13 years. This Bill provides for prohibiting the employment of children under 15 in occupations connected with the transport of goods, passengers or mails on railway, and for raising the minimum age for handling goods in docks from 12, the age fixed by section 6 (1-A) of the Indian Ports Act, 1908, to 14, the age recommended by the Royal Commission on Labour. A simple procedure enabling employers to safeguard themselves against transgressions of the Act by furnishing themselves with, or requiring candidates for employment to possess, certificates of age, is provided in the Bill.

EMPLOYMENT OF CHILDREN (AMENDMENT) ACT, 1951 (XLVIII OF 1951)

Statement of Object and Reasons²

The International Labour Conference at its 31st Session held in 1948 adopted a Convention (No. 90) concerning night work of young persons employed in industry. This Convention, in its application to India, prohibits the employment of young persons during the night in factories, mines, railways and ports. The basic provision in the Convention is that young persons between 15 and 17 years of age should not be employed for a period of at least 12 consecutive hours including an interval of at least seven consecutive hours between 10 P.M. and 7 A.M.

India has ratified the Convention which will come into force in June, 1951. Necessary action to enforce the provisions of the Convention in mines and factories by amending the relevant laws is being taken separately. The only national law regulating the employment of children in railways and ports is the Employment of Children Act, 1938, and the present Bill amends that Act so as to give effect to the provisions of the Convention in respect of railways and ports. This opportunity is also taken to amend the Act with a view to completely prohibit the employment of children below 15 years of age in any occupation in port areas.

CHILDREN (PLEDGING OF LABOUR) ACT, 1933 (II OF 1933)

Statement of Objects and Reasons¹

The Royal Commission on Labour found evidence in such widely separated areas as Amritsar, Ahmedabad and Madras of the practice of pledging child labour—that is, the taking of advances by parents or guardians on agreements, written or oral, pledging the labour of their children. In some cases, the children so pledged were subjected to particularly unsatisfactory working conditions. The Commission considered that the State would be justified in adopting strong measures to eradicate the evil and the Bill seeks to do so by imposing penalties on parties to agreements pledging the labour of children and on persons knowingly employing children whose labour has been pledged.

WAGES LEGISLATION

WAGES LEGISLATION

Regulation and Protection of Wages

Several legislative measures have been undertaken by the Central Government for the protection of wages of industrial labour, attachment of their wages and imprisonment for debt since the publication of the recommendations of the Royal Commission on Labour in India in 1931.

A very important branch of labour legislation is the protection of wages of industrial labour. The protection of wages have been brought about by means of several legislative measures, both by the Central Government and some of the State Governments and these measures may be classified under the following heads:—

(1) Payment of Wages—Payment of Wages Act, 1936, (2) Attachment of Wages—Code of Civil Procedure (Second Amendment) Act, 1937, (3) Imprisonment for Debt—Code of Civil Procedure (Amendment) Act, 1936 and Punjab Relief to Indebtedness Act, 1934, (4) Prohibition of Intimidation—Bengal Workmen's Protection Act, 1934, Central Provinces Protection of Debtors Act, 1937, Madras Workmen's Protection Act, 1941, and Bihar Workmen's Protection Act, 1948 and (5) Liquidation of Debt—Central Provinces Adjustment and Liquidation of Industrial Workers' Debt Act, 1936.

The first item is being discussed under the Payment of Wages Legislation and the remaining four items under the Indebtedness Legislation.

As a result of discussions in several meetings of the Indian Labour Conference and the Standing Labour Committee, the Central Government enacted the Minimum Wages Act in 1948, which, for the first time in India, provides for the statutory fixation and periodical revision of the minimum rates of wages in a number of scheduled employments. The Minimum Wage Legislation is being discussed under separate heading.

The provisions of the Payment of Wages Act, 1936 are also being progressively extended to new classes of wage earners employed in different industrial establishments by the State Governments. This progressive extension of the Payment of Wages Act, 1936 and the implementation of the Minimum Wages Act, 1948 are real achievements in the sphere of wages legislation in India.

PAYMENT OF WAGES LEGISLATION

Protection of Wages

Industrial workers have often to suffer from withholding or delays in the payment of wages and the deduction from the wages by way of fines, etc. Enquiries into the matter by the Government of India in 1926 revealed the existence of these evils and legislative proposals for their control were formulated in 1928 but these materials were placed before the Royal Commission on Labour which made several recommendations for legislative regulation in 1931, on the basis of which the Government of India passed the Payment of Wages Act in 1936 (IV of 1936).

Main Provisions of the Payment of Wages Act, 1936

The Payment of Wages Act, 1936 ensures regular and prompt payment of wages and prevents the exploitation of wage earners by arbitrary deductions and fines. It came into force on the 28th March, 1937. The Act extends to the whole of India except the State of Jammu and Kashmir,

1. It prescribes deductions from wages which are permissible and regulates fining of workers and method of recovering fines. The Act applies only to the payment of wages to persons receiving less than Rs. 200/- per month and employed in factories and upon railways. The State Government may extend the provisions of the Act to other industrial establishments.

2. No wage period shall exceed one month and all wages should be paid in cash and only on working days. Factories, railways and other industrial establishments employing less than 1,000 workers are required to pay the workers' wages within a period of 7 days after the end of wage period and those employing more than 1,000 workers to pay within 10 days. Payments should always be made within 2 days where an employee is discharged.

3. No deduction from wages can be made except those permissible under the Act such as fines, deduction for absence from work, recovery in advances, house rent, income-tax payment, provident fund contribution, court dues, co-operative societies' dues.

4. The fining of children is prohibited. Employers are required to post notices, specifying the acts or omissions in respect of which fines are imposed. Fines for acts or omissions not so specified are illegal. Fines can not be recovered by instalments or after 60 days from the day of fining. The maximum amount deducted as fines is not to exceed, in any month, half an anna in the rupee of the workers' earnings. All fines must be recorded in a prescribed register and credited to a fines fund. The amounts realised from fines are to be utilised for such purposes beneficial to the workers as are approved by the Competent Authority.

5. The Act embodies punishment for contravention of the provisions and the maximum penalty is Rs. 500/-. All claims arising out of deductions from or delay in payment of wages shall be dealt with by Special Authority appointed by the State Government.

Payment of Wages (Amendment) Act, 1937 (XXII of 1937)

The Act was amended in 1937 in order to empower the employers to withhold wages in case of a stay-in-strike.

Payment of Wages (Amendment) Ordinance, 1940 (Ord. III of 1940)

During the war, the Act was amended empowering an employer to make deductions from wages, on written authorisation of the employee, for investment in any War Savings Scheme approved by the State Government.

Enforcement and Administration

The State Governments have been empowered to appoint Authorities to administer the Act. The State Governments have appointed Authorities to hear and decide all claims arising out of deductions from wages or delays in the payments of wages. Such Authorities have the powers to direct the refund of the amount deducted or the payment of the delayed wages together with compensation not exceeding ten times the amount in case of deduction or Rs. 10 in case of delay in payment. Application for such cases shall be made within six months from the date on which the deduction from the wages was made or the payment of wages was due.

In most of the States, an Inspector of Factories shall be an Inspector for the purposes of the Act in respect of all factories within the local limits assigned to him. The Government of Orissa have declared the Assistant Labour Commissioner, Orissa, to be an Inspector under the Act. The Government of Punjab have declared the Labour Commissioner, Labour Officers and Labour Inspectors of the Labour Department to be Inspectors under the Act.

The Chief Labour Commissioner (Central) is responsible for the administration of the Act in mines and railways other than railway workshops. The Central Government have appointed the Commissioner for Workmen's Compensation, West Bengal, to be the Authority under the Act in respect of coal mines in West Bengal. The Central Government have declared every officer appointed by the State Governments of Bihar, Madhya Pradesh, Assam and Orissa as Authority under the Act to be Authority for coal mines also within that area. The Central Government have further declared that every officer appointed by the State Governments of Assam, Bihar, Bombay, Madhya Pradesh, Orissa, Punjab, West Bengal, Ajmer, Delhi, Vindhya Pradesh, Himachal Pradesh, Bilaspur, Kutch and Tripura as Authority under the Act for any area, shall be the Authority to hear and decide claims of workers employed in any mine, other than coal mine, within that area.

Extension of the Provisions of the Act to New Classes of Wage Earners

Though the Payment of Wages Act, 1936, was applicable only to factory and railway workers, the Central Government has extended the provisions of the Act, except sub-section (4) of Section 8, to all classes of persons employed in mines and covered under the Mines Act of 1952 in the whole of India except the State of Jammu and Kashmir.

The Act has been extended to (1) motor omnibus services in the States of Assam, Bihar, West Bengal, Madras, Coorg, Delhi, Punjab, Mysore and Tripura; (2) tramways in West Bengal, Madras, Punjab, Delhi, Mysore and Tripura; (3) plantations in Assam, Bihar, West Bengal, Madras, Mysore, Punjab, Coorg, Travancore-Cochin and Tripura; (4) inland steam navigation services in Assam, Bihar; (5) printing presses in Uttar Pradesh; (6) Government transport concerns and private transport companies in Punjab; (7) motor goods transport services in Delhi; (8) docks, wharfs or jetties in Assam; (9) motor vehicles plying under stage carriage permits and public carriers permits in Orissa; (10) dockyards in Bombay; (11) all industrial establishments employing 10 or more workers in Madras and Orissa; (12) establishments engaged in bidi making, shellac manufacture or leather tanning in certain districts in Madhya Pradesh; (13) industrial establishments declared to be factories under Section 85 of the Factories Act, 1948 in Bombay and Madras; (14) quarries in Punjab and Tripura and (15) workshops or other establishments in which articles are produced, adopted or manufactured with a view to their use, transport or sale in Punjab and Tripura.

Defects of the Payment of Wages Act, 1936

The Labour Investigation Committee pointed out several defects of the Act: It (1) does not cover workers in mines and plantations, (2) does not compel the employer to utilise the fines fund within a prescribed period for the benefit of the workers, (3) does not clearly provide for penalising the employer for failure to produce registers at the time of inspection. The Committee also reported about the practice of making unauthorised deduction from wages for charity, bad work, etc., and punishing the workers not by fines but by suspending or by refusing work to them for a number of days or by reducing their pay. The contract labour and smaller class of establishments are not complying with the provisions and this is to a certain extent due to the inadequacy of the inspection staff.

Proposal for Amendment of the Payment of Wages Act, 1936

The Government of India in their Five Year Labour Programme proposed to revise the Act in the light of comments of the Rege Committee and the experience of its working, with a view to (1) extend the scope of the Act, (2) rectify

the present defects, (3) get over the difficulties found in the working of the Act and (4) provide for proper utilisation of fine funds.

The Central Government have made certain proposals for the amendment of the Payment of Wages Act, 1936 and forwarded them to the employers' and employees' organisations for their views. These proposals are—(1) Revised definition of wages; (2) Extension of the Act to construction industry and contract labour; (3) Possibility of deductions for insurance premia and subscriptions to National or State loans; (4) Utilisation of fine fund; (5) Priority of wages over other debits in case a concern is wound up; (6) Raising of the wage limit from Rs. 200/- to Rs. 400/-; (7) Permitting deduction of rent of houses built by State Government under the Subsidized Industrial Housing Scheme and allotted to employers; and (8) Provision for an appeal from an order rejecting or dismissing a claim in full or in part.

The Deputy Labour Minister¹ recently stated in the Lok Sabha that the Bill to amend the Act would be introduced in the Parliament shortly and would be applicable to workers drawing up to Rs. 500/- per month and also to contract labour and transport workers. The amendment would provide for appeal by workers when their claims were rejected in full or in part.

Amendment of the Payment of Wages Act by Bombay Government

The Payment of Wages Act, 1936 in its application to the State of Bombay was amended by the Government of Bombay by the Payment of Wages (Bombay Amendment) Act, 1953 (Bom. LXII of 1953) which received the assent of the President on the 27th November, 1953 and came into force on the 10th May, 1954. The amendment was undertaken by the State Government as the experience of the working of the Act had shown that the present provisions were not adequate to secure to persons employed the payments due to them after a direction made by an Authority. The Amending Act makes both the employer and the manager or person responsible for the control of an industrial undertaking jointly and severally responsible for the recovery of wages and exempting the employees from payment of court fees and enables the Government to recover court fees in successful application from the employer instead of the employee only in respect of proceedings under Section 15. The Act was again amended by the Bombay Government by the Payment of Wages (Bombay Amendment) Act, 1954 (LXX of 1954) which received the assent of the President on the 15th November, 1954 and came into force from that date. The Amending Act empowers the Authority to recover the amount in all cases as an arrear of land revenue on the lines of Section 31 of the Workmen's Compensation Act, 1923 and exempts the employee from payment of court fees in respect of appeal proceedings under Section 17 with the modification that court fees of an amount of Rs. 5/- have to be paid and this amount will be refunded to him on his succeeding in the appeal.

PAYMENT OF WAGES ACT, 1936 (IV OF 1936)

Statement of Objects and Reasons²

In 1926, the Government of India addressed Local Governments with a view to ascertain the position with regard to the delays which occurred in the payment of wages to persons employed in industry, and the practice of imposing fines on them. The investigations

revealed the existence of abuses in both directions and the material collected was placed before the Royal Commission on Labour which was appointed in 1929. The Commission collected further evidence on the subject and the results of their examination with their recommendations will be found on pages 216-221 and 236-241 of their Report. The Government of India re-examined the subject in the light of the Commission's Report and in February, 1933, a Bill embodying the conclusions then reached was introduced and circulated for the purpose of eliciting opinion. A motion for the reference of the Bill to a Select Committee was tabled during the Delhi Session of 1933-1934, but was not reached, and the Bill lapsed. The present Bill is based upon the same principles as the original but has been revised throughout in the light of the criticisms received when the original Bill was circulated.

PAYMENT OF WAGES (AMENDMENT) ACT, 1937 (XXII OF 1937)

Statement of Objects and Reasons³

Section 9 of the Payment of Wages Act although relieving the employer from payments to workmen who are not present for work, appears to render him liable to pay wages to persons who though present, decline to work. The Bill is intended to remedy this defect.

6. Wages shall be paid on a working day within 7 days of the end of the wage-period (or within 10 days if 1,000 or more persons are employed).

The wages of a person discharged shall be paid not later than the second working day after his discharge.

7. Payments in kind are prohibited.

Fines and Deductions

8. No deductions shall be made from wages except those authorised under the Act (see paragraphs 9—15 below).

10. (a) Deductions for absence from duty can be made only on account of the absence of the employed person at times when he should be working and such deductions must not exceed an amount which is in the same proportion to his wages for the wage-period, as the time he was absent in that period is to the total time he should have been at work.

(b) If ten or more employed persons, acting in concert, absent themselves without reasonable cause and without due notice, the deduction for absence can include wages for eight days in lieu of notice, but:—

(1) no deduction for breaking a contract can be made from a person under 15 or a woman.

(2) there must be a provision in writing which for part of the contract of employment, requiring that a specific period of notice of intention to cease work not exceeding 15 days or the period of notice which the employer has to give to discharge a worker, must be given to the employer and that wages may be deducted in lieu of such notice.

12. Deductions can be made, equivalent to the value thereof, for house accommodation, amenities, or services (other than tools and raw material) supplied by the employer provided these are accepted by the employed person as a part of the terms of his employment and have in the case of amenities and services been authorised by order of the Central Government.

13. (a) Deductions can be made for the recovery of advances, or for adjustment of overpayment of wages.

(b) Advances made before the employment began can only be recovered from the first payment of wages for a complete wage-period but no recovery can be made of advances given for travelling expenses before employment began.

Definition of wages

3. "Wages" means all remuneration payable to an employed person on the fulfilment of his contract of employment.

It includes bonus and any sum payable for want of a proper notice of discharge.

It excludes:—

- (a) the value of house-accommodation, supply of light, water, medical attendance, or other amenity or of any service excluded by the Central Government;
- (b) the employer's contribution to a pension or provident fund;
- (c) travelling allowance or concession or other special expenses entailed by the employment;
- (d) any gratuity payable on discharge.

Responsibility for and method of payment

4. (a) The employer is responsible for the payment under the Act of wages to persons employed under him, and any contractor employing persons is responsible for payment to the persons he employs;

(b) The headman of any gang who apportions work between the members of the gang and receives payment on the output of the work of the members of his gang is responsible for the payment of wages to the individual members of the gang.

5. Wage-periods shall be fixed for the payment of wages at intervals not exceeding one month.

6. Wages shall be paid on a working day within 7 days of the end of the wage-period (or within 10 days if 1,000 or more persons are employed).

The wages of a person discharged shall be paid not later than the second working day after his discharge.

7. Payments in kind are prohibited.

Fines and Deductions

8. No deductions shall be made from wages except those authorised under the Act (see paragraphs 9-15 below).

9. Fines can be imposed only for such acts and omissions as the employer may, with the previous approval of the Inspector, specify by a notice displayed at or near the main entrance of the work place or places at the mine and after giving the employed person an opportunity for explanation.

10. (a) Deductions for absence from duty can be made only on account of the absence of the employed person at times when he should be working and such deductions must not exceed an amount which is in the same proportion to his wages for the wage-period, as the time he was absent in that period is to the total time he should have been at work.

(b) If ten or more employed persons, acting in concert, absent themselves without reasonable cause and without due notice, the deduction for absence can include wages for eight days in lieu of notice, but:—

- (1) no deduction for breaking contract can be made from a person under 15 or a woman;
- (2) there must be a provision in writing which forms part of the contract of employment, requiring that a specific period of notice of intention to cease work not exceeding 15 days or the period of notice which the employer has to give to discharge a worker, must be given to the employer and that wages may be deducted in lieu of such notice;
- (3) the above provision must be displayed at or near the main entrance of the work place or places at the mine or work place;

- (4) no deduction of this nature can be made until a week's notice that this deduction is to be made has been posted at or near the main entrance of the work place or places at the mine or work place;
- (5) no deduction must exceed the wages of the employed person for the period by which the notice he gives of leaving employment, is less than the notice he should have given under his contract.

11. Deductions can be made for damage to or loss of goods expressly entrusted to an employed person or for loss of money for which he is required to account, where such damage or loss is due to his neglect or default.

Such deduction cannot exceed the amount of the damage or loss caused and can be made only after giving the employed person an opportunity for explanation.

12. Deductions can be made, equivalent to the value thereof, for house accommodation, amenities, or services (other than tools and raw material) supplied by the employer provided these are accepted by the employed person as a part of the terms of his employment and have in the case of amenities and services been authorised by order of the Central Government.

13. (a) Deductions can be made for the recovery of advances, or for adjustment of overpayment of wages.

(b) Advances made before the employment began can only be recovered from the first payment of wages for a complete wage-period but no recovery can be made of advances given for travelling expenses before employment began.

(c) Advances of unearned wages can be made at the paymaster's discretion during employment.

14. Deduction can be made for subscription to and for repayment of advances from any recognised provident fund.

15. Deductions can be made for payments to co-operative societies approved by the Central Government or to the postal insurance, subject to any conditions imposed by the Central Government.

Complaints of deductions or delays

17. (a) Where irregular deductions are made from wages, or delays in payment take place, an employed person can make an application in the prescribed form within 6 months to the Authority appointed by the State Government for the purpose. An application delayed beyond this period may be rejected unless sufficient cause for the delay is shown.

(b) Any legal practitioner, official of a registered trade union, Inspector under the Act, or other person acting with the Authority can make the complaint on behalf of an employed person.

(c) A single application may be presented by, or on behalf of any number of persons belonging to the same mine the payment of whose wages has been delayed.

Action by the Authority

18. The Authority may award compensation to the employed person in addition to ordering the payment of delayed wages or the refund of illegal deductions.

If a malicious or vexatious complaint is made, the Authority may impose a penalty not exceeding Rs. 50 on the applicant and order that it be paid to the employer.

Appeal against the Authority

19. An appeal in the prescribed form against a direction made by the Authority may be preferred within 30 days in Calcutta to the Court of Small Causes and elsewhere to the District Court—

(a) by the employer if the total amount directed to be paid exceeds Rs. 300;

(b) by an employed person, if the total amount of wages withheld from him or his co-workers, exceeds Rs. 50;

(c) by a person directed to pay a penalty for a malicious or vexatious application.

Punishments for Breaches of the Act

20. Anyone delaying the payment of wages beyond the due date, or making any unauthorised deduction from wages is liable to a fine upto Rs. 500, but only if prosecuted with the sanction of the Authority or the Appellate Court.

21. The employer who,—

(1) does not fix a wage-period, or

FAIR WAGE CLAUSE IN CENTRAL PUBLIC WORKS DEPARTMENT CONTRACTS¹

(a) The Contractor shall pay not less than fair wage to labourers engaged by him on the work.

Explanation.

"Fair wage" means wage whether for time or piece work notified at the time of inviting tenders for the work and where such wages have not been so notified, the wage prescribed by the Central P. W. D. for the district in which the work is done.

(b) The Contractor shall, notwithstanding the provisions of any contract to the contrary, cause to be paid a fair wage to labourers indirectly engaged on the work including any labour engaged by his sub-contractors in connection with the said work, as if the labourers had been immediately employed by him.

(c) In respect of all labour directly or indirectly employed in the works for the performance of the Contractor's part of this Agreement, the Contractor shall comply with or cause to be complied with the Central Public Works Department Contractor's Labour Regulations made by Government in regard to payment of wages, wage period, deductions from wages, recovery of wages not paid and deductions unauthorisedly made, maintenance of ² [wage book, wage slips], publication of scale of wages and other terms of employment, inspection and submission of periodical returns and all other matters of a like nature.

(d) The Executive Engineer or Sub-Divisional Officer concerned shall have the right to deduct, from the moneys due to the Contractor, any sum, required or estimated to be required for making good the loss suffered by a worker or workers by reason of non-fulfilment of the conditions of the contract for the benefit of the workers, non-payment of wages or of deductions made from his or their wages, which are not justified by their terms of the contract or non-observance of the Regulations.

(e) Vis-a-vis the Central Government, the Contractor shall be primarily liable for all payments to be made under, and for the observance of the Regulations aforesaid without prejudice to his right to claim indemnity from his sub-contractors.

(f) The Regulations aforesaid shall be deemed to be a part of this contract and any breach thereof shall be a breach of this contract.

¹ The Government of India have been considering for some time past ways and means of improving and ensuring stricter compliance with the Fair Wage Clause already included in the standard form of agreement in force in Central P. W. D. contracts. This clause at present provides that the Contractor shall pay his labour not less than the wages paid for similar work in the neighbourhood. The intention of this clause was that the labour should be paid a fair wage and that the Contractors should not be allowed to force the construction labour by various devices to work for him at rates which were below the prevailing market rates for labour. In order to ensure the implementation of this object, the Government of India have now decided to introduce a revised clause in the Standard Forms of Agreement with Contractors providing that the wage rates to be paid by a Contractor employed on a Central P. W. D. contract (or by a sub-contractor working under that contractor) shall be so fixed (whether on time or piece) as to give to every man, woman or child employed on that work a daily wage notified at the time of calling for tenders. This wage will be the "fair wage"—i.e., the wage paid in the locality. The revised clause has been brought into effect from the 1st April, 1946. The Fair Wage Clause and the Central P. W. D. Contractor's Labour Regulations were formulated by the Labour Department, Government of India and circulated under Memo No. E-17 dated the 24th January, 1946 to all State Governments with the advice to adopt similar provisions in respect of labour employed on their works and also to all the Departments of the Government of India for information.

The Central Government have also decided to set up an adequate administrative system to ensure that the provisions of the Fair Wage Clause are duly complied with and orders sanctioning the necessary staff for this purpose are being issued.

The Central and several State Governments have fixed minimum rates of wages for building industry and the Fair Wage Clause is not as significant at present as it used to be before. The Central Government is also contemplating to amend the Payment of Wages Act for its application to contract labour.

INDEBTEDNESS LEGISLATION

Indebtedness: Causes and Suggested Remedies

Some of the main causes of indebtedness amongst industrial workers are the expenditures incurred by them in connection with social and religious purposes such as births, deaths, marriages, festivals, etc. and periods of unemployment due to illness, strike, dismissal, etc. The Labour Investigation Committee in their Main Report published in 1946 pointed out that indebtedness in some cases might be due to improvidence and vice, but "in the majority of cases, indebtedness has a great deal to do with the low earnings of workers which leave them little, if any margin at all, to meet any extraordinary calls, on their income such as sickness, death, marriages, ceremonies, festivals, etc. It is commonly supposed that the worker gets indebted because of his improvidence, but a closer analysis would suggest that this is true only to a limited extent."¹ In the opinion of the Committee the more fundamental need is that the worker should be able to earn enough not only to meet his day to day wants but to have some margin for saving which

Note—(1) The expressions "certified" and "notified" used in paras 3(a) of Regulations and (a) of Fair Wage Clause do not refer to one and the same act. The notified wages are wages prescribed, before tenders are invited which are later certified to be fair *i.e.*, neither high nor low. (2) Monies deducted by Central Public Works Department officials under para (d) of the Fair Wage Clause should be transferred to the workers concerned.

can be utilised not only for unforeseen expenditure but also for certain conventional necessities and social obligations.

The effect of indebtedness is not confined to hardship caused by the loss of money alone but it is a severe drag on the health; it destroys the incentive to work and impairs the efficiency of industrial workers and is responsible for low standard of living. Indebtedness is not confined to industrial workers alone but its existence is fairly noticeable amongst the agriculturists in India. But the position of an industrial worker is quite different from that of an agriculturist. The agriculturist is a local man and can offer security if required but this is not possible for the industrial worker as he is not a permanent resident of the locality and as such he is rather compelled to pay particularly high rates of interest.

Various measures have been adopted or proposed, from time to time, to check the indebtedness of the agricultural worker and to improve his condition. Legislations have been enacted with the object of restricting the transfer by sale or mortgage of agricultural land to non-agriculturist. Measures have been undertaken to check usury by legislation and the leading measure of general application is the Usurious Loans Act of 1918. This Act, as amended in 1926, provides that, in a proceeding for the recovery of a loan, the Court, if satisfied that the interest claimed was excessive and that the transaction was substantially unfair, may reopen the contract and grant an equitable decree. The Agricultural Commission in their Report in 1928 expressed the hope that the salvation of the rural masses from their crushing burden of debt would rest in the growth and spread of a healthy and well organised co-operative movement based on the careful education and systematic training of the villagers themselves.

The Royal Commission on Labour also made a series of recommendations for mitigating the evils of indebtedness, which have been acted upon by the Central and some State Governments.

1. Attachment of Salaries and Wages

The attachment of salaries and wages for debts incurred is a major evil from which industrial workers have to suffer. Section 60 of the Civil Procedure Code, 1908 permitted the attachment of wages and the money lender could attach the wages of all workers except labourers and domestic servants. In respect of certain classes of employees, viz., railway servants and employees under local authority, the law authorised the employers, at the instance of the money lender, to deduct from the salaries and wages of the employees every month and pay the amount to Court till the decree obtained by the money lender was fully satisfied. The comparative security of railway service induced many money lenders to grant loans to the railway servants and it appeared that the level of indebtedness in terms of wages was higher amongst railway servants than amongst industrial workers as a whole. The Royal Commission on Labour in India in their Report published in 1931 drew attention to this defect and recommended that the salaries and wages of every workman receiving less than Rs. 300/- a month should be exempted entirely from the possibility of attachment. With a view to give effect to this recommendation, the Central Government introduced a Bill on the 18th February, 1935 to amend Section 60 of the Code of Civil Procedure, 1908 and the Bill was finally passed in February, 1937, as the Code of Civil Procedure (Second Amendment) Act, 1937 (IX of 1937). The Act became applicable to decrees obtained on or after 1st of June, 1937. The Amending Act provides for the exemption of attachment of wages of labourers and domestic servants whether payable in money or kind as well as salary to the extent of first hundred rupees and one half of the remainder. The salary of the Government employees, railway employees or employees of the local authority to the extent of the first 100 rupees and one half of the remainder shall be exempt from attachment, but where the whole or any

portion of such salary liable to attachment has been under attachment whether continuously or intermittently for a total period of 24 months, such portion shall be exempt from attachment until the expiry of a further period of 12 months and where such attachment has been made in execution of one and the same decree, shall be finally exempt from attachment for the execution of the same decree. The Central Government, may, by notification in the Gazette of India, declare any allowance forming part of emoluments of any servant of the Government, railway company or local authority or any subsistence grant or allowance made to any such servant while under suspension, exempt from attachment.

2. Imprisonment for Debt

The threat for imprisonment for debt was a useful weapon in the hands of the money lender. Section 51 of the Civil Procedure Code, 1908 permitted imprisonment for debt and male debtors were liable to be arrested and imprisoned for six months in execution of a decree for payment of more than Rs. 50/- and for six weeks in case of smaller sums. The Royal Commissioner on Labour recommended that in the case of industrial workers in receipt of salaries or wages amounting to less than Rs. 100/- a month, imprisonment for debt should be abolished except where the debtor has been proved to be both able and unwilling to pay.

The Central Government decided to implement the recommendation of the Royal Commission on Labour but broadened the scope of the legislation to include all classes of debtors. An Amending Bill further to amend Section 51 of the Civil Procedure Code, 1908 was introduced and passed as the Code of Civil Procedure (Amendment) Act, 1936 (XXI of 1936). The Amending Act provides that no order for execution by detention in prison shall be issued by the Court unless the debtor has been given opportunity of showing cause why he should not be committed to prison and the Court is satisfied that the debtor is likely to obstruct or delay execution of the decree or abscond or leave the local limits of the Court's jurisdiction or where there has been a fraudulent transfer of property.

The Punjab Government enacted the Punjab Relief of Indebtedness Act in 1934 (Punjab Act VII of 1934) before the legislation was undertaken by the Central Government. The Act came into force on 1st April, 1935 and was mainly designed for the protection of agricultural debtors. Under the Act no judgment debtor can be imprisoned unless he refuses to pay a sum within his capacity from such property as is liable to attachment in execution of a decree.

3. Prohibition of Intimidation

Intimidation for recovery of debt is another great evil to which industrial workers are subjected. There are many money lenders who use intimidation and depend upon the threat of violence instead of taking any legal proceeding to realise the debt. They wait outside the factory gate on pay date to pounce upon the debtors as they emerge. The object of these money lenders is to ensure that their claim forms the first charge on the wages of the industrial workers. The Royal Commission on Labour recommended that besetting an industrial establishment for the recovery of debt should be made a criminal and cognisable offence and defined besetting "as loitering within the precincts or near or within the sight of any gate or outlet of the establishment."

The Central Government consulted the State Governments and interested public and came to the decision of not enacting a Central legislation on the basis of the recommendation of the Royal Commission on Labour.

The Government of Bengal was strongly in favour of the proposed measure and enacted the Bengal Workmen's Protection Act in 1934 (Bengal Act IV of 1935) to prevent the recovery of debts from certain classes of workmen by besetting their places of work. The Act provides that any person loitering at or near any

factory, mine, dock, wharf or jetty, railway station or yard with a view to recover any debt from any person employed therein, shall be liable to be punished with imprisonment which may extend to six months or with fine or both. The provisions of the Act have been extended in the first instance, to Calcutta and the districts of 24-Parganas, Hooghly and Howrah, but the State Government may extend its scope to other specified areas. The Act was amended in 1940 to extend its scope to seamen and workmen employed by local authorities or public utility services.

The Government of Madhya Pradesh enacted more or less similar legislation called the Central Provinces Protection of Debtors Act in 1937 (IV of 1937). The Act is wider in scope and defines molestation to mean obstruction, violence, intimidation, persistent following of debtors and loitering at or near his residence or place of work. The offence for molestation will be punished with imprisonment extending to three months or a fine extending to Rs. 500/- or both. In the opinion of the Labour Investigation Committee, "these Acts do not appear to have had any tangible effect."

The Government of Madras passed the Madras Workmen's Protection Act in 1941 which is more or less on similar lines.

The Government of Bihar enacted the Bihar Workmen's Protection Act in 1948 (Bihar Act XXXIII of 1948). The Act prevents the recovery of debts from certain classes of workmen by besetting the places where they work or receive their wages and protects such workmen from molestation and intimidation by their creditors. The offence of besetting is liable to be punished with imprisonment up to six months or with fine or both.

The Government of Uttar Pradesh is considering to enact similar legislation.

The Labour Investigation Committee desired that other State Governments should adopt as soon as possible legislation to prevent besetting.

4. Liquidation of Debts

The excessive rate of interest charged by the money lenders affects both the income and standard of living of the industrial workers. The Royal Commission on Labour recommended a new procedure bearing some resemblance to the proceedings in insolvency courts, for liquidation of worker's unsecured debts and suggested the possibility of appointing Special Courts like Workmen's Compensation Courts for summary liquidation proceedings. The Commission recommended to frame a precise definition of industrial workers and to limit the operation of the Act to special areas and to workers receiving wages of less than Rs. 100/- per month.

The Government of Madhya Pradesh enacted the Central Provinces Adjustment and Liquidation of Industrial Workers' Debt Act in January, 1936, which came into force on the 1st January, 1937. The Act is applicable to any industrial worker earning up to Rs. 50/- per month and entitles him to file a petition in Court for liquidation of his debt if the debt exceeds his assets and three months' wages. The Court after enquiring into the facts of the case and after giving due consideration to the worker's wages and the number of his dependants, will decide the monthly amount ranging from one-sixth to one-third, which the worker should repay within a reasonable time. The State Government subsequently felt that the monthly income up to Rs. 50/- was too low and introduced an Amending Bill in the State Legislature in March, 1951 to raise the limit to Rs. 90/-.

The Labour Investigation Committee desired that other State Governments should enact similar legislations to liquidate the debts of industrial workers.

MINIMUM WAGE LEGISLATION

Minimum Wage Legislation in Advanced Countries

The need for fixing minimum wages for industrial labour has everywhere been recognised in modern states, specially in sweated industries and in industries where workers are not organised and where their position is exploited by the employers. In England legislation was passed in 1909 for fixing minimum wages in a certain group of industries. The U. K. Trade Boards Act of 1909 provides for wage fixing machinery in those trades where the rate of wages is exceptionally low in comparison with other employments. The Trade Boards Act of 1918 authorised the Minister of Labour to appoint Trade Boards in any trade if he was of opinion that there was no adequate machinery for effective regulation of wages throughout the trade. The New Zealand Industrial Arbitration Act of 1894 provides for regulation of wages for the purpose of settlement of industrial disputes. The first minimum wage legislation was undertaken in 1912 in U. S. A. and in 1915 in France. The American Fair Labour Standards Act of 1938 fixes a statutory wage rate for workers employed in industries, in and affecting inter-State commerce and prevents unfair competition amongst employers engaged in the industries.

International Standards for Minimum Wage

In 1928, the International Labour Conference adopted Convention No. 26 and Recommendation No. 30 dealing with minimum wage-fixing machinery in trade and commerce. The Convention provides for establishment of wage-fixing machinery whereby minimum rates of wages can be fixed for workers employed in certain trades. The representatives of employers and employees should be associated on equal terms at the time of fixing minimum wages and the wages thus fixed are binding on both and cannot be changed without the sanction of the competent authority. The Recommendation provides that such machinery should investigate into the relevant conditions in the trades and take into account the rates of wages paid for similar works in trades where collective agreements have been concluded.

Minimum Wage Regulation in India

The question of fixing minimum wages was felt in India as early as the beginning of the twenties; but the Government of India considered the adoption of such a measure as impracticable and could not take steps to do something practical in this connection. The necessity of fixing minimum wages for labour is all the more important in India, as the labour is very cheap and unorganised and lacks the habit of collective bargaining in their demand for a living wage. The conditions of employment, wages and demand and supply of labour in different parts of India are divergent. Wages vary from State to State, from industry to industry and from occupation to occupation. The question of standardisation of wage rates for the different occupations, regulation of wages and fixation of minimum rates of wages constitute the most important problems relating to industrial

³⁰ The letter and brackets "(a)", the word "or" and cl. (b) rep. by the Repealing and Amending Act, 1914 (10 of 1914), s. 3 and Sch. II.

labour in India. This question is also closely co-related with the maintenance of industrial peace, as wages represent the main point round which majority of industrial disputes are centred.

Royal Commission on Labour in India

The Commission considered the question of fixing minimum wages and recommended that necessary investigation should be made in respect of small industries like bidi making, wool-cleaning, mica factories, shellac manufacturing and tanning, for determining the necessity and possibility of minimum wage-fixing machinery and that legislation should be undertaken to set up such machinery if the investigation report recommends its desirability and practicability. The Commission recommended the establishment of Statutory Wage Board for fixing wages in tea plantations in Assam.¹

Different Provincial Labour Enquiry Committees²

The Royal Commission commented on the inadequacy of statistical materials on wages. Cawnpore Labour Enquiry Committee, Bombay Textile Labour Enquiry Committee, Bihar Labour Enquiry Committee, C. P. and Berar Textile Labour Enquiry Committee and U. P. Labour Enquiry Committee in course of their enquiries surveyed the wage level of workers engaged in various types of industrial undertakings and advocated fixation of minimum wages. The Bombay Textile Labour Enquiry Committee suggested the following four different types of agencies by which minimum wages can be determined:—enactment, arbitration court, general board and special trade board. These four methods were discussed in details by Dr. D. R. Gadgil in his Patna University Banaili Readership Lectures, 1939-40.³

Labour Investigation Committee

The Labour Investigation Committee (commonly known as Rege Committee) appointed by the Government of India early in 1944 in pursuance of an unanimous resolution of the Tripartite Labour Conference passed in September, 1943, collected a huge mass of valuable statistical data relating to wages and earnings of all industrial and allied categories of employment throughout British India and Native States. The Committee submitted Reports on *ad hoc* surveys of some 35 industries and also a Main Report. The position in respect of wages and earnings in various industries have been discussed in details in these Reports and their surveys reveal the low level of remuneration earned by labour in India in practically all industries excepting the cotton mill industry in Ahmedabad where wages have been standardised. The Committee concluded: "Our surveys, however, will bring home to any reader the fact that the basic wage level in most Indian industries is extremely low. As a matter of fact, considering the question broadly, little or nothing has been done by the principal industries in this country to revise in an upward direction the basic wages of their operatives except where the employers have been forced either by Government or by labour."

Central Pay Commission

The Government of India appointed a Central Pay Commission on 10th May, 1946 to enquire into and report on the conditions of service of Central Government employees with particular reference, amongst others, to the structure of their pay scales and standards of remuneration with the object of achieving, to the fullest

degree possible, rationalisation and the principles on which the remuneration of industrial workers and daily rated employees Government should be based.

The Commission recommended the adoption of uniform scales of pay and dearness allowance all over India with house rent allowance and compensatory allowance in large towns and industrial centres. The scales of pay have been computed on the basis that when the cost of living will stabilise, they will be from 60% to 75% higher than the pre-war level. The Commission recommended the initial pay of a Class I officer at Rs. 350/- per month and fixation of Rs. 2,000/- as the maximum monthly salary of public servants in India, except for a few select posts. It also recommended the payment of dearness allowance in order to bring the total emoluments to correspond with the present day cost of living and suggested a "slab system" under which the dearness allowance would increase or decrease according to the rise or fall of cost of living indices. The Commission recommended that as far as practicable a fair relativity should be maintained between rates of pay of certain classes of civil servants and comparable outside rates.

The Commission recommended that the Government should take some step forward in giving effect to the "living wage" principle in dealing with the employees who are virtually on the "poverty line" and came to the conclusion that in no case a man's wage should be less than a living wage. This living wage would be Rs. 55/- (Rs. 30/- as basic pay plus Rs. 25/- as dearness allowance) for working class family and Rs. 90/- (Rs. 55/- as basic pay plus Rs. 35/- as dearness allowance) in the case of middle class employees, calculated on the cost of living as it stood in the beginning of 1947, apart from house rent allowance in big cities and certain other benefits. It also recommended that the daily rated system for labour should be reduced to a minimum and that the higher groups of labour (including supervisory staff) should be classified into semi-skilled, skilled and highly skilled according to trade tests. The Report states, "it will be convenient if each industrial establishment constitutes a Board, say of three of its officers, to determine the classification which should be reviewed, from time to time." According to Dr. R. K. Mukherjee, the living wage of a worker is Rs. 30/- on the basis of the prices in 1931-32.⁴

Government Acceptance of Pay Commission's Recommendations

The Report of the Central Pay Commission constitutes as a landmark as the principles and practices recommended therein have been accepted as authoritative by different Adjudicators. The Government of India have accepted the basic pay structure recommended by the Commission as well as the uniform scales of pay, dearness allowance, house rent and compensatory allowance in costlier cities. The amount of dearness allowance will be subject to alterations, upwards or downwards should the cost of living vary substantially. The Government have also accepted the living wages for working class family and middle class family. Rs. 55/- including dearness allowance at Rs. 25/- per month, will constitute the lowest wage for a Central Government servant at the present cost of living index with the exception of unskilled workers under 21 years of age who will draw one rupee less for each year by which they fall short of 21. In accepting the recommendations the Government estimates an additional cost of Rs. 30 crores per annum.

The basic wages and allowances fixed by the Central Government for ensuring a living wage to their employees, will be looked upon as a model for State Governments and private enterprise in their respective spheres.

Minimum Wages Bill, 1946

The question of establishing statutory wage-fixing machinery was discussed at the third meeting of the Standing Labour Committee in May, 1943, in the Fifth Labour

⁴ The Indian Working Class by Dr. Radha Kamal Mukherjee (Third Edition, 1951.)

Conference in September, 1943 and again at the fourth meeting of the Standing Labour Committee held on 25th and 26th January, 1944 and at the Sixth Labour Conference held on 27th and 28th October, 1944. In the previous discussions it was suggested that fixation of statutory minimum wages could not be undertaken unless reliable and extensive materials regarding wages and earnings in various industries were available. Setting up of Regional Wage Boards for fixing statutory minimum wages for industrial labour was also discussed and general consensus of opinion was in its favour.

The Government of India introduced the Minimum Wages Bill in the Indian Legislative Assembly on the 11th April, 1946 for setting up machinery for fixing minimum wages by Provincial Governments in respect of employments where sweated labour is most prevalent or where there is chance of exploitation of labour, by mentioning these industries in the Schedule with power to add more categories of employment in the Schedule. The Bill provides for appointment of Advisory Committees and Advisory Boards with equal representation of employers and workmen to advise the Government in fixing the minimum wages. The Bill was referred to the Select Committee in March, 1947 and the Committee was reconstituted in the first session of the Dominion Legislature in November, 1947. The Committee made certain amendments and added several new clauses in the Bill and submitted the Report on the 28th January, 1948. In piloting the Bill in the Dominion Legislature, the Labour Minister pointed out that no industry, including agriculture had any right to exist if it entailed the exploitation of the working classes and could not afford them a minimum wage. The Bill was passed by the Dominion Legislature on the 9th February, 1948. The Act has come into force from the 15th March, 1948 and covers all States of India except the State of Jammu and Kashmir.

Minimum Wages Act, 1948 (XI of 1948)

This legislation is the first of its kind in affording a great measure of income security to industrial labour in India. The Act, if properly enforced, will upgrade the level of wages of the workers in unorganised industries, particularly agricultural labour whose bargaining power is weak and will help to bring an era of rising income and prosperity.

The Act empowers the State or Central Government, as the case may be, to fix minimum rates of wages in respect of scheduled employments, after due enquiries. Part I of the Schedule includes employment in (1) woollen carpet making or shawl weaving establishment, (2) any rice mill, flour mill or dal mill, (3) any tobacco (including bidi making) manufactory, (4) plantation, *viz.*, estate maintained for the purpose of growing cinchona, rubber, tea or coffee, (5) oil mill, (6) under any local authority, (7) road and building constructions, (8) stone breaking or stone crushing, (9) lac industry, (10) mica works, (11) public motor transport, (12) tanneries and leather manufactory. Part II of the Schedule includes agriculture including farming, dairy, horticulture, poultry, forestry or timber operations. The Act authorises the appropriate Government to extend its application to any industry wherein, in their opinion, statutory minimum wages should be fixed.

Enforcement and Extension of Time Limit

Minimum rates of wages in respect of all industries excepting agriculture are to be fixed within two years from the date of the commencement of the Act, *viz.*, 15th March, 1948 and in the case of agriculture, within three years.

The Central Government and most of the State Governments were unable to fix minimum rates of wages for the employments specified in the Act by the stipulated date. The Central Government promulgated the Minimum Wages (Extension

of Time) Ordinance (XVII of 1950) in June, 1950 extending for one year the stipulated date for fixing the minimum rates of wages in respect of employments other than agriculture and in case of employments subsequently included in the Schedule by a notification under the provisions of the Act, two years from the date of such notification. Minimum Wages (Amendment) Act, 1950 (LVI of 1950) replaced the Ordinance and extended the time limit to three years both in respect of employments mentioned in Parts I & II of the Schedule.

This time limit was further extended to 31st March, 1952 for employments other than agriculture (Part I of the Schedule) and 31st December, 1953 for agricultural labour (Part II of the Schedule) by the Minimum Wages (Amendment) Act, 1951 (XVI of 1951).

Many of the States, specially Part B States to which the Act was extended by the Part B States (Laws) Act, 1951 (III of 1951) with effect from the 1st of April, 1951, were not able to fix minimum wages in all cases. Some of the States fixed minimum wages after 31st March, 1952, which were not valid under the law. In order to remove the legal difficulties and to give some more time to the States for enforcing the provisions of the Act, the Central Government introduced the Minimum Wages (Amendment) Bill in the Parliament on the 23rd February 1953, which was passed as the Minimum Wages (Amendment) Act, 1954 and received assent of the President on the 20th May, 1954. The Amending Act extends the time limit for fixation of minimum wages in employments specified in Parts I and II of the Schedule, to 31st December, 1954 and authorises the appropriate Government not to apply the provisions of the Act to any class of employees who are in receipt of wages exceeding the prescribed limit.

Fixing of Minimum Rates of Wages

The Act provides for fixation of different minimum rates of wages for time work, piece work, overtime work for different scheduled employments, for different class of work in the same employment, for adults, adolescent, children and apprentices and for different localities. The minimum rate fixed or revised may consist of (1) a basic rate of wages and a cost of living allowance, (2) a basic rate of wages with or without the cost of living allowance and cash value of concessions for supply of essential commodities or (3) an all-inclusive rate.

The appropriate Government is also empowered, in regard to any scheduled employment in respect of which minimum wages have been fixed (1) to fix the number of hours of work per day, (2) to provide for a weekly holiday and (3) to provide for payment of overtime wages.

Procedure to be followed

In fixing the minimum rates of wages of any scheduled employment, the Government may appoint a Committee to hold enquiries with Sub-Committees for different localities to assist it and publish its proposals regarding the rates of wages to be paid, giving two months time for filing objections or representations. These minimum rates shall come into force on the expiry of three months from its publication in the official Gazette.

Revision of Minimum Rate

The rate of wages so fixed shall be reviewed at any time not exceeding five years and revised, if necessary. But before revising such rates, the Government should appoint Advisory Committees and Sub-Committees to enquire into the conditions of employment and to advise the Government in making revision. The revised rate shall come into force three months after publication.

Central Advisory Board and State Advisory Boards

The Act requires the Central Government to set up a Central Advisory Board for the purpose of advising the Central and State Governments in the matter of fixing and revising the minimum rates of wages and for co-ordinating the work of the Advisory Boards. The Central Advisory Board will consist of an equal number of the representatives of employers and employees and independent persons not exceeding one-third of the total number of members.

The State Government may appoint Advisory Board for co-ordinating the work of the Committees, Sub-Committees, Advisory Committees and Advisory Sub-Committees and for advising the State Government for fixing and revising the minimum rates of wages. The Advisory Board will consist of equal number of employers' and workers' representatives and independent persons not exceeding one-third of the total number of members. Most of the State Governments have already appointed Advisory Boards consisting of employers, employees and independent persons.

Maintenance of Registers and Records

The employers shall maintain registers and records giving particulars of employees, work performed by them, wages paid to them and receipts given to them. The employer shall keep exhibited notices in prescribed forms containing prescribed particulars. The Government may provide for issue of wage books or wage slips for the employees in the scheduled employment and prescribe the manner in which entry shall be made and authenticated in wage books or wage slips.

Penalty

An employer infringing important provisions of the Act or Rules, is liable to be punished with imprisonment of either description for a period which may exceed to six months or with fine which may exceed to Rs. 500/- or with both.

Central Government's Directive Powers

The Act empowers the Central Government to give directions to a State Government in the matter of enforcement of the provisions of the Act in the State.

Competent Authorities under the Act

Various State Governments have appointed Competent Authorities to ascertain, from time to time, cost of living index numbers applicable to persons employed in the scheduled employments.

Minimum Wages (Central Advisory Board) Rules, 1949

The Rules regulating the constitution of the Board, number of members, term of office, procedure of meetings and disposal of business were sanctioned by the Central Government on the 25th October, 1949. The Board will meet at least twice a year and consist of a Chairman, two representing the Central Government, one person representing each State Government, 24 persons representing in equal proportion employers and employees in the scheduled employments. The Central Government first constituted the Central Advisory Board in May 1950 with 45 members which was reconstituted in April, 1952. The present Board consists of 51 members—17 representing the Central and State Governments and 17 each representing employers and employees engaged in the scheduled employments with the Secretary of the Ministry of Labour, Government of India as Chairman.

Minimum Wages (Central) Rules, 1950

The Rules framed by the Central Government on the 14th October, 1950 serve as a model to the State Rules on the subject and prescribe the daily working hours

for adults at 9 and $4\frac{1}{2}$ for children. The rules provide for payment of overtime work and prescribe that the wage period should not exceed one month.

Most of the State Governments have framed Rules for carrying out the purposes of the Act on the lines of the Central Rules adopting the Central provisions regarding working hours, weekly day of rest, rates of wages for overtime work, etc. The State Rules, amongst others, prescribe the methods of the working of the various Committees and Boards set up under the Act, forms of registers and records to be maintained, the number of hours of work constituting a normal working day.

Fair Wages Bill, 1950 (Bill No. 58 of 1950)⁵

In pursuance of the Central Government Resolution on Industrial Policy of 1948, a Central Labour Advisory Council was appointed for advising Government on fair wages, fair remuneration to capital and conditions of labour. The Council in its first session held in November, 1948 appointed a Committee to enquire into and report on the subject of fair wages to labour. The Fair Wages Committee submitted the Report in June, 1949, which was accepted by the representatives of the employers and labour.

⁵ Statement of Objects and Reasons.—The Industrial Truce Resolution of 1947 laid down that in devising a system of remuneration to capital as well as labour, adequate provision must be made, *inter alia*, for payment of fair wages to labour. Government accepted that Resolution in their Statement on Industrial Policy dated the 6th April 1948 and announced their intention to set up suitable machinery for its implementation. Accordingly, a Central Advisory Council was established, consisting of representatives of Central and Provincial Governments, of employers and of employees to examine the various problems arising out of the Industrial Truce Resolution. That Council was assisted in its study of the subject of fair wages by a tripartite committee which submitted a unanimous report.

2. The Fair Wages Bill which has been drafted on the basis of the report of the Committee on Fair Wages is the first step in the realisation of labour's dreams of a living wage which has been vouchsafed to it by the Constitution. The ultimate expectations have, however, to be tempered with immediate possibilities and hence the emphasis that the Bill places on the limit to fair wages being set by the capacity of industry to pay. It has, however, equally clearly been laid down that an employer to whom the provisions of the Bill apply shall in no circumstances pay his employees a wage less than the minimum wage described therein, irrespective of the capacity of the industry or the unit. The fair wage contemplated in the Bill will, so long as the cost of living index number exceeds a slab of 185 to 200 (the cost of living index number of 1939 being taken as 100), consist of a basic rate and a cost of living allowance, the latter to be adjusted according to such graduated scales as may, from time to time, be prescribed by the appropriate Government. There are also provisions in the Bill relating to the fixation of wage differentials, the calculation of over-time, the principle of equal pay for equal work and the revision of fair rates of wages from time to time.

3. It must, however, be mentioned that the principles for the determination of fair wages mentioned in Chapter IV of the Bill are, by the very nature of the concepts therein embodied, not always susceptible of exact or meticulous definition and are, therefore, more in the nature of directive and suggestive principles to be borne in mind by the wage-fixing machinery than as exact definitions complete in themselves and capable of immediate translation into final decisions. And yet, Government feel that it is an advantage to include them in the legislation both as an indication of the lines on which the various wage-fixing bodies should approach this vital and complex problem and as a guide which will facilitate co-ordination and the maintenance of uniform standards throughout the country.

The Report was discussed in the meeting of the Central Labour Advisory Council on the 29th July, 1949 and was unanimously adopted. Fair Wages Bill incorporating the recommendations of the Committee was introduced in the Provisional Parliament on the 4th August, 1950. The fair wages, suggested by the Fair Wages Bill, are a compromise between the living and minimum standards and the principles for the determination of fair wages have been laid down. They are, by the very nature of the concepts therein embodied, not always susceptible of exact or meticulous definition and are therefore more in the nature of directive and suggestive principles to be borne in mind by the wage fixing machinery than as exact definitions complete in themselves and capable of immediate translation into final decisions. The Act will apply to factories and mines in the first instance and to the employees drawing Rs. 200/- per month or less.

The Fair Wages Committee and following its recommendations, the Fair Wages Bill made a distinction between "minimum wage," "fair wage" and "living wage." The "minimum wage" must provide not merely for the bare sustenance of life but for the preservation of the efficiency of the worker by providing for some measure of education, medical requirements and amenities. It is the absolute minimum below which the wages should not be allowed to fall. The "living wage" represents a standard of living which provides not merely for a bare physical subsistence but for the maintenance of health and decency, a measure of frugal comfort and some insurance against the most important misfortunes of life. The "fair wage" is generally higher than "minimum wage" but lower than "living wage" and will ensure to the workers not only the necessities like food, housing and education but also a reasonable amount of comfort. According to the Committee, the lower limit of a fair wage would obviously be the minimum but the upper limit would clearly be the capacity of the industry to pay. The fixation of the fair wage depends upon (i) the productivity of labour, (ii) the prevailing rates of wages, (iii) the level of national income and its distribution and (iv) the place of the industry in the economy of the country.

The Bill lapsed on the dissolution of the Provisional Parliament.

Planning Commission & Indian Labour Conferences

The Planning Commission in the First Five Year Plan has recommended that for important industries separate Wage Boards would be found very helpful and such Wage Boards might be established at the Centre to which issues affecting an industry in the country as a whole might be referred. The Commission has also recommended that permanent Wage Boards with tripartite composition should be set up in each State and also at the Centre to deal comprehensively with all the aspects of the question of wages, to collect necessary data and initiate enquiries and to review the situation from time to time and also to take decisions regarding wage adjustments *suo motu* or on reference from the Government or parties.

4. The machinery contemplated for the fixation of fair wages is largely on familiar lines—tripartite Wages Boards co-ordinated by an all India Appellate Body. The technical aspects of the working of Wages Boards, for example, publication, commencement and period of operation of awards and similar matters, are on the lines provided for in the Labour Relations Bill. The Act applies in the first instance to factories and mines, but is capable of extension by notification to other classes of establishments where a manufacturing or mining process is carried on.

5. The Fair Wages Bill, in its present form, is undoubtedly a novel experiment in the field of wage regulation, for it is not often that enactments of this kind provide for anything more than a bare machinery for fixation of wages. If then, Government have tried to include in the Bill something more than is usual or conventional, it is because they have tried to give expression, inadequately perhaps, to the hopes and aspirations of a class of wage-earners who occupy a strategic position in the economy of the country. (Gazette of India, 1950, Part II—Sec. 2, page 329).

The question of establishing a Standing Wage Fixing Machinery in the form of Wage Boards for determining and reviewing the rates of wages for the different categories of workers and for watching the wage levels in the country at all times for consideration of any adjustment, if necessary, was discussed in the Thirteenth Session of the Indian Labour Conference held at Mysore in January, 1954. The Conference recommended that the Fair Wages Bill of 1950 should not be revived and Wage Boards should be set up at central levels.

Certain amendments to the Minimum Wages Act, 1948 prepared by the Ministry of Labour were placed in the Fourteenth Session of the Indian Labour Conference held at Bombay in May, 1955 and the amendments proposed creation of permanent machinery for fixation of minimum wages, validation of minimum wages fixed during the intervening period, first priority for wages in contractors' assets, etc.

The Draft outline of the Second Five Year Plan has also recommended immediate setting up of tripartite Wage Boards in all industries for settling wages disputes.

Wage Boards to Standardise Wages

The Deputy Labour Minister informed the Lok Sabha that Wage Boards for standardisation of wages have been set up for a number of industries apart from those constituted under the provisions of the Minimum Wages Act, 1948. The Central Government has constituted a Central Wages (Standardisation) Board for the Cement Industry and several State Governments have set up Wages (Standardisation) Boards for this industry. The Bihar Government has constituted a Committee for standardising wages in sugar industry. The Bombay Government has set up a Wage Board for cotton and silk textile industries.

MINIMUM WAGES ACT, 1948 (XI OF 1948)

Statement of Objects and Reasons¹

The justification for statutory fixation of minimum wages is obvious. Such provisions which exist in more advanced countries are even more necessary in India, where workers' organizations are yet poorly developed and the workers' bargaining power is consequently poor.

2. The Bill provides for fixation, by the Provincial Governments, of minimum wages for employments covered by the schedule to the Bill. The items in the schedule are those where sweated labour is most prevalent or where there is a big chance of exploitation of labour. After a time, when some experience is gained, more categories of employments can be added and the Bill provides for additions to the schedule. A higher period is allowed for fixation of minimum wages for agricultural labour as administrative difficulties in this case will be more than in the other employments covered by the schedule. The Bill also provides for periodical revision of wages fixed.

3. Provision has been made for appointment of Advisory Committees and Advisory Boards, the latter for co-ordination work of the Advisory Committees. The Committees and the Boards will have equal representation of employers and workmen. Except on initial fixation of minimum wages, consultation with the Advisory Committees will be obligatory on all occasions of revision.

4. In cases where an employer pays less than the minimum wages fixed by the Provincial Governments, a summary procedure has been provided for recovery of the balance with penalty and for subsequent prosecution of the offending party.

5. It is not ordinarily proposed to make any exemptions in regard to employees of undertaking belonging to the Central Government except that difficulties might arise where the sphere of duty of such an employee covers more than one Province and where the rates of minimum wages, fixed by the different Provinces may be different. For this purpose, a provision has been included that the minimum wages fixed by a Provincial Government will not apply to employees in any undertaking owned by the Central Government or employees of a Federal Railway, except with the consent of the Central Government.

2. AMENDING ACT OF 1950 (LVI OF 1950)

Statement of Objects and Reasons²

Under clause (a) of sub-section (1) of section 3 of the Minimum Wages Act, 1948 (XI of 1948), the appropriate Governments were required to fix minimum rates of wages in respect of the employments specified in Part I of the Schedule to the Act before the 15th March, 1950. The Union Government and most of the State Governments, for one reason or the other, have not been able to fix minimum rates of wages in respect of those employments by the stipulated date. Steps, however, are being taken to fix the rates as early as possible. The minimum rates of wages fixed after the 15th March, 1950 or any action taken under the enactment after that date could be contended as bad in law, because action was not taken within the period specified in the Act. To get over this difficulty and also to legalise the actions taken by the appropriate Governments regarding the fixation of minimum rates of wages in those employments after the 15th March, 1950, the Minimum Wages (Extension of Time) Ordinance, 1950, was promulgated. Since the Ordinance will, under Article 123 of the Constitution of India, cease to operate after six weeks from the reassembly of the next session of the Parliament, it is necessary to replace it by an Act. This Bill which is self-explanatory has, therefore, been brought before the Parliament.

3. AMENDING ACT OF 1951 (XVI OF 1951)

Statement of Objects and Reasons³

Under clause (a) of sub-section (1) of section 3 of the Minimum Wages Act, 1948, as amended by the Minimum Wages (Amendment) Act, 1950, the appropriate Governments are required to fix minimum rates of wages in respect of the employments specified in the Schedule to the Act before the 15th March, 1951. But not all State Governments have been able to do so up till now.

With respect to the employments specified in Part I of the Schedule, some State Governments require an extension of time for fixation of minimum rates of wages, and it is, therefore, proposed to extend the time limit up to the 31st March, 1952.

With respect to employment in agriculture specified in Part II of the Schedule, most State Governments have expressed their inability to fix minimum rates of wages within the time prescribed as considerable difficulties are involved in the process, particularly when it has to be undertaken on a country-wide scale and so as to cover all classes of employment in agriculture. After careful consideration the Central Government have come to the conclusion that State Governments should, in regard to fixation of minimum rates of wages in agriculture, be allowed some discretion in the matter of its enforcement, particularly with reference to the date of enforcement and the areas in which and the employees with respect to whom the powers may be exercised. Sub-clauses (1)(a)(ii) and (2) of clause 2 make due provision in this behalf.

With respect to employments added to Part I or Part II of the Schedule, as the case may be, by notification under section 27 of the Act, the Act now provides that the date of enforcement shall be two or three years from the date of the notification. In such cases also it would be much better to empower the appropriate Government to notify the date of enforcement for fixation of minimum rates of wages.

4. AMENDING ACT OF 1954 (XXVI OF 1954)

Statement of Objects and Reasons⁴

Under sub-clause (i) of clause (a) of sub-section (1) of Section 3 of the Minimum Wages Act, 1948 (XI of 1948), the appropriate Governments were required to fix minimum rates of wages in the employments listed in Part I of the Schedule before the 31st March, 1952. Since the Act was extended to Part B States only with effect from the 1st April, 1951, they had to complete all formalities required for fixing minimum wages within a period of less than one year with the result that it has not been possible for them to fix minimum wages in all cases. Moreover, the rates fixed after the 31st March, 1952 have no validity in law. In order to remove these legal difficulties and to give some more time to the States

³ Gazette of India, 1951, Part II—Section 2, page 131.

⁴ Gazette of India Extraordinary, 1953, Part II—Section 2, pages 117-118.

for enforcing the provisions of the Act it is proposed to extend the time-limit for fixing minimum rates of wages in employments mentioned in Part I of the Schedule to the 31st December, 1953.

2. It is also proposed to provide for the fixation of rates in respect of those scheduled employments for which no minimum rates of wages were initially fixed—in view of the proviso to clause (b) of sub-section (1) of section 3—within one year from the date on which the appropriate Government is satisfied that no less than one thousand employees are engaged in the employment in the whole State.

3. Similarly, when new items are added under the powers conferred under section 27 of the Act, the amending Bill provides that minimum wages in respect of those items should be fixed within one year from the date of issue of the Notification under section 27 of the Act.

4. As the object of the Minimum Wages Act is to provide safeguards for labour in what are called sweated industries, it is proposed to amend section 26(1) so that the appropriate Government has power to direct that minimum rates of wages may not be fixed in respect of employees whose wages average seventy-five rupees or more per month if the wages are computed on a monthly basis or rupees three or more per day, if computed on a daily basis. As the Act stands at present, minimum wages have to be fixed for all classes of employees in the Scheduled employments including those in whose cases there is no real need to do so.

SOCIAL SECURITY LEGISLATION

SOCIAL SECURITY LEGISLATION

SOCIAL SECURITY LEGISLATION

Social Security, Social Insurance and Social Assistance

"Social Security is the security that society furnishes, through appropriate organisation, against certain risks to which its members are exposed. These risks are essentially contingencies against which the individual of small means cannot effectively provide by his own ability or foresight alone or even in private combination with his fellows."¹ These risks are sickness, maternity, invalidity, employment injuries, unemployment, emergency expenses, old age and death. It is the security against the above risks which the individual member of the society can not effectively provide by his own ability or in combination with others. Social security is considered in modern states as indispensable to strike at the root of poverty, unemployment and disease. It includes security of employment, security of income and security of the ability to work and this can be assured by a system of social insurance and social assistance schemes covering these risks. Social security is a comprehensive system which aims at an unified approach covering all individuals and all risks. Social insurance or social assistance provides only partial security and they are two main divisions of social security. The social security system thus consists of the complex of social insurance and social assistance schemes.

Social security systems in most of the countries have been introduced not according to one comprehensive plan as was done in U. S. A. in 1935 and New Zealand in 1938 but built up piece by piece. Social insurance has been first introduced and where necessary, it has been co-ordinated and integrated with social assistance schemes. "A social assistance scheme provides benefits for persons of small means granted as of right in amounts sufficient to meet a minimum standard of need and financed from taxation and a social insurance scheme provides benefits for persons of small earnings granted as of right in amounts which combine the contributory effort of the insured with subsidies from the employer and the State."² The range of contingencies or risks covered by social insurance extends to sickness, maternity, employment injury, invalidity, old age, death of the breadwinner, unemployment and emergency expenses. The present-day development shows that social insurance and social assistance are moving closer to one another and social insurance tends to absorb social assistance in its final development. Social security measures, therefore, provide a basic income in case of inability to work including old age, inability to obtain remunerative work or the death of a breadwinner; assistance for dependent children and comprehensive medical care.

Early Social Security Measures

The system of compulsory social insurance was first initiated in Germany by Chancellor Bismark; compulsory scheme of sickness, industrial injury and burial insurance were introduced in Germany from 1883 to 1885 and the insurance for old age and invalidity pensions were introduced in 1889.

Social Security Systems in U. S. A.

The Social Security Act of 1935 in U. S. A. was the first concerted nationwide attack by all levels of government on problem of economic security for wage earners and their families. The major social security programmes "include a Federal social insurance system—old age and survivors' insurance—which insures the overwhelming majority of the working population against the loss of earnings

resulting from old age or the death of the family bread-winner. Most workers in industry and commerce are protected against temporary interruption of earnings due to unemployment through a Federal-State programme by each of the 48 States. By means of a tax-offset device, the Social Security Act encouraged the individual States to enact and administer these unemployment insurance programmes. The third income-maintenance programme established by this Act is a Federal-State programme of assistance to special groups of persons in financial need: the aged, the blind, dependant children and permanently and totally disabled persons. The public assistance programme is administered by the several States with Federal financial participation. The 1935 Act also provided Federal grants-in-aid to the States for improving and strengthening their maternal and child health services, services for crippled children and child welfare services. Federal responsibility for these basic social security programmes, originally placed in the Social Security Board is now (except for unemployment insurance) vested in the Social Security Administration of the Department of Health, Education and Welfare.”³

Social Security Systems in New Zealand

The Social Security Act of 1938 is a single legislative enactment which incorporates all social security benefits and provides for financing of a united scheme. The Act came into force on the 1st of April, 1939. “In New Zealand, social security is regarded basically as a comprehensive system of State assistance in the form of, first, cash benefits to provide subsistence to those who may suffer want through age, sickness, widowhood, orphanhood, unemployment or other exceptional conditions and secondly, a universal health service designed to maintain and promote the health and general welfare of the community.”⁴

Social security systems in New Zealand are divided into three heads:—
(1) cash benefits, (2) health benefits and (3) finance.

The cash benefits are administered by the Social Security Department under the direction of Social Security Commission and include the following: (a) superannuation benefits; (b) widows' benefits; (c) orphans' benefits; (d) family benefits; (e) invalids' benefits; (f) miners' benefits; (g) sickness benefits; (h) unemployment benefits; (i) emergency benefits; (j) war service men's dependant's allowance. The emergency benefits are payable to any person who by reason of age, or physical and mental incapacity, cannot earn sufficiently and is not getting any other cash benefit. The war service men's dependants' allowance is a novel method integrating war pension scheme with social security system and is payable to the parents of the deceased service men.

The health benefits available to resident population are administered by the Department of Health and include the following—(a) maternity benefits; (b) hospital benefits; (c) medical benefits; (d) pharmaceutical benefits and (e) supplementary benefits consisting of x-ray, massage, nursing, laboratory and dental services.

Financing of the social security scheme is made from the Social Security Fund consisting of social security contribution at the flat rate of $7\frac{1}{2}$ per cent on all salaries, wages and other income received by any person of 16 years of age and over and resident in the country and most companies resident in New Zealand and annual grants from the Consolidated Fund of the Government.

The employment injury benefits are not covered under the social security scheme and are governed under the provisions of the Workers' Compensation Act, 1922 which provides for compulsory insurance of employees against injuries

received in course of their employment and are administered by the State Fire and Accident Insurance Office.

Social Security Systems in Great Britain

The social insurance was developed in England with the Workmen's Compensation Act of 1897. The National Health Insurance Act of 1911 inaugurated a scheme of compulsory insurance of manual workers between the ages of 14 and 65 in England against ill-health and unemployment. The Old Age Pensions Act of 1908 was an example of national assistance in England. Sir William Beveridge was appointed in June, 1941 to prepare a unified scheme of Social Security and his Report on Social Insurance and Allied Services published in November, 1942 is a well-known treatise on Social Security. The main principles of the Beveridge Plan were accepted by the Government in February, 1943 and given effect to in a series of laws.

The Family Allowances Act of 1945 which came into force on the 6th August, 1946, is the first post-war social security legislation in England and it provides for the payment of allowance for each child in the family other than the elder or eldest at the rate of five shillings a week from the date of birth up till the age of 16 years whilst the child continues in full time education or is an apprentice. There are no income limits attached to the receipt of this allowance.

The National Insurance Act of 1946 which has come into operation on the 5th July, 1948, provides for a unified and comprehensive scheme of national insurance which applies to every one in Great Britain over school leaving age and establishes "an extended system of national insurance providing pecuniary payments by way of unemployment benefit, sickness benefit, maternity benefit, retirement pension, widows' benefit, guardian's allowance and death grant".

The National Insurance (Industrial Injuries) Act of 1946 which came into force on the 5th July, 1948, replaces the Workmen's Compensation Acts of 1925-1945 and provides for injury benefit, disablement benefit and death benefit to the insured injured as well as his dependants for personal injuries caused by accident arising out of and in course of his employment and also for prescribed diseases due to the nature of his employment. Claims for benefits under the National Insurance Acts are dealt with by independent statutory authorities.

Risks or needs not covered by these two Acts are covered by the National Assistance Act of 1948 which came into force on the 5th July, 1948 and which provides for a unified scheme of financial assistance to persons in need, in replacement of the different poor law services provided by the State and local authority. It makes further provisions for the welfare of the disabled, sick, aged, etc. and for regulating charities and homes for them. Under the new scheme of national assistance, any person aged 16 or over, who is without sufficient means of support, can apply to National Assistance Board.

The National Health Service Act of 1946 which also came into force on the 5th July, 1948, provides for the establishment of a comprehensive "free for all" national health service—medical treatment, hospitalisation, dental attention, etc., available for all citizens without exception and without distinction whether they are in the National Insurance Scheme or not. The State is subsidising the new health services to the tune of several million pounds.

The National Insurance, National Assistance, Industries Injuries, Family Allowances and National Health Service Acts complete a triad of social security measures envisaged in the great Social Security Plan in Great Britain which seeks to better the lot of common man and promote the social security and health of every citizen, rich or poor, from the cradle to the grave, and which is without parallel in its magnitude in any other country in the world.

International Standards on Social Security

The International Labour Organisation has adopted a series of Conventions and Recommendations from 1919 to 1952 laying down International Standards for workmen's compensation, sickness insurance, pension insurance, invalidity, old age and survivors' insurance, maternity protection, unemployment provision and social security with the object to search for a sound solution of the problem of insecurity of the workers and to provide a basic income to all in need of protection and comprehensive medical care.

Comprehensive social security measures have been suggested in the Income Security Recommendation No. 67 and the Medical Care Recommendation No. 69 adopted at the twenty-sixth session held at Philadelphia on the 20th April, 1944 and the Social Security (Minimum Standards) Convention No. 102 adopted at the thirty-fifth session held at Geneva on the 4th June, 1952. Recommendation No. 67 on income security advocates building up of an income security organisation comprising a unified social insurance scheme supplemented by a social assistance scheme. Recommendation No. 69 on medical care deals with the medical care service designed ultimately to embrace the entire population. Social Security (Minimum Standards) Convention No. 102 covers nine branches of social security—(1) medical care, (2) sickness benefit, (3) unemployment benefit, (4) old age benefit, (5) employment injury benefit, (6) family benefit, (7) maternity benefit, (8) invalidity benefit and (9) survivors' benefit and prescribes minimum standards for each branch of social security relating to conditions, rate and duration of benefits. The Convention also contains a special provision that for the purpose of ratification, at least three out of the above nine branches of social security should be adopted, as it will not be possible for all countries to enact legislations covering all the nine benefits. The Convention is in force in seven countries.

Social Security Systems in India

Social security systems as mentioned before and prevalent in U. K., U. S. A. and New Zealand, are still in the infant stage of development in India. The workmen's compensation, maternity benefit and provident fund laws undertaken by the Central and State Governments from 1923 onwards embody the principle of social insurance on a limited scale for certain specified categories of wage earners. The workmen's compensation and maternity benefit legislations have developed out of the doctrine of employer's liability.

The subject of health insurance for industrial workers are first discussed in the Indian Legislature in 1927 when the question of ratification of the two I. L. O. Conventions 24 and 25 came up for discussion. The Government of India accepted the view that there was necessity for making some provisions for the workers during sickness but expressed their inability to ratify the two Conventions on the ground of practical difficulties. The Government invited suggestions from the Provincial Governments about the possibility of introducing provisions against sickness. The Government did not take any step on receipt of the reports of the Provincial Governments in view of the impending appointment of the Royal Commission on Labour in India, which was appointed in 1929. The Royal Commission reviewed the reports of the Provincial Governments and suggested a tentative scheme based on the assumption that the responsibility for the medical and financial benefits should be separated, the former to be undertaken by the Government on a non-contributory basis and the latter through employers on contributory basis by the employers and workers. The Royal Commission also discussed the problem of old age provisions and recommended that until it was found practicable to institute schemes of old age pensions or provident funds, the Government should encourage private employers to inaugurate such schemes.

The subject of health insurance was discussed in the first, second and third conferences of Labour Ministers held in 1940, 1941 and 1942 and Prof. B. P. Adarkar was appointed as a Special Officer in 1943 to prepare a scheme of health insurance of industrial workers. Prof. Adarkar's Report submitted in 1944 was examined by two I. L. O. experts and after discussing the revised scheme in the sixth Labour Conference held in 1944 and in the sixth meeting of the Standing Labour Committee held in 1945, the Government of India introduced a Bill in the Dominion Legislature on 2nd April, 1948 which was passed and became the Employees' State Insurance Act, 1948.

Social Security Legislations in India

The Employees State Insurance Scheme of 1948, the Provident Fund Scheme for coal miners introduced in 1948 and the Employees Provident Fund Scheme implemented in six major industries in 1952 represent important steps towards social security legislations undertaken by the Government of India. The Employees State Insurance Scheme is the first of its kind in South East Asia.

The existing Social Security Legislations in India are, as follows:—

1. Workmen's Compensation Legislation

Workmen's Compensation Act of 1923 applies to workers earning Rs. 400/- per month and protects them against accidents involving incapacity, permanent disability and death.

2. Maternity Benefit Legislation

Maternity Benefit Acts enacted by different State Governments make statutory provisions for grant of maternity benefits to women workers. Mines workers are covered under the Mines Maternity Benefit Act of the Central Government.

The question of uniformity in legislation relating to maternity benefits was discussed in the thirteenth session of the Indian Labour Conference held in January, 1954. The Government of India drew up Model Minimum Standards for Maternity Benefit Legislation keeping in view the provisions of the I. L. O. Conventions and Recommendations and the existing State Maternity Benefit Acts and the Central Acts covering maternity benefits, viz., the Mines Maternity Benefit Act, 1941, the Employees' State Insurance Act, 1948 and the Plantations Labour Act, 1951 and forwarded the same to the State Governments for adoption, either by enactment of fresh legislation or by revision of the existing laws where necessary.

3. Social Insurance Legislation

The Employees' State Insurance Act, 1948 is a step towards building up of a social security code for workers in India. The Act applies, in the first instance, to perennial factories and covers all employees earning a monthly salary of Rs. 400/- but it can be extended to other classes of employees. The Act provides for five benefits, viz., sickness, maternity, disablement, medical and dependants' benefits. The Act is being brought into force by stages in different States and areas. It is expected that the Act will be implemented in the rest of the country within the shortest possible time. With the full implementation of the Act, all over India, the provisions of the workmen's compensation and maternity benefit laws will be gradually repealed.

Though the Act is at present limited in its scope and provides for five kinds of benefits, it is hoped that in course of time it will also cover all other benefits of social security including unemployment. The desirability of introducing an un-

employment insurance scheme in the place of the present provisions of lay-off and retrenchment compensation was discussed in the 14th session of the Indian Labour Conference held in Bombay in 1955 but no final decision was arrived at. The Government is considering an unemployment scheme which will complete the frame work of social insurance in India. The Working Group on Unemployment Insurance appointed by the Government has prepared the scheme intrigrating it in the existing State Insurance and Provident Fund Schemes under one unified central administration.

A modest beginning in the direction of unemployment insurance scheme has already been made with the amendment of the Industrial Disputes Act in 1953. The Amending Act lays down that the workers who have rendered a year's continuous service or more cannot be retrenched without giving one month's notice or wages in lieu thereof as well as compensation for retrenchment or lay-off, calculated at the rate of 15 days' average pay for every complete year of service or part thereof in excess of 6 months. The provisions of the Amending Act at present apply to the workers in major industries, plantations and working journalists.

4. Provident Fund Legislation

There was no law governing provident funds in private industries till 1929 when a new Chapter IX-A was inserted in the Indian Income-tax Act, 1922 by section 5 of the Indian Income Tax (Provident Fund Relief) Act, 1929 (XII of 1929). This new Chapter made provisions for the recognition of provident funds by the Income-tax Commissioners to enable the employers to claim deduction for income tax purposes. Certain conditions have been prescribed which have to be fulfilled by a provident fund before it is recognised by the Commissioner.

The Provident Fund Act, 1925 which came into force on 27th August, 1925 deals with provident funds relating to government servants, railway administration and local authorities. The Act lays down rules for protection of compulsory deposits and repayment of sums standing to the credit of a subscriber after his dismissal or resignation.

The position of provident funds in private industries in 1946 has been nicely summarised by the Labour Investigation Committee⁵ in their Main Report published in 1946. The establishment of compulsory provident fund for industrial workers was discussed in the 10th meeting of the Standing Labour Committee and also in the 9th session of the Indian Labour Conference, both held in April, 1948. As a measure of social security for workers in coal mines, a scheme of compulsory contributory provident fund was instituted by enactment of the Coal Mines Provident Fund and Bonus Schemes Act in 1948.

Coal Mines Provident Fund and Bonus Schemes Act, 1948

The Coal Mines Bonus Scheme announced in July, 1948 applied to mines in West Bengal and Bihar with retrospective effect from May, 1947 and to those in Madhya Pradesh and Orissa from October, 1947. It was subsequently extended to Vindhya Pradesh, Hyderabad, Rajasthan and Assam. Bonus is given to persons getting up to Rs. 300/- a month as basic wages, and the employees covered under this Scheme are entitled to $\frac{1}{3}$ of their basic earning as quarterly bonus.

Coal Mines Provident Fund Scheme was applicable to coal mines in West Bengal and Bihar with retrospective effect from May, 1947 and to mines in Madhya

Pradesh and Orissa from October, 1947. It was subsequently extended to Assam, Vindya Pradesh, Hyderabad, etc.

The membership of the provident fund is compulsory for all employees earning bonus by conforming to a prescribed minimum attendance in a quarter and the employees contribute about $\frac{1}{16}$ th of their total earnings with the employers contributing a like amount.

Workers' Provident Fund Bill, 1948

A private member's Bill—Sri R. K. Sidhwa's Workers' Provident Fund Bill was introduced in the Constituent Assembly in February, 1948 for compulsory provident funds for all factory workers and certain section of transport workers earning Rs. 20/- or more per month. The Bill was circulated for eliciting public opinion and when it was taken for discussion on the 16th December, 1949 in the Constituent Assembly, on the assurance of the Labour Minister about bringing a comprehensive measure for introduction of provident fund for all categories of employees, the Bill was withdrawn.⁶

Employees' Provident Funds Act, 1952

The success of the Coal Mines Provident Fund Scheme led to a demand for introduction of similar schemes for workers in other industries. The question of provident fund for industrial workers was discussed in the 12th meeting of the Standing Labour Committee held in November, 1950. In November, 1951, the President of India promulgated the Employees' Provident Funds Ordinance, 1951, as the Parliament was not in session. The Ordinance was subsequently replaced by the Employees' Provident Funds Act, 1952 which came into force on 1st November, 1952 in cement, cigarette, engineering (electrical as well as mechanical), iron and steel, paper and textile industries. It covers factories in these industries which employed 50 or more persons but does not include those with less than 3 years of existence and factories owned by the Government and local authorities. The administration of the Employees Provident Fund vests in a tripartite body known as the Central Board of Trustees consisting of representatives of Central and State Governments, employers and workers. The employer's contribution to the Fund has been fixed at 6 $\frac{1}{4}$ % of the basic wages and dearness allowance paid to an employee who will contribute a like amount which will be deducted from his wages. As many private firms have provident funds, there is a provision in the Act exempting those factories where the employees enjoy benefit in the nature of provident fund, pension or gratuity which are on the whole not less favourable than those provided under the Act. The Act was amended in 1953 to remove certain administrative difficulties.

Extension of the Employees' Provident Funds Act to Additional Industries

The Planning Commission in the First Five Year Plan has recommended that the scheme should be extended to other industries after it has been established on a firm footing and more experience has been gained in its practical working.

The question of extending the provisions of the Employees' Provident Funds Act to certain additional well-established industries was considered at the fifth meeting of the Central Board of Trustees held on the 28th March, 1955 and also in the fourteenth session of the Indian Labour Conference held at Bombay on the 14th, 15th and 16th May, 1955. Summing up the discussions of the Labour Conference, the Central Labour Minister referred to the extension of the Provident Funds Act and felt that it would indirectly create a certain amount of resources

⁶ Constituent Assembly of India (Legislative) Debates, 1949, Part II—Vol. VI, p. 671.

which would be utilised for the amelioration of the condition of workers and stressed the necessity of resolving the problem by talking across the table.

The Draft Outline of the Second Five Year Plan has also recommended to extend the Provident Fund Scheme to cover industries and commercial establishments not yet included in its scope. The rate of contribution is proposed to be enhanced from $6\frac{1}{4}\%$ to $8\frac{1}{2}\%$ and its financial aspects are under consideration.

WORKMEN'S COMPENSATION LEGISLATION

First Social Insurance Legislation in India

The Workmen's Compensation Act was the first and most important piece of social insurance legislation in India. The demand for compensation in the case of fatal or serious accidents was made by industrial workers since 1884. Formerly if a worker sustained injuries in course of his employment, his employer was not bound to compensate him except in so far as the accident took place due to the personal negligence of the employer. Under the Fatal Accidents Act of 1885, the employers could be sued for compensation in case of death arising from accidents.

Workmen's Compensation Act, 1923 (VIII of 1923)

Proposals for Workmen's Compensation Act was first announced by the Government of India in 1921 and was accepted by the majority of Local Governments and by employers' and workers' associations. The Bill introduced in the Legislative Assembly on 13th September, 1922 mentioned that though the general principles of workmen's compensation commanded universal acceptance, India was alone amongst civilized countries without legislation embodying these principles. The Workmen's Compensation Act was passed on 5th March, 1923 (VIII of 1923) and came into force on 1st July, 1924. The Act followed the English model in its main principles and some of its provisions were borrowed from the English legislation, but its scope was much more limited.

Object of the Workmen's Compensation Act, 1923

The object of the Act was to impose an obligation upon certain classes of employers to pay compensation to their manual workers for accidents arising out and in course of employment and resulting in death or total or partial disablement for a period exceeding 10 days. Compensation is also payable for some occupational diseases. Occupations covered by the Act are enumerated and amount of compensation to be paid are laid down. The amount of compensation payable is correlated to the level of worker's wages and the nature of injury sustained by him. The clerical staff as well as workers whose salaries exceed Rs. 300/- a month are excluded from its scope.

Administration of the Act

The administration of the Act is entrusted to the State Governments who appoint Commissioners for Workmen's Compensation for settlement of the questions arising in the proceedings under the Act. Every employee is required to report all fatal accidents to the Commissioner who can require the employer to submit the case and to state whether he accepts the liability or not. If the employer accepts, he has to deposit the due sum to the Commissioner. Any contract concluded between the employer and the worker with regard to the amount of compensation will be declared null and void unless the same is registered with the Commissioner. The Central Government is authorised to include, by noti-

fication, any other classes of workers who are employed in hazardous occupations and also to add to the list of occupational diseases.

Amendment of the Act in 1924 and 1925

The Act was amended in 1924 by the Repealing and Amending Act of 1924 (VII of 1924) and in 1925 by the Repealing and Amending Act of 1925 (XXXVII of 1925).

Workmen's Compensation (Amendment) Act 1926 (XXIX of 1926)

The International Labour Conference adopted a Convention in 1925 concerning Workmen's Compensation (Occupational Diseases) and the Central Government, after ratification of the said Convention, amended the Workmen's Compensation Act in 1926 (XXIX of 1926) making necessary changes in the list of occupational diseases.

Workmen's Compensation (Amendment) Act, 1929 (V of 1929)

The Act was again amended in 1929 (V of 1929) for effecting certain changes of non-controversial character.

Workmen's Compensation (Amendment) Act, 1933 (XV of 1933)

Though amended and extended, the Act was found still inadequate. The Royal Commission on Labour recommended the extension of the scope of the Act, the addition of new occupational diseases, the increase of the scale of benefit and the administration of the Act by specially qualified Commissioners. On the basis of these recommendations, the Workmen's Compensation (Amendment) Act was passed in 1933 (XV of 1933) which came into force on 1st July, 1934. The important provisions of the Amending Act were (1) the scope was extended to include new industries and occupations and also new occupational diseases, (2) the scale of benefit was increased and the number of wage classes was raised from 14 to 17 and amount of compensation for death was raised from Rs. 500/- to Rs. 4,000/- and compensation for permanent total disablement increased to Rs. 5,000/-, (3) the waiting period for compensation was reduced from 10 to 7 days, (4) widows, daughters and sisters were included amongst dependants for compensation, (5) the Governor-General in Council was granted power to arrange for transfer of compensation to a foreign country in case of person residing abroad and also for administration of compensation awarded under the law of a foreign country for the benefit of a person residing in India. The Act thus revised, covers railways, tramways, factories, mines, docks, tea, coffee, rubber or cinchona plantations, electricity or gas generating stations, workers engaged in construction, demolition or repairs to certain buildings, roads, bridges or tunnels, operations relating to telegraph, telephone or overhead electric lines, cinematograph works and underground sewage workers. The Act granted wide powers to the Central Government for extension of the scope of the Act and for making rules for giving effect to the provisions of the Act. All these powers were transferred to the Provinces after 1st April, 1937.

Workmen's Compensation (Amendment) Act, 1937 (VII of 1937)

The Act was further amended in 1937 (VII of 1937) with a view to transfer payments relating to workmen's compensation when the dependants of workmen were in another country than the one in which compensation was deposited. This was necessitated in connection with the separation of Burma from India. The amendment permitted such transfer between Burma and India after separation.

Workmen's Compensation (Amendment) Act, 1938 (IX of 1938)

The Act was again amended in 1938 (IX of 1938) to rectify certain ambiguities and defects found in course of administration of the Act. The scope was extended to cover liftmen and men employed in tapping palm trees and in hunting wild animals and some occupational diseases were also added to the Schedule. The period of limitation for preferring claim for compensation for accident was extended from 6 months to 1 year. The Act empowered a life insurance agent or a registered trade union officer duly authorised or any person with the permission of the Commissioner to appear before the Commissioner on behalf of the injured man or his beneficiary.

Workmen's Compensation (Amendment) Act, 1939 (XIII of 1939)

The Act was further amended in 1939 (XIII of 1939) clarifying the meaning of the term "monthly wages". The Amending Act provides that monthly wages means the amount of wages deemed to be payable for a month's service whether the payment is by the month or not.

Workmen's Compensation (Amendment) Act, 1942 (I of 1942)

The question of further amending the Act concerning several points were discussed at the third Labour Ministers' Conference held in January, 1942. The Act was amended in 1942 (I of 1942) prohibiting double payment of compensation under this Act as well as under War Pensions and Detention Allowances (Mercantile Marine, etc.), Scheme, 1939 or other schemes in respect of personal injuries to seamen. Failure to give notice or make a claim or commence proceedings within the time required by the Act shall not be a bar to the maintenance of proceedings under the Act in respect of the personal injury if an application was made for payment in respect of injury under the above Scheme and if the Provincial Government certifies that the said application was made in the reasonable belief and was rejected.

Workmen's Compensation (Amendment) Act, 1946 (I of 1946)

The seventh meeting of the Standing Labour Committee held on 25th August, 1945 decided to amend the definition of workmen in the Act in order that the concessions granted owing to the rise in the cost of living to higher categories of workmen may not operate to deprive them of the benefits under the Act to which they are entitled. The legislation was undertaken, because the British Government had also altered the Scheme and admitted many others in the category of persons entitled to compensation. The Workmen's Compensation (Amendment) Act, 1946 (I of 1946) enhanced the maximum monthly wage limit of workmen from Rs. 300/- to Rs. 400/- and also amended the Schedule IV prescribing maximum compensation payable at a higher scale from Rs. 4,000/- to Rs. 4,500/- in case of death and from Rs. 5,600/- to Rs. 6,300/- in case of permanent total disablement.

Defects of the Workmen's Compensation Act, 1923

Prof. B. P. Adarkar in his Report¹ on the Health Insurance for Industrial Workers has remarked that the Workmen's Compensation Act "has admittedly become out-of-date in its scope and operation" and that inspite of the tribute of the Royal Commission on Labour about smooth working and success of the Act, "the administration and operation of the Act have been a comparative failure." The Act has no doubt been partially revised on the recommendation of the Royal

¹ Report on the Health Insurance for Industrial Workers by Prof. B. P. Adarkar, 1946, pages 213-217.

Commission, "yet in its practical operation it has been far from satisfactory." Prof. Adarkar, therefore, has recommended that "workmen's compensation must be taken out of the hands of employers and subjected to compulsory insurance." In his opinion "the insurance scheme must be a part of a national programme of social insurance, under which the carrier of insurance is either the State or, preferably, a special tripartite organisation."

Proposal for Amendment of the Workmen's Compensation Act, 1923

In the Five Year Labour Programme of the Central Government drawn up in September, 1946, there was a proposal for revision of the Workmen's Compensation Act.

The Government of India formulated certain proposals in 1953 for amendment of the Workmen's Compensation Act and circulated the same to different organisations for their suggestions. On the receipt of the comments, the Government again drew up new proposals for amendment and invited views and comments of the different interests concerned. The proposed amendment contemplates the following changes in the Act—(1) increase of wage-limit from Rs. 400/- to Rs. 500/-, (2) reducing the waiting period from 7 days to 2 days, (3) amending the amount of compensation at the rates varying from 40% to 50% of the wages, (4) providing for alternative employment to disabled workmen, (5) increasing the period of limitation in respect of notice and claim, (6) replacing Schedule I containing list of injuries resulting in permanent partial disablement by the Schedule in the National Insurance (Industrial Injuries) Benefit Regulations, 1948 and (7) suitably modifying Schedule III containing list of Occupational Diseases for which a Technical Committee with the Deputy Adviser of Factories (Medical) of the Government of India as Chairman is being appointed for advising on the changes and additions to be made in the Schedule.

Employees' State Insurance Act, 1948

With the adoption of health insurance scheme under the Employees' State Insurance Act of 1948, a new chapter has been adopted in the history of social Security legislation in India. The Act is a more comprehensive measure and provides for medical assistance, sickness and maternity benefits, compensation for employment injury and dependants' benefits. The Act accepts the principle of insurance and thus an improvement on the Workmen's Compensation Act.

Any person covered by the Employees' State Insurance Act and entitled to receive compensation for employment injury, will not be entitled to receive any compensation from his employer under the Workmen's Compensation Act.

The Employees' State Insurance Act has at present limited scope and as a modest beginning has been introduced in limited areas. But the scheme under the Act is working smoothly and its benefits being steadily extended in the areas where it is enforced, it is gradually replacing the Workmen's Compensation Act and Maternity Benefit Acts.

WORKMEN'S COMPENSATION ACT, 1923 (VIII OF 1923)

Statement of Objects and Reasons¹

The general principles of workmen's compensation command almost universal acceptance and India is now nearly alone amongst civilised countries which is being without legislation embodying these principles. For a number of years the more generous employers have been in the habit of giving compensation voluntarily, but this practice is by no means general. The growing complexity of industry in this country, with the increasing use of machinery and consequent danger to workmen, along with the comparative poverty of the workmen themselves, renders it advisable that they should be protected, as far as possible from hardship arising from accidents.

¹ Gazette of India, 1922, Part V, p. 313.

2. An additional advantage of legislation of this type is that by increasing the importance for the employer of adequate safety devices, it reduces the number of accidents to workmen in a manner that cannot be achieved by official inspection. Further, the encouragement given to employers to provide adequate medical treatment for their workmen should mitigate the effect of such accidents as do occur. The benefits so conferred on the workman added to the increased sense of security which he will enjoy, should render industrial life more attractive and this increases the available supply of labour. At the same time, a corresponding increase in the efficiency of average workman may be expected. A system of insurance would prevent the burden from pressing too heavily on any particular employer.

3. After a detailed examination of the question by the Government of India, Local Governments were addressed in July 1921, and provisional views of the Government of India were published for general information. The advisability of legislation has been accepted by the great majority of Local Governments and of employers' and workers' associations, and the Government of India believe the public opinion generally is in favour of legislation.

4. In June, 1922, a committee was convened to consider the question. This committee was composed, for the most part, of members of the Imperial Legislature. After considering the numerous replies and opinions received by the Government of India, the committee was unanimously in favour of legislation and drew up detailed recommendations regarding the lines which, in its opinion such legislation should follow. The Bill now presented follows these recommendations closely. A number of supplementary provisions have been added, where necessary, but practically no variations of importance have been made.

5. The Bill contains two distinct proposals. In Chapter II modifications are made in the ordinary civil law affecting liability of employers for damages in respect of injuries sustained by their workmen; these clauses will operate only in actions before the ordinary civil courts. The main part of the Bill makes provision for workmen's compensation and sets up special machinery to deal with claims falling under this category.

6. Both parts of the Bill, however, apply to the same classes of workmen. If the scope of the employers' liability clauses was made wider than the scope of the workmen's compensation provisions there would be considerable danger of a great increase in litigation. The classes included are those whose inclusion was recommended by the committee, and are specified in Schedule II. Two criteria have been followed in the determination of the classes to be included:—

- (1) that the Bill should be confined to industries which are more or less organised;
- (2) that only workmen whose occupation is hazardous should be included.

7. The general principle is that compensation should ordinarily be given to workmen who sustained personal injuries by accidents arising out of and in the course of their employment. Compensation will also be given in certain limited circumstances for disease. The actual rates of compensation payable are based on the unanimous recommendation of the committee. They are in every case subject to fixed maxima, in accordance with the committee's recommendations. It should be remembered, however, that the more highly paid workmen will be enabled, in cases to which the employers' liability clauses will apply to obtain damages on a scale considerably in excess of the maximum fixed for workmen's compensation.

8. A consistent endeavour has been made to give as little opportunity for dispute as possible. Throughout the Bill, in the definitions adopted, the scales selected and the exceptions permitted, the great aim has been precision, in order that, in as few cases as possible should the validity of a claim for compensation or the amount of that claim be open to doubt. At the same time, on the unanimous recommendation of the committee, provision has been made for Special Tribunals to deal cheaply and expeditiously with any disputes that may arise, and generally to assist the parties in a manner which is not possible for the ordinary Civil Courts.

1. AMENDING ACT OF 1929 (V OF 1929)

Statement of Objects and Reasons²

The Workmen's Compensation Act, 1923, came into force on the 1st July, 1924. Since then a number of amendments have suggested themselves or have been proposed by Commissioners for Workmen's Compensation and Local Governments. Some of the latter

² Gazette of India, 1928, Part V, page 153.

proposals involve the modification of the principles underlying the present Act or of its more important features. So far as these are concerned, the Government of India consider it advisable to consult Local Governments and the public generally before forming conclusions. For the present it is proposed to limit the revision of the Act to the amendment of those sections or parts of sections which are admittedly defective and to the introduction of changes which are likely to raise no important controversial points and which will be generally recognised as improvements.

2. AMENDING ACT OF 1933 (XV OF 1933)

Statement of Objects and Reasons³

The Workmen's Compensation Act, 1923, was experimental in character, and since its coming into force on the 1st July, 1924, a number of modifications of its provisions have been suggested by various authorities and interests. A few amendments, which were designed to remedy admitted defects or to embody improvements of a non-controversial character, were effected by the Workmen's Compensation (Amendment) Act, 1929. Those proposals which involved the modification of the principles underlying the Act or its more important features were referred by the Government of India to Local Governments for opinions in a circular letter in 1928. Copies of this circular letter and of the replies received thereto were supplied to the Royal Commission on Labour who have after reviewing the question in the light of further evidence supplied to them, made a number of recommendations on the subject in Chapter XVI of their Report. This Bill follows these recommendations closely; some minor additional provisions have been incorporated, but few variations from the Commission's proposals have been made.

3. AMENDING ACT OF 1937 (VII OF 1937)

Statement of Objects and Reasons⁴

Section 35 of the Workmen's Compensation Act, 1923 (VIII of 1923), enables rules to be made for the transfer of sums paid to Commissioners in India as compensation for the benefit of persons abroad or paid to authorities abroad as compensation for persons in India. But it does not provide for the transfer of distribution proceedings when the employer does not object and the dependants are in another country than the one in which the compensation is deposited. The amendment is designed to make this possible and is required in the first instance, to provide for transfers between Burma and India after separation. At present, distribution proceedings can be transferred from Burma to provinces in India and vice versa under Section 21(2) of the Act; but this will cease to be applicable when Burma becomes a separate country.

4. AMENDING ACT OF 1938 (IX OF 1938)

Statement of Objects and Reasons⁵

A number of ambiguities and minor defects have come to light in recent years in the course of administration of the Workmen's Compensation Act. A Bill to deal with these was prepared in 1936 and Provincial Governments were requested to give it wide publicity and to invite opinions on it. The views received by the Government of India were generally favourable but certain modifications have been made to meet criticisms received and one of the proposals originally made has been omitted as it formed the subject of a separate Act which was passed during the last Delhi Session of the Indian Legislature. The notes on clauses explain the purpose of the present proposals in detail.

5. AMENDING ACT OF 1939 (XIII OF 1939)

Statement of Objects and Reasons⁶

Under the Personal Injuries (Emergency Provisions) Act, 1939, amongst other people, seamen who sustain injuries in certain circumstances are entitled to compensation from the State. Under the Workmen's Compensation Act, 1923 (VIII of 1923) seamen sustaining similar injuries will in certain circumstances be entitled to claim compensation from their employers. To prevent the possibility of this double claim for the same injuries it is proposed to amend the Workmen's Compensation Act 1923, taking away from seamen

any right to claim compensation under that Act in cases where they are entitled to compensation under Personal Injuries (Emergency Provisions) Act, 1939. A similar provision is contained in the latter Act as regards persons to whom Workmen's Compensation Acts of United Kingdom apply. Provisions are also made in the amending Bill saving limitations under the 1923 Act in cases where a bonafide claim under the 1939 Act is made and rejected.

6. AMENDING ACT OF 1942 (I OF 1942)

Statement of Objects and Reasons⁷

In 1939 the Workmen's Compensation Act, 1923 (VIII of 1923) was amended with a view to relieving shipowners of their liability to pay compensation to seamen under the Act in respect of war injuries for which a payment could be obtained under any scheme of compensation made by the competent authorities in the United Kingdom. Such schemes made in the United Kingdom provide for payment of compensation to seamen serving on ships registered under the Merchant Shipping Act, 1894. The Central Government has now, in pursuance of a Resolution adopted by the Indian Legislature, made scheme called the War Prisoners and Detention Allowances (Indian Seamen) Scheme, 1942, providing for payment of compensation in respect of war injuries sustained by seamen serving on ships registered under the Bombay Coasting Vessels Act, 1838, or under the Indian Registration of Ships Act, 1841. It is, therefore necessary further to amend the Workmen's Compensation Act so as to take away from seamen any right to claim compensation under that Act in cases where they are entitled to compensation under the Scheme made by the Central Government. The present Bill is intended to secure this object. Opportunity has also been taken to insert the specific names of the United Kingdom schemes and to carry out certain formal amendments rendered desirable by the actual provisions of those schemes.

(4) Save as provided by sub-sections (2) and (3), no compensation shall be payable to a workman in respect of any disease unless the disease is ^{39**} directly attributable to a specific injury by accident arising out of and in the course of his employment.

(5) Nothing herein contained shall be deemed to confer any right to compensation on a workman in respect of any injury if he has instituted in a Civil Court a suit for damages in respect of the injury against the employer or any other person; and no suit for damages shall be maintainable by a workman in any Court of law in respect of any injury—

- (ii) in the case of a minor—of one-half of his monthly wages, subject to a maximum of thirty rupees:

Provided that—

(a) there shall be deducted from any lump sum or half-monthly payments to which the workman is entitled the amount of any payment or allowance which the workman has received from the employer by way of compensation during the period of disablement prior to the receipt of such lump sum or of the first half-monthly payment, as the case may be: and

(b) no half-monthly payment shall in any case exceed the amount, if any, by which half the amount of the monthly wages of the workman before the accident exceeds half the amount of such wages which he is earning after the accident.]

(2) On the ceasing of the disablement before the date on which any half-monthly payment falls due, there shall be payable in respect of that half-month a sum proportionate to the duration of the disablement in that half-month.

5. Method of calculating wages.—^{41*} ⁴²[In this Act and for the purposes thereof the expression “monthly wages” means the amount of wages deemed to be payable for a month’s service (whether the wages are payable by the month or by whatever other period or at piece rates), and calculated] as follows, namely:—

(a) where the workman has, during a continuous period of not less than twelve months immediately preceding the accident, been in the service of the employer who is liable to pay compensation, the monthly wages of the workman shall be one-twelfth of the total wages which have fallen due for payment to him by the employer in the last twelve months of that period:

⁴³[(b) where the whole of the continuous period of service immediately preceding the accident during which the workman was in the service of the employer who is liable to pay the compensation was less than one month, the monthly wages of the workman shall be ^{44*} * * the average monthly amount which, during the twelve months immediately preceding the accident, was being earned by a workman employed on the same work by the same employer, or, if there was no workman so employed, by a workman employed on similar work in the same locality;]

6. **Review.**—(1) Any half-monthly payment payable under this Act, either under an agreement between the parties or under the order of a Commissioner, may be reviewed by the Commissioner, on the application either of the employer or of the workman accompanied by the certificate of a qualified medical practitioner that there has been a change in the condition of the workman or, subject to rules made under this Act, on application made without such certificate.

(2) Any half-monthly payment may, on review under this section, subject to the provisions of this Act, be continued, increased, decreased or ended, or if the accident is found to have resulted in permanent disablement, be converted to the lump sum to which the workman is entitled less any amount which he has already received by way of half-monthly payments.

7. **Commutation of half-monthly payments.**—Any right to receive half-monthly payments may, by agreement between the parties or, if the parties cannot agree and the payments have been continued for not less than six months, on the application of either party to the Commissioner be redeemed by the payment of a lump sum of such amount as may be agreed to by the parties or determined by the Commissioner, as the case may be.

8. **Distribution of compensation.**—⁴⁸[(1) No payment of compensation in respect of a workman whose injury has resulted in death, and no payment of a lump sum as compensation to a woman or a person under a legal disability, shall be made otherwise than by deposit with the Commissioner, and no such payment made directly by an employer shall be deemed to be a payment of compensation:

⁵⁰[Provided that, in the case of a deceased workman, an employer may make to any dependant advances on account of compensation not exceeding an aggregate of one hundred rupees, and so much of such aggregate as does not exceed the compensation payable to that dependant shall be deducted by the Commissioner from such compensation and repaid to the employer.]

(2) Any other sum amounting to not less than ten rupees which is payable as compensation may be deposited with the Commissioner on behalf of the person entitled thereto.

(3) The receipt of the Commissioner shall be a sufficient discharge in respect of any compensation deposited with him.]

(4) On the deposit of any money under sub-section (1) ⁵¹[as compensation in respect of a deceased workman] the Commissioner ⁵²[shall deduct] therefrom the actual cost of the workman's funeral expenses, to an amount not exceeding ⁵³[twenty-five rupees] and pay the same to the person by whom such expenses were incurred, and shall, if he thinks necessary, cause notice to be published or to be served on each dependant in such manner as he thinks fit, calling upon the dependants to appear before him on such date as he may fix for determining the distribution of the compensation. If the Commissioner is satisfied after any inquiry which he may deem necessary, that no dependant exists, he shall repay the balance of the money to the employer by whom it was paid. The Commissioner shall, on application by the employer, furnish a statement showing in detail all disbursements made.

(6) Where any compensation deposited with the Commissioner is payable to any person, the Commissioner shall, if the person to whom the compensation is payable is not a woman or a person under a legal disability, and may, in other cases, pay the money to the person entitled thereto.

(7) Where any lump sum deposited with the Commissioner is payable to a woman or a person under a legal disability, such sum may be invested, applied or otherwise dealt with for the benefit of the woman, or of such person during his disability, in such manner as the Commissioner may direct; and where a half-monthly payment is payable to any person under a legal disability, the Commissioner may, of his own motion or on an application made to him in this behalf, order that the payment be made during the disability to any dependant of the workman or to any other person, whom the Commissioner thinks best fitted to provide for the welfare of the workman.]

⁵⁵[(8)] Where, on application made to him in this behalf or otherwise, the Commissioner is satisfied that, on account of neglect of children on the part of a parent or on account of the variation of the circumstances of any dependant or for any other sufficient cause, an order of the Commissioner as to the distribution of any sum paid as compensation or as to the manner in which any sum payable to any such dependant is to be invested, applied or otherwise dealt with, ought to be varied, the Commissioner may make such orders for the variation of the former order as he thinks just in the circumstances of the case:

Provided that no such order prejudicial to any person shall be made unless such person has been given an opportunity of showing cause why the order should not be made, or shall be made in any case in which it would involve the repayment by a dependant of any sum already paid to him.

⁵⁶[(9) Where the Commissioner varies any order under sub-section (8) by reason of the fact that payment of compensation to any person has been obtained by fraud, impersonation or other improper means, any amount so paid to or on behalf of such person may be recovered in the manner hereinafter provided in section 31.]

9. (2) If the employer is of opinion that he is liable to deposit compensation, he shall make the deposit within thirty days of the service of the notice.

(3) If the employer is of opinion that he is not liable to deposit compensation, he shall in his statement indicate the grounds on which he disclaims liability.

11. Medical examination—(1) Where a workman has given notice of an accident, he shall, if the employer, before the expiry of three days from the time at which service of the notice has been effected, offers to have him examined free of charge by a qualified medical practitioner, submit himself for such examination, and any workman who is in receipt of a half-monthly payment under this Act shall, if so required, submit himself for such examination from time to time:

Provided that a workman shall not be required to submit himself for examination by a medical practitioner otherwise than in accordance with rules made under this Act, or at more frequent intervals than may be prescribed.

(2) If a workman, on being required to do so by the employer under sub-section (1) or by the Commissioner at any time, refuses to submit himself for examination by a qualified medical practitioner or in any way obstructs the same, his right to compensation shall be suspended during the continuance of such refusal or obstruction unless, in the case of refusal, he was prevented by any sufficient cause from so submitting himself.

(3) If a workman, before the expiry of the period within which he is liable under sub-section (1) to be required to submit himself for medical examination, voluntarily leaves without having been so examined the vicinity of the place in which he was employed, his right to compensation shall be suspended until he returns and offers himself for such examination.

(4) Where a workman, whose right to compensation has been suspended under sub-section (2) or sub-section (3), dies without having submitted himself for medical examination as required by either of those sub-sections, the Commissioner may, if he thinks fit, direct the payment of compensation to the dependants of the deceased workman.

(5) Where under sub-section (2) or sub-section (3) a right to compensation is suspended, no compensation shall be payable in respect of the period of suspen-

sion, and, if the period of suspension commences before the expiry of the waiting period referred to in clause (d) of sub-section (1) of section 4, the waiting period shall be increased by the period during which the suspension continues.

(6) Where an injured workman has refused to be attended by a qualified medical practitioner whose services have been offered to him by the employer free of charge or having accepted such offer has deliberately disregarded the instructions of such medical practitioner, then, ⁷²[if it is proved that the workman has not thereafter been regularly attended by a qualified medical practitioner or having been so attended has deliberately failed to follow his instructions and that such refusal, disregard or failure was unreasonable] in the circumstances of the case and that the injury has been aggravated thereby, the injury and resulting disablement shall be deemed to be of the same nature and duration as they might reasonably have been expected to be if the workman had been regularly attended by a qualified medical practitioner, ⁷³[whose instructions he had followed], and compensation, if any, shall be payable accordingly.

12. Contracting.—(1) Where any person (hereinafter in this section referred to as the principal) in the course of or for the purposes of his trade or business contracts with any other person (hereinafter in this section referred to as the contractor) for the execution by or under the contractor of the whole or any part of any work which is ordinarily part of the trade or business of the principal, the principal shall be liable to pay to any workman employed in the execution of the work any compensation which he would have been liable to pay if that workman had been immediately employed by him; and where compensation is claimed from the principal, this Act shall apply as if references to the principal were substituted for references to the employer except that the amount of compensation shall be calculated with reference to the wages of the workman under the employer by whom he is immediately employed.

(2) Where the principal is liable to pay compensation under this section, he shall be entitled to be indemnified by the contractor, ⁷⁴[or any other person from whom the workman could have recovered compensation and where a contractor who is himself a principal is liable to pay compensation or to indemnify a principal under this section he shall be entitled to be indemnified by any person standing to him in the relation of a contractor from whom the workman could have recovered compensation] and all questions as to the right to and the amount of any such indemnity shall, in default of agreement, be settled by the Commissioner.

(3) Nothing in this section shall be construed as preventing a workman from recovering compensation from the contractor instead of the principal.

(4) This section shall not apply in any case where the accident occurred elsewhere than on, in or about the premises on which the principal has undertaken or usually undertakes, as the case may be, to execute the work or which are otherwise under his control or management.

13. Remedies of employer against stranger.—Where a workman has recovered compensation in respect of any injury caused under circumstances creating a legal liability of some person other than the person by whom the compensation was paid to pay damages in respect thereof, the person by whom the compensation was paid and any person who has been called on to pay an indemnity under section 12 shall be entitled to be indemnified by the person so liable to pay damages as aforesaid.

14. Insolvency of employer.—(1) Where any employer has entered into a contract with any insurers in respect of any liability under this Act to any work-

man, then in the event of the employer becoming insolvent or making a composition or scheme of arrangement with his creditors or, if the employer is a company, in the event of the company having commenced to be wound up, the rights of the employer against the insurers as respects that liability shall, notwithstanding anything in any law for the time being in force relating to insolvency or the winding up of companies, be transferred to and vest in the workman, and upon any such transfer the insurers shall have the same rights and remedies and be subject to the same liabilities as if they were the employer, so, however, that the insurers shall not be under any greater liability to the workman than they would have been under to the employer.

(2) If the liability of the insurers to the workman is less than the liability of the employer to the workman, the workman may prove for the balance in the insolvency proceedings or liquidation.

(3) Where in any case such as is referred to in sub-section (1) the contract of the employer with the insurers is void or voidable by reason of non-compliance on the part of the employer with any terms or conditions of the contract (other than a stipulation for the payment of premia), the provisions of that sub-section shall apply as if the contract were not void or voidable, and the insurers shall be entitled to prove in the insolvency proceedings or liquidation for the amount paid to the workman:

Provided that the provisions of this sub-section shall not apply in any case in which the workman fails to give notice to the insurers of the happening of the accident and of any resulting disablement as soon as practicable after he becomes aware of the institution of the insolvency or liquidation proceedings.

(4) There shall be deemed to be included among the debts which under section 49 of the Presidency-towns Insolvency Act, 1909 (III of 1909), or under section 61 of the Provincial Insolvency Act, 1920 (V of 1920), or under section 230 of the Indian Companies Act, 1913 (VII of 1913), are in the distribution of the property of an insolvent or in the distribution of the assets of a company being wound up to be paid in priority to all other debts, the amount due in respect of any compensation the liability wherefor accrued before the date of the order of adjudication of the insolvent or the date of the commencement of the winding up, as the case may be, and those Acts shall have effect accordingly.

(5) Where the compensation is a half-monthly payment, the amount due in respect thereof shall, for the purposes of this section, be taken to be the amount of the lump sum for which the half-monthly payment could, if redeemable, be redeemed if application were made for that purpose under section 7, and a certificate of the Commissioner as to the amount of such sum shall be conclusive proof thereof.

(6) The provisions of sub-section (4) shall apply in the case of any amount for which an insurer is entitled to prove under sub-section (3), but otherwise those provisions shall not apply where the insolvent or the company being wound up has entered into such a contract with insurers as is referred to in sub-section (1).

(7) This section shall not apply where a company is wound up voluntarily merely for the purposes of reconstruction or of amalgamation with another company.

15. Special provisions relating to masters and seamen.—This Act shall apply in the case of workmen who are masters of ^{75*} ships or seamen subject to the following modifications, namely:—

(1) The notice of the accident and the claim for compensation may, except where the person injured is the master of the ship, be served on the master of

the ship as if he were the employer, but where the accident happened and the disablement commenced on board the ship, it shall not be necessary for any seaman to give any notice of the accident.

(2) In the case of the death of a master or seaman, the claim for compensation shall be made within six months after the news of the death has been received by the claimant or, where the ship has been or is deemed to have been lost with all hands, within eighteen months of the date on which the ship was, or is deemed to have been, so lost.

(3) Where an injured master or seaman is discharged or left behind in any part of ⁷⁶[India or] His Majesty's dominions or ⁷⁷[in any other foreign country], any depositions taken by any Judge or Magistrate in that part or by any Consular Officer in the foreign country and transmitted by the person by whom they are taken to the ⁷⁸[Central Government] or any ⁷⁹[State Government] shall, in any proceedings for enforcing the claim, be admissible in evidence—

(a) if the deposition is authenticated by the signature of the Judge, Magistrate or Consular Officer before whom it is made;

(b) if the defendant or the person accused, as the case may be, had an opportunity by himself or his agent to cross-examine the witness; and

(c) if the deposition was made in the course of a criminal proceeding, on proof that the deposition was made in the presence of the person accused; and it shall not be necessary in any case to prove the signature or official character of the person appearing to have signed any such deposition and a certificate by such person that the defendant or the person accused had an opportunity of cross-examining the witness and that the deposition if made in a criminal proceeding was made in the presence of the person accused shall, unless the contrary is proved, be sufficient evidence that he had that opportunity and that it was so made.

WORKMEN'S COMPENSATION RULES, 1924¹

In exercise of the powers conferred by section 32 of the Workmen's Compensation Act, 1923 (VIII of 1923), the Central Government is pleased to make the following rules:—

PRELIMINARY

1. **Short title.**—These rules may be called the Workmen's Compensation Rules, 1924.
2. **Definitions.**—In these rules, unless there is anything repugnant in the subject or context,—
 - (a) "the Act" means the Workmen's Compensation Act, 1923;
 - (b) "Form" means a form appended to these rules;
 - (c) "section" means a section of the Act.

PART I—REVIEW OF HALF MONTHLY PAYMENTS AND COMMUTATION THEREOF

3. **When application may be made without medical certificate.**—Application for review of a half-monthly payment under section 6 may be made without being accompanied by a medical certificate—

- (a) by the employer, on the ground that since the right to compensation was determined the workmen's wages have increased;
- (b) by the workman, on the ground that since the right to compensation was determined his wages have diminished;
- (c) by the workman, on the ground that the employer, having commenced to pay compensation, has ceased to pay the same, not withstanding the fact that there has been no change in the workman's condition such as to warrant such cessation;
- (d) either by the employer or by the workman, on the ground that the determination of the rate of compensation for the time being in force was obtained by fraud or undue influence or other improper means;
- (e) either by the employer or by the workman on the ground that in the determination of compensation there is a mistake or error apparent on the face of the record.

4. **Procedure on application for review.**—If, on examining an application for review by an employer in which the reduction or discontinuance of half-monthly payments is sought it appears to the Commissioner that there is reasonable ground for believing that the employer has a right to such reduction or discontinuance, he may at any time issue an order withholding the half-monthly payments in whole or in part pending his decision on the application.

5. **Procedure on application for commutation.**—(1) Where application is made to the Commissioner under section 7 for the redemption of a right to receive half-monthly payments by the payment of a lump sum, the Commissioner shall form an estimate of the probable duration of the disablement, and shall award a sum equivalent to the total of the half-monthly payments which would be payable for the period during which he estimates that the disablement will continue, less one-half per cent. of that total for each month comprised in that period :

Provided that fractions of a rupee included in the sum so computed shall be disregarded.

¹ These Rules were published under the Government of India, Department of Industries and Labour, Notification No. L-1182, dated 26th June, 1924.

(2) When, in any case to which sub-rule (1) applies, the Commissioner is unable to form an approximate estimate of the probable duration of the disablement, he may from time to time postpone a decision on the application for a period not exceeding two months at any one time.

PART II—DEPOSIT OF COMPENSATION

6. Deposit under section 8 (1).—(1) An employer depositing compensation with the Commissioner under sub-section (1) of section 8, in respect of a workman whose injury has resulted in death shall furnish therewith a statement in Form A, and shall be given a receipt in Form B. In other cases of deposits with the Commissioner under sub-section (1) of section 8, the employer shall furnish a statement in form AA, and shall be given a receipt in Form B.

(2) If, when depositing compensation in respect of fatal accidents, the employer indicates in the statement referred to in sub-rule (1) that he desires to be made a party to the distribution proceedings, the Commissioner shall, before allotting the sum deposited as compensation, afford to the employer an opportunity of establishing that the person to whom he proposes to allot such sum is not a dependant of the deceased workman or, as the case may be, that no one of such person is a dependant.

(3) The statement of disbursements to be furnished on application by the employer under sub-section (4) of section 8 shall be in Form C.

7. Publication of lists of deposits.—The Commissioner shall cause to be displayed in a prominent position outside his office an accurate list of the deposits received by him under sub-section, (1) of section 8, together with the names and addresses of the depositors and of the workmen in respect of whose death or injury the deposits have been made.

8. Application by dependants for deposit of compensation.—(1) A dependant of a deceased workman may apply to the Commissioner for the issue of an order to deposit compensation in respect of the death of the workman. Such application shall be made in Form G.

(2) If compensation has not been deposited the Commissioner shall dispose of such application in accordance with the provisions of Part V of these rules :

Provided that—

(a) the Commissioner may, at any time before issues are framed, cause notice to be given in such manner as he thinks fit to all or any of the dependants of the deceased workman who have not joined in the application, requiring them, if they desire to join therein, to appear before him on a date specified in this behalf;

(b) any dependant to whom such notice has been given and who fails to appear and to join in the application on the date specified in the notice shall not be permitted thereafter to claim that the employer is liable to deposit compensation unless he satisfies the Commissioner that he was prevented by any sufficient cause from appearing when the case was called on for hearing.

(3) If, after completing the enquiry into the application, the Commissioner issues an order requiring the employer to deposit compensation in accordance with sub-section (1) of section 8, nothing in sub-rule (2) shall deemed to prohibit the allotment of any part of the sum deposited as compensation to a dependant of the deceased workman who failed to join the application.

9. Deposit under section 8 (2).—An employer depositing compensation in accordance with sub-section (2) of section 8, shall furnish therewith a statement in Form D; and shall be given a receipt in Form E.

10. Investment of money.—Money in the hands of Commissioner may be invested for the benefit of the dependants of deceased workman in Government securities or Post Office Cash Certificates, or may be deposited in a Post Office Savings Bank.

PART III—REPORTS OF ACCIDENTS

11. Report of fatal accidents.—The report required by section 10B shall, subject to such rules, if any, as may be made by the local Government, be in Form EE.

12. Right of employer to present memorandum when information received.—(1) Any employer who has received information of an accident may at any time, notwithstanding the fact that no claim for compensation has been instituted in respect of such accident, present to the Commissioner a memorandum, supported by an affidavit made by himself or by any person subordinate to him having knowledge of the facts stated in the memoran-

dum, embodying the results of any investigation or inquiry which has been made into the circumstances or cause of the accident.

(2) A memorandum presented under sub-rule (1) shall, subject to the payment of such fee as may be prescribed, be recorded by the Commissioner.

PART IV—MEDICAL EXAMINATION

13. Workman not to be required to submit to medical examination save in accordance with rules.—A workman who is required by sub-section (1) of section 11 to submit himself for medical examination shall be bound to do so in accordance with the rules contained in this Part and not otherwise.

14. Examination when workman and medical practitioner both on premises.—When such workman is present at the employer's premises, and the employer offers to have him examined free of charge by a qualified medical practitioner who is so present, the workman shall submit himself for examination forthwith.

15. Examination in other cases.—In cases to which rule 14 does not apply the employer may—

- (a) send the medical practitioner to the place where the workman is residing for the time being in which case the workman shall submit himself for medical examination on being requested to do so by the medical practitioner, or
- (b) send to the workman an offer in writing to have him examined free of charge by a qualified medical practitioner, in which case the workman shall submit himself for medical examination at the employer's premises or at such other place in the vicinity as is specified in such offer and at such time as is so specified.

Provided that—

- (i) the time so specified shall not, save with the express consent of the workman, be between the hours of 7 p.m. and 6 a.m., and
- (ii) in cases where the workman's condition renders it impossible or inadvisable that he should leave the place where he is residing for the time being, he shall not be required to submit himself for medical examination save at such place.

16. Restriction on number of examinations.—A workman who is in receipt of a half-monthly payment shall not be required to submit himself for medical examination elsewhere than at the place where he is residing for the time being more than twice in the first month following the accident or more than once in any subsequent month.

17. Examination after suspension of right to compensation.—If a workman whose right to compensation has been suspended under sub-section (2) or sub-section (3) of section 11 subsequently offers himself for medical examination, his examination shall take place on the employer's premises or at such other place in the vicinity as may be fixed by the employer, and at a time to be fixed by the employer not being, save with the express consent of the workman, more than 72 hours after the workman has so offered himself.

18. Examination of women.—(1) No woman shall without her consent be medically examined by a male practitioner, save in the presence of another woman.

(2) No woman shall be required to be medically examined by a male practitioner if she deposits a sum sufficient to cover the expenses of examination by a female practitioner.

PART V—PROCEDURE

19. Introductory.—Save as otherwise provided in these rules, the procedure to be followed by Commissioner in the disposal of cases under the Act or these rules and by the parties in such cases shall be regulated in accordance with the rules contained in this Part.

20. Applications.—(1) Any application of the nature referred to in section 22 may be sent to the Commissioner by registered post or may be presented to him or to any of his subordinates authorised by him in this behalf and, if so sent or presented, shall, unless the Commissioner otherwise directs, be made in duplicate in the appropriate Form, if any, and shall be signed by the applicant.

(2) There shall be appended to every such application a certificate, which shall be signed by the applicant, to the effect that the statement of facts contained in the application is to the best of his knowledge and belief accurate.

21. Production of documents.—(1) When the application for relief is based upon a document, the document shall be appended to the application.

(2) Any other document which any party desires to tender in evidence shall be produced at or before the first hearing.

(3) Any document which is not produced at or within the time specified in sub-rule (1) or (2) as the case may be shall not, without the sanction of the Commissioner, be admissible in evidence on behalf of the party who should have produced it.

(4) Nothing in this rule applies to any document which is produced for the purpose of cross-examining a witness or is handed to a witness to refresh his memory.

22. Application presented to wrong Commissioner.—(1) If it appears to the Commissioner on receiving application that it should be presented to another Commissioner, he shall return it to the applicant after endorsing upon it the date of the presentation and return, the reason for returning it and designation of the Commissioner to whom it should be presented.

(2) If it appears to the Commissioner at any subsequent stage that an application should have been presented to another Commissioner, he shall send the application to the Commissioner empowered to deal with it and shall inform the applicant (and the opposite party, if he has received a copy of the application under rule 26), accordingly.

(3) The Commissioner to whom an application is transferred under sub-rule (2) may continue the proceedings as if the previous proceedings or any part of them had been taken before him, if he is satisfied that the interests of the parties will not thereby be prejudiced.

23. Examination of applicant.—(1) On receiving an application of the nature referred to in section 22, the Commissioner may examine the applicant on oath, or may send the application to any officer authorised by the Local Government in this behalf and direct such officer to examine the applicant and his witnesses and forward the record thereof to the Commissioner.

(2) The substance of any examination made under sub-rule (1) shall be recorded in the manner provided for the recording of evidence in section 25.

24. Summary dismissal of application.—(1) The Commissioner may, after considering the application and the result of any examination of the applicant under rule 23, summarily dismiss the application, if, for reasons to be recorded, he is of opinion that there are no sufficient grounds for proceeding thereon.

(2) The dismissal of the application under sub-rule (1) shall not of itself preclude the applicant from presenting a fresh application for the settlement of the same matter.

25. Preliminary inquiry into application.—If the application is not dismissed under rule 24, the Commissioner may, for reasons to be recorded, call upon the applicant to produce evidence in support of the application before calling upon any other party, and, if upon considering such evidence the Commissioner is of opinion that there is no case for the relief claimed, he may dismiss the application with a brief statement of his reasons for so doing.

26. Notice to opposite party.—If the Commissioner does not dismiss the application under rule 24 or 25, he shall send to the party from whom the applicant claims relief (hereinafter referred to as the opposite party) a copy of the application, together with a notice of the date on which he will dispose of the application, and may call upon the parties to produce upon that date any evidence which they may wish to tender.

27. Appearance and examination of opposite party.—(1) The opposite party may, and if so required by the Commissioner, shall, at or before the first hearing or within such time as the Commissioner may permit, file a written statement dealing with the claim raised in the application, and any such written statement shall form part of the record.

(2) If the opposite party contests the claim, the Commissioner may, and, if no written statement has been filed, shall proceed to examine him upon the claim, and shall reduce the result of examination to writing.

28. Framing of issues.—(1) After considering any written statement and the result of any examination of the parties, the Commissioner shall ascertain upon what material propositions of fact or of law the parties are at variance and shall thereupon proceed to frame and record the issues upon which the right decision of the case appears to him to depend.

(2) In recording the issues, the Commissioner shall distinguish between those issues which in his opinion concern points of facts and those which concern points of law.

29. Power to postpone trial of issues of fact where issues of law arise.—When issues both of law and of fact arise in the same case, and the Commissioner is of opinion that the case may be disposed of on the issues of law only, he may try those issues first, and for that purpose may, if he thinks fit, postpone the settlement of the issues of fact until after the issues of law have been determined.

30. Diary.—The Commissioner shall maintain under his hand a brief diary of the proceedings on an application.

31. Reasons for postponement to be recorded.—If the Commissioner finds it impossible to dispose of an application at one hearing he shall record the reasons which necessitate a postponement.

32. Judgment.—(1) The Commissioner, in passing orders, shall record concisely a judgment containing his finding on each of the issues framed and his reasons for such finding.

(2) The Commissioner, at the time of signing and dating his judgment, shall pronounce his decision, and thereafter no addition or alteration shall be made to the judgment other than the correction of a clerical or arithmetical mistake arising from any accidental slip or omission.

33. Summoning of witnesses.—If an application is presented by any party to the proceedings for the citation of witnesses, the Commissioner shall on payment of the prescribed expenses and fees, issue summonses for the appearance of such witnesses, unless he considers that their appearance is not necessary for the just decision of the case.

34. Exemption from payment of costs.—If the Commissioner is satisfied that the applicant is unable, by reason of poverty, to pay the prescribed fees, he may remit any or all of such fees. If the case is decided in favour of the applicant, the prescribed fees which, had they not been remitted, would have been due to be paid, may be added to the costs of the case and received in such manner as the Commissioner in his order regarding costs may direct.

35. Right of entry for local inspection.—A Commissioner before whom any proceeding relating to an injury by accident is pending may at any time enter the place where the workman was injured, or where the workman ordinarily performed his work, for the purpose of making a local inspection or of examining any persons likely to be able to give information relevant to the proceedings:

Provided that the Commissioner shall not enter any premises of any industrial establishment except during the ordinary working hours of that establishment, save with the permission of the employer or of some person directly responsible to him for the management of the establishment.

36. Procedure in connection with local inspection.—(1) If the Commissioner proposes to conduct a local inspection with a view to examining on the spot the circumstances in which an accident took place, he shall give the parties or their representatives notice of his intention to conduct such inspection, unless in his opinion the urgency of the case renders the giving of such notice impracticable.

(2) Such notice may be given orally or in writing, and, in the case of an employer, may be given to any person upon whom notice of a claim can be served under sub-section (2) of section 10, or the representative of any such person.

(3) Any party, or the representative of any party, may accompany the Commissioner at a local inspection.

(4) The Commissioner, after making a local inspection, shall note briefly in a memorandum any facts observed, and shall show the memorandum to any party who desires to see the same, and, on payment of the prescribed fee shall supply any party with a copy thereof.

(5) The memorandum shall form part of the record.

37. Power of summary examination.—(1) The Commissioner during a local inspection or at any other time, save at a formal hearing of a case pending before him, may examine summarily any person likely to be able to give information relative to such case, whether such person has been or is to be called as a witness in the case or not, and whether any or all of the parties are present or not.

(2) No oath shall be administered to a person examined under sub-rule (1).

(3) Statements made by persons examined under sub-rule (1), if reduced to writing, shall not be signed by the person making the statement, nor shall they except as hereinafter provided, be incorporated in the record or utilised by the Commissioner for the purpose of arriving at a decision in the case.

(4) If a witness who has been examined under sub-rule (1) makes in evidence any material statement contradicting any statement made by him in such examination and reduced to writing, the Commissioner may call his attention to such statement, and shall in that case direct that the parties be furnished with the relevant part of such statement for the purpose of examining or cross-examining the witness.

(5) Any statement or part of a statement which is furnished to the parties under sub-rule (4) shall be incorporated in the record.

(6) Where a case is settled by agreement between the parties, the Commissioner may incorporate in the record any statement made under sub-rule (1) and may utilise such statement for the purpose of justifying his acceptance of, or refusal to accept, the agreement reached.

38. Agreement to abide by Commissioner's decision.—(1) If a party states in writing his willingness to abide by the decision of the Commissioner, the Commissioner shall inquire whether the other party is willing to abide by his decision.

(2) If the other party agrees to abide by the Commissioner's decision, the fact of his agreement shall be recorded in writing and signed by him.

(3) If the other party does not agree to abide by the Commissioner's decision, the first party shall not remain under an obligation so to abide.

39. Procedure where indemnity claimed under section 12 (2).—(1) Where the opposite party claims that if compensation is recovered against him he will be entitled under sub-section (2) of section 12 to be indemnified by a person not being a party to the case, he shall, when first called upon to answer the application present a notice of such claim to the Commissioner accompanied by the prescribed fee, and the Commissioner shall thereupon issue notice to such person in Form J.

(2) If any person served with a notice under sub-section (1) desires to contest the applicant's claim for compensation or the opposite party's claim to be indemnified, he shall appear before the Commissioner on the date fixed for the hearing of the case or on any date to which the case may be adjourned and, if he so appears, shall have all the rights of a party to the proceedings; in default of so appearing he shall be deemed to admit the validity of any award made against the opposite party and to admit his own liability to indemnify the opposite party for any compensation recovered from him;

Provided that, if any person so served appears subsequently and satisfies the Commissioner that he was prevented by any sufficient cause from appearing, the Commissioner shall, after giving notice to the aforesaid opposite party, hear such person, and may set aside or vary any award made against such person under this rule upon such terms as may be just.

(3) If any person served with a notice under sub-rule (1) whether or not he desires to contest the applicant's claim for compensation or the opposite party's claim to be indemnified, claims that being a contractor he is himself a principal and is entitled to be indemnified by a person standing to him in the relation of a contractor from whom the workman could have recovered compensation he shall on or before the date fixed in the notice under sub-rule (1) present a notice of such claim to the Commissioner accompanied by the prescribed fee and the Commissioner shall thereupon issue notice to such person in Form JJ.

(4) If any person served with a notice under sub-rule (3) desires to contest the applicant's claim for compensation, or the claim under sub-rule (3) to be indemnified he shall appear before the Commissioner on the date fixed in the notice in Form JJ or on any date to which the case may be adjourned and, if he so appears, shall have all the rights of a party to the proceedings; in default of so appearing he shall be deemed to admit the validity of any award made against the original opposite party or the person served with a notice under sub-rule (1) and to admit his own liability to indemnify the party against whom such award is made for any compensation recovered from him: Provided that, if any person so served appears subsequently and satisfies the Commissioner that he was prevented by any sufficient cause from appearing, the Commissioner shall, after giving notice to all parties on the record, hear such person, and may set aside or vary any award made against such person under this rule upon such terms as may be just.

(5) In any proceeding in which a notice has been served on any person under sub-rule (1) or sub-rule (3) the Commissioner shall, if he awards compensation, record in his judgment a finding in respect of each of such persons whether he is or is not liable to indemnify any of the opposite parties, and shall specify the party, if any, whom he is liable to indemnify.

40. Procedure in connected cases.—(1) Where two or more cases pending before a Commissioner arise out of the same accident, and any issue involved is common two or more such cases, such cases may, so far as the evidence bearing on such issue is concerned, be heard simultaneously.

(2) Where action is taken under sub-rule (1) the evidence bearing on the common issue or issues shall be recorded on the record of one case, and the Commissioner shall certify under his hand on the record of any such other case, the extent to which the evidence so recorded applies to such other case, and the fact that the parties to such other case had the opportunity of being present, and, if they were present of cross-examining the witnesses.

41. Certain provisions of Code of Civil Procedure, 1908, to apply.—Save as otherwise expressly provided in the Act or these rules the following provisions of the First Schedule

to the Code of Civil Procedure, 1908, namely, those contained in Order V, rules 9 to 13 and 15 to 30; Order IX; Order XIII, rules 3 to 10; Order XVI, rules 2 to 21; Order XVII; and Order XXIII, rules 1 and 2, shall apply to proceedings before Commissioners, in so far as they may be applicable thereto:

Provided that—

- (a) for the purpose of facilitating the application of the said provisions the Commissioner may construe them with such alterations not affecting the substance as may be necessary or proper to adapt them to the matter before him;
- (b) the Commissioner may, for sufficient reasons, proceed otherwise than in accordance with the said provisions, if he is satisfied that the interests of the parties will not thereby be prejudiced.

42. Provision regarding signature of forms.—Any form, other than a receipt for compensation, which is by these rules required to be signed by a Commissioner may be signed under his direction and on his behalf by any officer subordinate to him appointed by him in writing for this purpose.

43. Apportionment of compensation among dependants.—The provisions of this Part, except those contained in rules 26, 27 and 39 shall, as far as may be, apply in the case of any proceedings relating to the apportionment of compensation among dependants of a deceased workman.

PART VI—TRANSFER

44. Transfer for report.—(1) A Commissioner transferring any matter to another Commissioner for report in accordance with sub-section (2) of section 21 shall, along with the documents referred to in that sub-section, transmit to such other Commissioner a concise statement, in the form of questions for answer, of the matter on which report is required.

(2) A Commissioner to whom a case is so transferred for report shall not be required to report on any question of law.

45. Transmission of money.—Money transmitted by one Commissioner to another in accordance with sub-section (2) of section 21 shall be transmitted either by remittance transfer receipt, or by money order, or by messenger, as the Commissioner transmitting the money may direct.

PART VII—APPOINTMENT OF REPRESENTATIVES

46. When representative must be appointed.—Where any party to a proceeding is under the age of 15 years or is unable to make an appearance, the Commissioner shall appoint some suitable person, who consents to the appointment, to represent such party for the purposes of the proceeding.

47. When new representative to be appointed.—If the Commissioner considers that the interests of any party for whom a representative has been appointed under rule 46 are not being adequately protected by that representative or if a person appointed to act as representative dies or becomes incapable of acting, or otherwise ceases to act as such, the Commissioner shall appoint in his place another person who consents to the appointment.

PART VIII—RECORD OF MEMORANDA OF AGREEMENT

48. Form of memorandum.—Memoranda of agreement sent to the Commissioner under sub-section (1) of section 28 shall unless the Commissioner otherwise directs be in duplicate, and shall be in as close conformity as the circumstances of the case admit with Form K or Form L or Form M as the case may be.

49. Procedure where Commissioner does not consider that he should refuse to record memorandum.—(1) On receiving a memorandum of agreement, the Commissioner shall, unless he considers that there are grounds for refusing to record the memorandum, fix a date for recording the same, and shall issue a notice in writing in Form N to the parties concerned that in default of objections he proposes to record the memorandum on the date so fixed:

Provided that the notice may be communicated orally to any parties who are present at the time when notice in writing would otherwise issue.

(2) On the date so fixed, the Commissioner shall record the memorandum unless, after hearing any of the parties who appear and desire to be heard, he considers that it ought not to be recorded:

Provided that the issue of a notice under sub-rule (1) shall not be deemed to prevent the Commissioner from refusing to record the memorandum on the date so fixed even if no objection be made by any party concerned.

(3) If on such date the Commissioner decides that the memorandum ought not to be recorded, he shall inform the parties present of his decision and of the reasons therefor, and, if any party desiring the memorandum to be recorded is not present, he shall send information to that party in Form O.

50. Procedure where Commissioner considers he should refuse to record memorandum.—(1) If, on receiving a memorandum of agreement, the Commissioner considers that there are grounds for refusing to record the same, he shall fix a date for hearing the party or parties desiring the memorandum to be recorded, and shall inform such party or parties and, if he thinks fit, any other party concerned, of the date so fixed and of the grounds on which he considers that the memorandum should not be recorded.

(2) If the parties to be informed are not present, a written notice shall be sent to them in Form P or Form Q, as the case may be, and the date fixed in such notice shall be not less than seven days after the date of the issue of the same.

(3) If, on the date fixed under sub-rule (1) the party or parties desiring the memorandum to be recorded show adequate cause for proceeding to the record of the same, the Commissioner may, if information has already been given to all the parties concerned, record the agreement. If information has not been given to all such parties, he shall proceed in accordance with rule 49.

(4) If, on the date so fixed, the Commissioner refuses to record the memorandum, he shall send notice in Form O to any party who did not receive information under sub-rule (1).

51. Procedure on refusal to record memorandum.—(1) If in any case the Commissioner refuses to record a memorandum of agreement, he shall briefly record his reasons for such refusal.

(2) If the Commissioner refuses to record a memorandum of agreement, he shall not pass any order directing the payment of any sum or amount over and above the sum specified in the agreement, unless opportunity has been given to the party liable to pay such sum to show cause why it should not be paid.

(3) Where the agreement is for the redemption of half-monthly payments by the payment of a lump sum, and the Commissioner considers that the memorandum of agreement should not be recorded by reason of the inadequacy of the amount of such sum as fixed in the agreement, he shall record his estimate of the probable duration of the disablement of the workman.

52. Registration of memorandum accepted for record.—In recording a memorandum of agreement, the Commissioner shall cause the same to be entered in a register in Form R and shall cause an endorsement to be entered under his signature on a copy of the memorandum to be retained by him in the following terms, namely:—

PART I—GENERAL

PART II—TRANSFER OF MONEY PAID TO A COMMISSIONER FOR THE BENEFIT OF ANY PERSON RESIDING OR ABOUT TO RESIDE IN ANOTHER COUNTRY

PART III—RECEIPT AND ADMINISTRATION IN INDIA OF ANY MONEY AWARDED UNDER THE LAW RELATING TO WORKMEN'S COMPENSATION IN ANOTHER COUNTRY

WORKMEN'S COMPENSATION (TRANSFER OF MONEY) RULES, 1935¹

In exercise of the powers conferred by section 35 of the Workmen's Compensation Act, 1923 (VIII of 1923), the Governor General in Council is pleased to make the following rules for the transfer to any part of His Majesty's Dominions or to any other country of money paid to a Commissioner under the Act for the benefit of any person residing or about to reside in such part or country and for the receipt and administration in British India of any money awarded under the law relating to workmen's compensation in any part of His Majesty's Dominions or in any other country, and applicable for the benefit of any person residing or about to reside in British India.

RULES

PART I—GENERAL

1. (1) These rules may be called the Workmen's Compensation (Transfer of Money) Rules, 1935.

(2) They extend to the whole of India except the State of Jammu and Kashmir.

2. In these rules, unless there is anything repugnant in the subject or context,—

(a) "the Act" means the Workmen's Compensation Act, 1923

(b) "authorised officer" means any officer whom the State Government may designate either generally or in respect of any area or class of cases, for the purpose of performing the functions assigned by these rules to the authorised officer,

(bb) India in these rules does not include the State of Jammu and Kashmir.

(c) "transferring authority" means any authority in any part of His Majesty's Dominions or in any other country who transfers or causes to be transferred any lump sum awarded under the law relating to workmen's compensation in such part or country and applicable for the benefit of any person residing or about to reside in India.

3. When any sum is transmitted by any authority in India to any other authority in accordance with these rules, the costs of such transmission may be deducted from the sum so transmitted.

¹ These Rules were published under the Government of India, Department of Industries and Labour, Notification No. L-3033, dated the 13th March, 1935.

4. Money transmitted by any authority in India to any other authority in India in accordance with these rules, shall be transmitted by remittance transfer receipt or by money order.

PART II.—TRANSFER OF MONEY PAID TO A COMMISSIONER FOR THE BENEFIT OF ANY PERSON RESIDING OR ABOUT TO RESIDE IN ANOTHER COUNTRY.

5. When the whole or any part of a lump sum deposited with a Commissioner for payment as compensation under the Act is payable to any person or persons residing or about to reside in any other country, the Commissioner may order the transfer to that country of the sum so payable.

6. When the Commissioner has ordered the transfer of any sum under rule 5; he shall cause to be prepared and shall certify under his hand a memorandum containing a brief statement of the facts of the case, of the orders passed upon it, and of the name and address of each person to whom payment is to be made.

7. If the Commissioner is not himself the authorised officer he shall forward the memorandum in duplicate to the authorised officer and may either remit the sum to be transferred to the authorised officer or retain it and dispose of it in accordance with the directions of the authorised officer. If the Commissioner is himself the authorised officer, he shall proceed as provided in rule 8.

8. The authorised officer, after satisfying himself that the memorandum is complete, shall forward it, and remit or cause to be remitted the sum to which it relates by such means of safe transmission as he may consider convenient to the authority appointed in this behalf for the country to which the sum is to be transferred, or if no such authority has been appointed, to such authority as the State Government may by general or special order direct, and shall at the same time request the authority addressed—

(a) to arrange for payment to be made in accordance with the directions contained in the memorandum; and

(b) to furnish him with a report of the action taken upon the memorandum and return any sum the payment of which is for any reason impossible.

9. (i) The authorised officer shall, if he is not the Commissioner with whom the matter originated, forward to such Commissioner a copy of any report received in response to a request made under rule 8.

(2) Any sum returned in accordance with rule 8 shall be disposed of in accordance with the Act.

PART III.—RECEIPT AND ADMINISTRATION IN INDIA OF ANY MONEY AWARDED UNDER THE LAW RELATING TO WORKMEN'S COMPENSATION IN ANOTHER COUNTRY

10. (i) The authorised officer shall be the proper authority to receive moneys from transferring authorities.

(2) If any Commissioner or other Government servant, not being the authorised officer, receives any sum from a transferring authority he shall either forward such sum, together with any papers relating thereto, to the authorised officer for disposal or obtain the instructions of the authorised officer as to the disposal of the sum and papers and act in accordance with his instructions.

11. The authorised officer may himself dispose of any sum or part of any sum which he receives or of which he assumes control under rule 10 or may send it or any part of it for disposal to such Commissioner or Commissioners as he considers proper.

12. All sums received from a transferring authority shall be disposed of as far as possible in accordance with the provisions of the Act and the Workmen's Compensation Rules, 1924:

Provided that the directions, if any, received from the transferring authority as to the manner in which the sum should be administered shall be complied with.

13. (i) The authorised officer shall forward to the transferring authority a report showing how the sum received from him has been disposed of.

(2) Any Commissioner, not being the authorised officer, who has disposed of any part of the sum, shall make a report in duplicate as to the disposal of that part to the authorised officer, and, if the sum was received by him from another such Commissioner acting in accordance with section 21 of the Act, shall forward his report through that Commissioner.

14. Any part of the sum received from the transferring authority which shall have remained undisbursed after the completion of the proceedings shall be returned to the transferring authority by, or under the direction of, the authorised officer.

INDIAN FATAL ACCIDENTS ACT, 1855 (XIII OF 1855)¹

Statement of Objects and Reasons¹

Under the English common law a suit for damages for a personal injury can only be brought by the person injured. If he dies as a result of the injury the right to sue does not pass on to his heirs or legal representatives. This principle is known as *actio personalis moritur cum persona* ("a personal action dies with the person injured").

The application of this rule resulted in much hardship to the dependants of poor persons dying as a result of accidents and was therefore modified in England by the Fatal Accidents Act of 1846 and several later statutes. The Indian Act of 1855 is based on the English Act and enables certain heirs of the deceased person to sue for damages when death is caused by an actionable wrong.

An Act to provide compensation to families for loss occasioned by the death of a person caused by actionable wrong.

[27th March, 1855.]

Preamble.—Whereas no action or suit is now maintainable in any Court against a person who, by his wrongful act, neglect or default, may have caused the death of another person, and it is often-times right and expedient that the wrong-doer in such case should be answerable in damages for the injury so caused by him; It is enacted as follows:—

³ * * * Every such action or suit shall be for the benefit of the wife, husband, parent and child, if any, of the person whose death shall have been so caused, and shall be brought by and in the name of the executor, administrator or representative of the person deceased;

and in every such action, the Court may give such damages as it may think proportioned to the loss resulting from such death to the parties respectively, for whom and for whose benefit such action shall be brought, and the amount so recovered, after deducting all costs and expenses, including the costs not recovered from the defendant, shall be divided amongst the before-mentioned parties, or any of them, in such shares as the Court by its judgment or decree shall direct.

EMPLOYERS' LIABILITY ACT, 1938 (XXIV OF 1938)

Statement of Objects and Reasons¹

Under the common law of England, in civil suits for damages for injuries sustained by workmen it is open to the employer to plead—

- (1) the doctrine of common employment, by which the employer is not normally liable to pay damages to a workman for an injury resulting from the default of another workman;
- (2) the doctrine of assumed risk, by which an employee is presumed to have accepted a risk if it is such that he ought to have known it to be part of the risks of his occupation.

The Royal Commission on Labour regarded both these doctrines as inequitable and recommended by a majority that a measure should be enacted abrogating these defences. Provincial Governments were consulted in 1932 and were almost unanimously in favour of legislation for the purpose. In the meantime judicial decisions in British India while generally agreeing as to the inequity of the doctrines have been such as to leave it open to employers in most provinces to have recourse to them. The Bill seeks to abolish these defences in the case of all workmen.

EMPLOYERS' LIABILITY (AMENDMENT) ACT, 1951 (V OF 1951)

Statement of Objects and Reasons²

In suits for compensations for injuries sustained by workmen, it was open to the employer to plead the doctrines of “common employment” and “assumed risk”. By the defence of “common employment”, the employer could plead that he was not liable to pay damages to a workman for injuries resulting from the default of a fellow workman. By the defence of “assumed risk”, he could plead that the workman was presumed to have accepted the risk if it was such that he ought to have known it as part of the risks of his occupation. The Royal Commission on Labour in India regarded both these doctrines as inequitable and accordingly, on their recommendation, the Employers' Liability Act 1938, was enacted debarring employers from putting forward these pleas. It was hitherto assumed that the defence of “common employment” was barred under Section 3(d) of the Act. But, in a recent case, the Privy Council has held that the scope of Section 3(d) is still limited and that the defence of “common employment” is still available to the employer. The decision of the Privy Council is due mainly to ambiguity in the language of clause (d). The Bill seeks to remove that defect.

MATERNITY BENEFIT LEGISLATION

International Conventions on Maternity Protection

The Childbirth Convention No. 3 adopted by the International Labour Conference in its First Session held in Washington in 1919 provides for 12 weeks maternity leave for women employed in industrial and commercial undertakings, optional for 6 weeks before and compulsory for 6 weeks after childbirth, income security during that span of time, free medical care and rest intervals for nursing mothers. The Conference also adopted a revised Convention No. 103 and a Recommendation No. 95 concerning Maternity Protection in its 35th Session held at Geneva in 1952 prescribing provisions for cash and medical benefits during the minimum period of maternity leave of 12 weeks and covering industrial, non-industrial and agricultural occupations as well as women working at home.

Non-official Attempt for Maternity Protection Legislation

In 1924, late Sri N. M. Joshi introduced a Bill¹ in the Legislative Assembly to prohibit the employment of women in factories, mines and tea estates immediately before and after confinement and also to make provisions for maternity allowance by Local Governments from a maternity fund subscribed by the employers. The Bill was rejected by the Assembly as the Government of India thought that the time was not sufficiently ripe for such a measure.²

State Legislations on Maternity Benefit

Though the Central Government did not take any step in enacting maternity benefit legislation, maternity protection for women workers in India is afforded

⁶ Inserted by the Employers' Liability (Amendment) Act, 1951 (5 of 1951), s. 3.

by legislative enactments by various State Governments. Bombay took the lead in 1929 by enacting legislation for regulating the employment of women in factories sometime before confinement and for providing for payment of maternity benefit to them. Madhya Pradesh immediately followed the lead given by Bombay in the matter by enacting similar law in 1930.

The Royal Commission on Labour in India appointed in 1931 examined the Bombay and Madhya Pradesh maternity benefit legislations and recommended enactment of maternity benefit legislation all over India on similar lines. The Commission suggested that the rate of benefit given by the Madhya Pradesh Act was suitable for general application and recommended that in the event of adoption of any general scheme of social insurance, maternity benefit should be incorporated in the said scheme and the cost should be shared by the State, employers and workers.

Maternity Benefit Acts were subsequently passed in various Part A States—in Madras in 1934, Uttar Pradesh in 1938, Bengal in 1939, the Punjab in 1943, Assam in 1944, Bihar in 1945 and Orissa in 1953. The Bihar Act was re-enacted with certain changes in 1947 and was amended in 1953. The Assam Act was amended in August 1951, to increase the rate of benefit payable to women employed in plantations. The Punjab Act was amended in 1952 and 1953. Maternity protection was extended to plantation workers in West Bengal by the Bengal Maternity Benefit (Tea Estates) Act, 1948 which was amended in 1950 prohibiting woman worker from accepting any employment during six weeks after childbirth when she gets maternity benefit. The Madras Act now applies to the new State of Andhra.

In Part B States, similar legislations were enacted in Mysore in 1937, Hyderabad in 1940, Travancore-Cochin in 1952 and Rajasthan in 1953 and in Madhya Bharat in 1951. The Bombay Act was adopted in Saurashtra in 1948.

In Part C States, the Bombay Act with certain modifications was extended to Ajmer in 1932 and in Delhi in 1937. Legislative measure was undertaken in Bhopal in 1943.

At present all Part A States and most of Part B States have adopted legislative measures on the subject while some Part B States and Part C States have extended the Acts of other States to their respective territories.

Scope, Qualifying Conditions, Period & Rates of Benefit under the State Acts

The scope, qualifying conditions, period and rate of maternity benefit vary considerably under the different State Acts. While Assam, Bombay, Bhopal, Hyderabad, Mysore, Madhya Pradesh, Travancore-Cochin Acts apply to women employed in all regulated factories, the scope of other State Acts is generally applicable to women employed in non-seasonal factories only. The period of leave during which maternity benefit is available varies from 7 weeks in Madras to 12 weeks in Hyderabad, Travancore-Cochin, and plantation workers in Assam and West Bengal. Some Acts provide for 8 weeks. The qualifying period of service also varies. It is 150 days in Assam, Travancore-Cochin and plantation workers in West Bengal, 240 days in Madras, 6 months in Bihar, Uttar Pradesh and 9 months generally in other Acts. The rate of cash benefit is also different. The rate of benefit in Bihar, Uttar Pradesh and West Bengal is average daily earnings or annas 8, whichever is greater while in Madhya Pradesh, Bombay and Mysore, the rate of benefit is average daily earnings or annas 8, whichever is less. In Punjab the rate is annas 12 per day or the average daily earnings whichever is higher and in Hyderabad the rate is annas 12 per day. The rate is Rs. 5/4/- per week in Travancore-Cochin and for plantation workers in West Bengal. Apart from the payment of cash benefits some Acts have made provisions for additional benefits also. Most of the Acts contain provisions for

protection against dismissal during maternity leave. Employment of women during maternity leave is a penal offence and a woman found employed during a benefit period is deprived of her statutory benefits.

Administration of the State Acts

The administration of the Acts in all the States is the responsibility of the Factory Inspectorate. Rules framed under the Acts require employers to furnish annual returns, the number of claims made, the number of claims paid and the total amount of benefit paid during the year. Bombay Government has appointed a Woman Inspector for the purpose.

The Labour Investigation Committee found that the Maternity Benefit Acts were not properly observed or enforced especially in the smaller concerns.

Mines Maternity Benefit Act, 1941 (XIX of 1941)

The question of extending the maternity benefits to women employed in mines was discussed at the Second Conference of Labour Ministers held in January 1941 and as a result of the discussions the Central Government enacted the Mines Maternity Benefit Act in 1941 (XIX of 1941) extending maternity benefit to women employed in mines. The Act which came into force on 28th December 1942, is the first instance of a Central measure dealing with maternity benefit. The Act prohibits the employment of women workers in mines during four weeks following the day of delivery of a child and provides for payment of maternity benefit at the rate of one half rupee per day for a period up to four weeks of absence before and four weeks after delivery. It provides for a period of one month of authorised absence or leave before confinement. The qualifying period entitling a woman to claim maternity benefit is six months' service preceding the day of delivery. The Act provides for bonus in addition to maternity benefit if the woman has been attended by a qualified midwife at the time of delivery.

Mines Maternity Benefit (Amendment) Acts of 1943 and 1945

The Act was amended in 1943 (XVIII of 1943) to clarify the meaning of section 5 of the Act. The Act was further amended in 1945 (X of 1945) to afford greater protection to the women working underground in mines. The Amending Act extends the prohibition from four weeks to twenty-six weeks after confinement in such case. During the period of ten weeks following the twenty-six weeks, underground employment is permissible for more than four hours a day if a creche is provided in the mine but for not more than four hours at any one time. The employer had to pay to the woman who had worked underground in mine for not less than 90 days in all during a period not exceeding 6 months immediately preceding the date on which the mine owner or manager was informed that she was likely to be delivered of a child within ten weeks, maternity benefit at the rate of Rs. 6/- a week for ten weeks immediately preceding and six weeks following her delivery. The rate of benefit has been increased from 8 annas to 12 annas a day in her case and women doctors have to be provided for such purpose.

Administration of the Central Act

The Act is administered by the Coal Mines Welfare Commissioner so far as coal mines are concerned. In other mines, its enforcement is the responsibility of the Chief Inspector of Mines.

Mines Maternity Benefit Rules, 1943

Under the Mines Maternity Benefit Rules 1943, the qualifications to be possessed by the midwife or trained person are to be determined by the State Governments.

Dismissal on the ground of pregnancy is prohibited. Owner or manager of a mine contravening any provision is liable to a fine of Rs. 500/- and a complaint has to be lodged within six months of the date of the alleged offence.

Five-Year Labour Programme of the Central Government

The maternity benefit legislation in India is neither uniform nor universal and there is no provision of free medical aid before, during and after confinement. Under the Five-Year Labour Programme, the Central Government proposed to enact a Central legislation to secure for workers other than those working in factories, the extended scale of benefits provided under the Health Insurance Scheme.

Maternity Benefit under the Employees' State Insurance Act

The Act provides for payment of maternity benefit at annas 12 per day or 50% of the assumed average wages whichever is higher and further provides for maternity leave for 12 weeks and medical benefits during this period. With the full implementation of the Act in all the States, the various State Maternity Benefit Acts will be superseded and there will be an uniformity in the legislative provisions regarding maternity benefits.

Maternity Benefit under the Plantation Labour Act

The Act provides for payment of maternity allowance to a woman in case of confinement or expected confinement. The rate, period of benefit, qualifying conditions, etc., are to be prescribed by rules framed by the State Governments.

Revised I.L.O. Convention on Maternity Protection

The International Labour Conference at its 35th Session held at Geneva in 1952 adopted a revised Convention No. 103 as well as a Recommendation No. 95 concerning Maternity Protection. The Convention covers industrial, non-industrial and agricultural occupations as well as women working at home and prescribes provisions for cash and medical benefits during maternity leave of 12 weeks (minimum). The Recommendation provides for longer leave, cash benefits equivalent to previous earnings, medical benefits on a higher scale, provision for facilities for nursing mothers and protection of health and employment of expectant and nursing mothers.

Uniformity in Maternity Benefit Legislation

The question of considering uniformity in legislation relating to maternity benefit keeping in view the I.L.O. Conventions and Recommendations, was discussed in the Thirteenth Session of the Indian Labour Conference held in Mysore in January, 1954. The Central Labour Minister explained that there were two basic questions relating to this subject—whether there should be a Central legislation on minimum uniform standards for maternity benefit or whether action would be taken for setting up a uniform standard for all States. There was considerable divergence of opinion in all groups.

Model Minimum Standards for Maternity Benefit Legislation

The Government of India have finalised the Model Minimum Standards for Maternity Benefit Legislation after considering the comments received and keeping in view the provisions of the I.L.O. Conventions and Recommendations and the existing State Maternity Benefit Acts and the Central Acts covering maternity benefits, *viz.*, the Mines Maternity Benefit Act, 1941, the Employees' State Insu-

rance Act, 1948 and the Plantation Labour Act, 1951 and have recommended to the State Governments that these Standards may be adopted either by enactment of fresh legislations or by revision of existing legislations where necessary. The Central Government have pointed out that these Model Standards aim to achieve uniformity and a desirable standard by striking a balance of the existing legislative provisions.

MINES MATERNITY BENEFIT ACT, 1941 (XIX OF 1941)

Statement of Objects and Reasons¹

Many Provinces have legislation providing for the payment of maternity benefits by employers to women workers employed in factories. This Bill provides, on the lines of the existing Provincial legislation covering factories, for prohibition from employment in mines of a woman worker during the four weeks following the day on which she is delivered of a child, and for the payment to her of maternity benefit at annas eight per day upto four weeks of absence before delivery and four weeks after delivery.

1. AMENDING ACT OF 1943 (XVIII OF 1943)

Statement of Objects and Reasons²

In section 5 of the Mines Maternity Benefit Act, 1941, the period preceding the delivery, for which a woman is entitled to maternity benefit is defined to be "every day on which she is absent from work owing to her confinement during the four weeks immediately preceding and including the day of her delivery." It has been brought to notice that the words "absent from work owing to her confinement" would not apply in respect of a day on which the mine is closed. The intention of the Government was that the woman should receive maternity benefit for every day, except on days on which she attends work and receive payment therefor, during the period referred to. This Bill seeks to give clear effect to this intention and remove the existing doubtful position.

2. AMENDING ACT OF 1945 (X OF 1945)

Statement of Objects and Reasons³

The Bill is intended to prohibit the employment of women below ground in mines when in an advanced stage of pregnancy and to grant maternity benefit to those women workers who are so prohibited.

In 1943 a great shortage of labour for employment in coal mines become noticeable, and the coal raisings were seriously affected to the serious detriment of the war effort of the country. It therefore became necessary temporarily to remove the ban on the employment of women below ground in coal mines in the major coal areas. The measure is of a purely emergent and temporary nature and the ban will be reimposed as soon as conditions permit. Employers are already prohibited from employing in mines women for 4 weeks after delivery and the women are entitled to benefit for 4 weeks before and after delivery. The removal of the ban on the employment of women below ground makes it necessary to extend the period of prohibition in case of women working under ground and to arrange for payment of benefit over a longer period. The Bill therefore proposes to prohibit the employment of women below ground for a period of 10 weeks before confinement as an addition to the present prohibition of employment for four weeks after confinement and to make the women eligible for benefit for a period of ten weeks before expected date of confinement. It is also considered necessary to have powers to vest any specified official with the powers at present exercised by the Chief Inspector of Mines and the Inspector of Mines only under the Mines Maternity Benefit Act, 1941. The Bill is intended to provide for this also.

MODEL MINIMUM STANDARDS FOR MATERNITY BENEFIT LEGISLATION¹

1. **Scope.**—Maternity benefit legislation should, in the first instance, cover all factories, mines and plantations as defined in the Factories Act, 1948, the Mines Act, 1952, and the Plantations Labour Act, 1951, respectively. Provision should however be made to enable the Government concerned to extend the scope of the legislation to other employments, as and when required. The State Governments should, also have the power to exempt (1) seasonal factories, (2) establishments where it will be so difficult to administer these provisions that they are likely to be evaded on large scale, and (3) if the existing benefits are more or less same as provided hereinafter.

2. **Qualifying Period of Service.**—The woman worker concerned should have entered service at least between 35 and 40 weeks before the week in which the confinement takes place or in which notice of pregnancy is given before confinement, whichever is more advantageous to her.

¹ These Model Minimum Standards for Maternity Benefit Legislation were prepared by the Central Government and forwarded to the State Governments with a recommendation that these may be adopted either by enactment of fresh legislation or by revision of existing laws where necessary.

3. **Period of Benefit.**—The benefit should be payable during a period of 12 weeks of which not more than six shall precede the date of confinement.
4. **Rate of Benefit.**—The minimum rate of benefit payable should be -/12/- annas per day or 7/12 of the average daily wage, whichever is higher.
5. **Protection of Employment.**—An employer shall not dismiss a woman worker once a notice of pregnancy has been given, except for gross misconduct, when such action will have the effect of depriving her of maternity benefits.
6. **Medical Benefits.**—A medical bonus of Rs. 10/- shall be payable to a woman worker on maternity leave if no pre-natal, confinement and post-natal care is provided by the employer free of charge.
7. **Nursing Breaks.**—There should be provision for reasonably adequate nursing breaks for nursing mothers.
8. **Protection of Health.**—A woman worker should be employed on light work during a period of one month prior to her proceeding on maternity leave.
9. **Miscarriage.**—There should be provision for leave with wages for three weeks from the date of miscarriage.
10. **Protection of Service Rights.**—The service rights of a woman worker would not in any way be prejudiced during her absence on maternity leave.
11. **Additional Leave.**—In addition to maternity leave for a period of 12 weeks there should be a provision for further leave for a maximum period of one month in cases of illness arising out of pregnancy or confinement.
12. **Payment of Benefit on the death of the woman worker.**—Provision regarding payment of benefit on the death of a woman worker should be made.

SOCIAL INSURANCE LEGISLATION

Social Insurance in India

Sir William Beveridge in his monumental Report on Social Insurance and Allied Services, has referred to five giants, viz., Want, Disease, Ignorance, Squalor and Unemployment, which should be attacked and killed, on the road to social security. India is afflicted by all these giants more than any other country. Hence the need of social security measures is all the more important in India. Unfortunately the Government did nothing to provide social security measures for the workers until 1948. The question of sickness insurance was examined by the Government of India for the first time in 1928 when the question of ratification of Draft Conventions (24 & 25) and Recommendations adopted at the tenth International Labour Conference in 1927 concerning sickness came up for consideration. The Government came to the conclusion that introduction of the scheme was not practicable in the existing conditions. The question was again brought before the Government when the International Labour Conference at its seventeenth session at Geneva adopted Conventions Nos. 35 to 40 and Recommendation No. 43 in 1933 concerning invalidity, old age and widows' and orphans' insurances; but the Central Government decided not to introduce the schemes on the ground of administrative and financial difficulties.

Social insurance is still in its infant stage of development in India. The principles of social insurance introduced in India were workmen's compensation legislation by the Central Government in 1923 and maternity benefit legislations by various State Governments from 1929. These legislations were merely measures of social assistance and developed out of the doctrine of employer's liability, the employer being responsible for payment of maternity benefits and compensation for employment injuries. The State has so long played the part of a mere legislator and has not so far interested itself in the introduction of social security measures or financial participation in them. Health insurance which is the most important form of social insurance has so long been neglected in India.

Whitley Commission Report, 1931

In 1931, the Royal Commission on Labour suggested an early consideration of the matter and proposed a tentative scheme to be put into operation for the time being, until a complete scheme based on statistical data could be devised. Despite the above recommendation, no concrete proposal was evolved and adopted in India before 1944.

Provincial Labour Enquiry Committees, 1938-1940

The Cawnpur Labour Enquiry Committee, 1938 and the Bihar Labour Enquiry Committee, 1940, recommended that the Provincial Governments should examine the possibility of sickness insurance scheme on the lines of the British model and pending the introduction thereof annual sickness leave should be granted to permanent employees of prescribed minimum service, in organised industries.

The Bombay Textile Labour Enquiry Committee, 1940, recommended the adoption of compulsory sickness insurance scheme for the permanent workers of the cotton textile industry, with monthly contributions by employers, workers and Government at the rate of As. 10, As. 5 and anna 1 per worker. The Committee further recommended that the administration of the scheme should be entrusted to a Central Board of Management and the administrative expenses should be borne by the Provincial Government.

Labour Ministers' Conferences, 1940-1942

The need for a system of sickness insurance has subsequently been recognised in India. The matter was raised before the first conference of Labour Ministers held on 22nd and 23rd January, 1940 when the principle of a central sickness insurance legislation was considered and it was decided to obtain the views of Provincial Governments and associations of employers and workers about compulsory contributions to the sickness insurance fund. The response from employers and workers was favourable. The second conference of Labour Ministers in 1941 suggested that preliminary actuarial examination should be undertaken in certain large industries before introduction of the scheme and was also of opinion that no contribution should be paid by the Government. A tentative scheme of sickness insurance prepared by the Labour Department of the Government of India was submitted before the third conference of Labour Ministers held on 30th and 31st January, 1942 for a basis of discussion and it was agreed that a draft sickness insurance scheme should be prepared for application in the first instance to the workers in cotton, jute and heavy engineering industries and the scheme to be financed by regular contributions from workers, employers and State.

Prof. Adarkar's Report and Stack & Rao's Integrated Scheme

In March, 1943, the Government of India appointed Prof. B. P. Adarkar as an officer on special duty to prepare a scheme of health insurance for industrial workers in India. The Report submitted in August, 1944 contains a comprehensive social insurance scheme and is first of its kind in India in dealing with compulsory and contributory social insurance measures.

Prof. Adarkar's Scheme was later examined by Messrs. Maurice Stack and Raghunath Rao, two officials of the International Labour Office who visited India at the invitation of the Government of India to advise on the matter. They suggested merely the extension of the scope to all perennial factories and to all workers, manual or non-manual and supported Prof. Adarkar's suggestion about a unified scheme of workmen's compensation, maternity benefit and sickness insurance given in the Appendix to his Report and further recommended that in the interest of economy and administrative efficiency and in accordance with the

modern practice, maternity benefit and workmen's compensation should be grouped together and integrated with sickness insurance through a single comprehensive scheme.

The Adarkar Scheme and the Stack-Rao Note were discussed at the sixth Labour Conference held on 27th and 28th October, 1944 and also at the sixth meeting of the Standing Labour Committee held on 17th March, 1945 and there was a general agreement that the Central Government should go ahead with the preparation of a scheme of health insurance applicable to all perennial factories and covering employment injuries and maternity benefits and that the scheme should be circulated before a Bill was prepared.

Workmen's State Insurance Bill, 1946 (L. A. Bill No. 58 of 1946)

The Workmen's State Insurance Bill providing for a unified scheme of insurance for workers in perennial factories and covering sickness, maternity and employment injury benefits was introduced in the Indian Legislative Assembly on the 6th November, 1946. In the words of the then Central Labour Minister, "the Bill is a beginning of a scheme of social security on the lines followed in countries much more advanced economically."¹

The Bill was referred to the Select Committee on the 22nd November, 1947. In moving the motion that the Bill be referred to the Select Committee, the Central Labour Minister admitted that the scope of the Bill is limited, "but while considering social security measures and specially measures of the present nature, we have to keep in view various limiting factors which we have to face, not only in the case of working class, but for the country as a whole."² The Select Committee submitted the Report on the 11th February, 1948 making substantial improvement over the original Bill. The original Bill was meant for factory workers and not for the clerical staff of the factory but the Select Committee modified the provisions making it applicable to all employees in factories and changed the name of the Bill to the Employees' State Insurance Bill.

In piloting the Bill, the Labour Minister said that the Bill opened a new chapter in the history of labour legislation in this country and was the beginning of social security measures. Its scope was limited but the benefit might be expanded and extended to any extent to cover the various categories of working classes in this country and this would be done as soon as conditions permit.³

Employees' State Insurance Act, 1948 (XXXIV of 1948)

The Act was passed on the 2nd April, 1948 and received the assent of the Governor General on the 19th April, 1948. The Act is the first of its kind in South-East Asia and marks the first attempt in introducing a compulsory integrated system of social insurance covering health, maternity and accident benefits.

Scope of the Act

The Act applies initially to all perennial factories including Government factories and covers persons employed for wages in connection with the work in a factory excepting members of the armed forces or persons earning more than Rs. 400/- per month. The State Government may in consultation with the Employees' State Insurance Corporation and the approval of the Central Government, extend all or any of the provisions of the Act to any industrial, commercial or agricultural establishment after giving six months' notice.

Benefits provided under the Act

The Act provides for the following types of benefits to the insured persons or their dependants:—(1) sickness benefit, (2) maternity benefit, (3) disablement benefit, (4) dependants' benefit and (5) medical benefit.

The right to receive benefit is not transferable or assignable and the cash benefit is not attachable. The person entitled to any benefit under this Act is not entitled to receive similar benefit under any other Act, viz., Workmen's Compensation Act or Maternity Benefit Act. A person is also not entitled to receive more than any of the following benefits at the same time, viz., sickness, maternity and disablement.

(1) Sickness Benefit

This benefit consists of periodical cash payment to an insured person in case of sickness during which he is unable to attend his work on account of illness. An insured person will be entitled to receive sickness cash benefit during a benefit period provided he has fulfilled necessary contributory conditions during the corresponding contribution period. Contributions should be payable for two-thirds of the period, but the minimum number of contribution has been fixed at twelve. The benefit is payable for a maximum period of 56 days during the continuous period of 365 days, at a rate equal to one-half of the average daily wages. Sickness benefit is payable for all the 7 days of the week. It is not payable for an initial waiting period of 2 days unless the spell of sickness occurs within a period of 15 days of the last spell of sickness for which benefit was paid.

(2) Maternity Benefit

The contributory conditions for this benefit are the same as in the case of sickness benefit except that in this case at least one contribution has been paid between 35 and 40 weeks before the week of confinement or notice of pregnancy. The rate of benefit is 12 annas per day or at sickness benefit rate whichever is higher, for six weeks before and six weeks after child-birth. There is, however, no waiting period in this case.

(3) Disablement Benefit

This benefit is payable in respect of temporary, permanent partial or permanent total disablement, as a result of an employment injury. The daily rate of benefit for temporary disablement is equivalent to half the assumed average daily wages for a continuous period of 52 weeks immediately preceding the week in which the injury occurs. Unlike sickness and maternity benefits, no contributory conditions have been prescribed for payment of this benefit which is payable right from the first day of incapacity as a result of temporary disablement if the same exceeds 7 days. The rate of benefit for permanent total disablement is same as temporary disablement. The rate for permanent partial disablement will be in proportion to the loss of earning capacity determined on the recommendation of a medical board. The permanent partial or total disablement benefit is payable in the form of a life pension.

(4) Dependants' Benefit

This benefit is payable in cash to the dependants of an insured person who dies as a result of employment injury. Dependants' benefits are payable to the insured person's wife and children at the following rates—at $\frac{3}{5}$ of the full rate to the widow during life or till remarriage, $\frac{2}{5}$ of the full rate to each legitimate or adopted son up to age 15 and $\frac{2}{5}$ of the full rate to each legitimate unmarried daughter up to age 15 or marriage which is earlier.

The periodical cash payments for Disablement Benefit and Dependants' Benefit, prescribed by the Employees' State Insurance Act, is an improvement over the benefits so far provided under the Workmen's Compensation Act and are considered to be a far more suitable method of income security to workers. The Workmen's Compensation Act provides for a lump sum payment in case of permanent disablement or death caused by an employment injury whereas the Employees' State Insurance Act substitutes the lump sum by a regular periodical pension, as lump sum amount is apt to be squandered without regard to future requirements.

(5) Medical Benefit

The insured person is entitled to receive medical benefit of such kind and scale as may be prescribed by the State Government or the Corporation, either in the form of out-patient treatment or attendance in hospital, dispensary or clinic. Medical benefit consists of free medical treatment in case of sickness, employment injury and maternity.

Employees' State Insurance Corporation

The administration of the insurance scheme framed under the Act has been entrusted to an autonomous body called the Employees' State Insurance Corporation consisting of 39 members with the Central Minister for Labour and the Central Minister for Health as ex-officio Chairman and Vice-Chairman; five persons nominated by the Central Government including three of its officers; one person each representing each of the Part A and B States nominated by the State Governments; one person to represent the Part C States nominated by the Central Government; five persons representing employers and five persons representing employees; two persons representing medical profession and two persons elected by the Parliament. The members representing the various interests and those elected by Parliament hold office for a term of four years, while the representatives of the Central and State Governments hold office during the pleasure of the Governments nominating them.

Standing Committee

A smaller body, known as the Standing Committee is to work as the executive of the Corporation. The Standing Committee is composed of members who are members of the Corporation. It consists of a Chairman and the three official members of the Corporation and nine members elected by the Corporation—(1) three nominees of the State Governments; (2) two representatives of employers; (3) two representatives of employees; (4) one representative of medical profession and (5) one representative of Parliament. The term of office of the members excepting Government nominees will be two years. The Standing Committee shall administer the affairs of the Corporation and shall exercise all its powers and functions.

Medical Benefit Council

The Medical Benefit Council will consist of 28 members with the Director General, Health Services as ex-officio Chairman, Medical Commissioner of the Corporation as ex-officio member, Deputy Director General, Health Services nominated by the Central Government; one member representing each of the Part A States nominated by the State Governments concerned, three members each representing employers, employees and medical profession (out of which one shall be a woman). The term of office will be four years excepting Government representatives. The Council will advise the Corporation, the Standing Committee and the Medical Commissioner regarding the administration of medical benefit, certi-

fication for the purpose of granting benefit and other connected matters. The Council will investigate in connection with complaints against medical practitioners regarding the medical treatment and attendance.

Regional Boards, Regional Medical Benefit Councils, etc.

The Corporation has power to appoint Regional Boards, Local Committees, Regional and Local Medical Benefit Councils and delegate such powers and functions as may be prescribed. Under the Regional offices, there will be several local offices and inspection offices. Regional offices maintain records of insured persons, administer local offices which deal with claims and benefits of insured persons.

Principal Officers and Staff

The day to day administration of the scheme is entrusted to the following Principal Officers—Director General of Employees' State Insurance, Insurance Commissioner, Medical Commissioner, Chief Accounts Officer and Actuary. The principal officers will be wholetime officers of the Corporation and are not allowed to do any work unconnected with their office without previous sanction. The Director General is the Chief Executive Officer of the Corporation and functions through the network of regional and local offices.

The Corporation will appoint other staff for efficient transaction of the business; but Government's sanction is necessary for creation of any post with a salary of Rs. 500/- or over.

Employees' State Insurance Fund and Finance

The scheme is financed by the Employees' State Insurance Fund, which is administered by the Corporation. The Fund will consist of contributions received from the employers and employees, donations and gifts from Central and State Governments, local authorities, etc.

The fund shall be expended, amongst others, for (1) payment of benefits and provision for medical treatment to insured persons and their families, if extended; (2) payment of fees and allowances to the members of the Corporation, Standing Committee, Medical Benefit Council, Regional Boards, Local Committees, Regional and Local Medical Benefit Councils; (3) payment of salaries and allowances of officers and staff of the Corporation; (4) establishment and maintenance of hospitals, dispensaries and other institutions; (5) payment of contributions to others for cost of medical treatment and attendance to the insured and (6) defraying expenditure for health and welfare of insured persons and for their rehabilitation and re-employment if disabled or injured.

During the first five years, the Central Government have to make an annual grant to the Fund of a sum equivalent to two-thirds of the administrative expenses of the Corporation, not including the costs of benefits. The State Governments also share in financing the scheme by meeting a share of the cost of medical treatment and attendance on the insured persons, the proportion being governed by an agreement between the Corporation and the State Governments. The Corporation has to prepare an annual budget showing the estimate of receipts and expenditure to be incurred during the following year and submit a copy for the approval of the Central Government.

Contributions by the Employers and Employees

The weekly contribution in respect of an employee, is payable by the employee and his employer at the rate specified in Schedule I of the Act. For this purpose the employees have been divided into eight groups on the basis of their average daily wages. An employee earning between Re. 1/- and Rs. 1/8/- per day will pay

annas 2 per week as his contribution, while one drawing Rs. 8/- or more per day will pay Rs. 1/4/- per week. Employees earning less than Re. 1/- per day are exempted from payment, though they are still entitled to all the benefits of the scheme. The average contribution of employees works at about 2% to 2½% of their wages. The principal employer shall pay in respect of every employee, whether employed by him or through an immediate employer, both the employer's contribution and the employee's contribution and he is entitled to recover the employee's contribution by deducting it from his wages due for the period to which contribution relates.

No employees' contributions are payable for any week during which no services are rendered and no wages are received, but during the periods of authorised leave, lock-out or legal strike, the employees' contribution will be payable only if wages are paid either in part or full in respect of the periods covered by such strikes.

Employer's Special Contributions

The implementation of the scheme by gradual stages gave rise to complaints of the employers where the scheme was first to start, about unfair competition and rise in costs of production as a result of their obligation to pay contributions, while the employers in other regions were free from such obligation. The Act was accordingly amended in 1951 to spread the incidence of the cost of the scheme equitably over all employers throughout the country, employers in regions where the scheme is implemented paying higher contributions.

Under the Amending Act, the Central Government have fixed the percentage of the rates of employer's contribution at one and one-fourth per cent of their total wage bill in areas where the scheme is introduced. In other places, employers will pay a special employers' contribution of three-fourths of one per cent of their total wage bill. Wherever the scheme is introduced, the employers' responsibilities under the Workmen's Compensation Act and Maternity Benefit Act and cost of medical care in respect of employees will be taken over by the Corporation.

The provisions of the Amending Act are designed to meet the needs of the transition period. When the scheme has been implemented throughout the country, the employers' contribution will be in accordance with Schedule I of the Act. While the employee pays his contribution only if the scheme has been brought into operation in his area, employers throughout the country are paying employers' special contributions with effect from 24th February, 1952, under the transitional provisions of the Amending Act of 1951.

Liability of the Employers

Where an employment injury is sustained by an insured person on account of negligence of the employer in the observance of safety rules, the Corporation is entitled to recover from the employer, the actuarial present value of periodical payments to be made to the insured person. Where the Corporation considers that the incidence of sickness amongst insured persons is excessive on account of insanitary working conditions in the factories or establishments or insanitary conditions of the tenements or lodgings, the Corporation will forward a claim to the owner or occupier of the factory or establishment for payment of extra expenditure incurred as sickness benefit. If the claim is not settled by agreement, the same will be referred to the State Government who will appoint competent person or persons to enquire into the matter. If the enquiring officer is satisfied that the excess in incidence of sickness is due to default or neglect of the owner of the factory or tenements, he will determine the amount of extra expenditure incurred as sickness benefit and the person or persons by whom the whole or any part of such amount shall be paid to the Corporation.

Employers shall not reduce the wages of any employee or discontinue or reduce the benefit payable to him. Employers shall not also dismiss, discharge or otherwise punish any employee while receiving sickness or maternity benefit or discharge, reduce or otherwise punish any employee while receiving disablement benefit or is under medical treatment for sickness or is absent on account of pregnancy or confinement duly certified. Notice of dismissal, discharge or reduction during the above period shall not be valid or operative.

Employees' Insurance Court

The Act contains provisions for setting up of Employees' Insurance Courts by the State Governments consisting of judicial officers or legal practitioners of five years' standing, to decide all questions and disputes arising out of the rate of contribution and liability of the employer regarding contribution and all claims regarding condition and benefit. Civil Court has no jurisdiction over the above questions.

The Employees' Insurance Court shall have the powers of civil court and its order is enforceable like a civil court decree. The proceeding before the court shall be instituted by application in such form and with such fees as may be prescribed by the State Government. No appeal shall lie from an order of the court, but if it involves a substantial question of law, appeal shall lie to the High Court.

Exemption by Appropriate Government

The Act empowers the appropriate Government to grant exemption to a factory or establishment or class of factories or establishments or any persons or class of persons in any factory or establishment, from the operation of the Act for a period not exceeding one year and to renew such exemption for periods not exceeding one year at a time.

Penalties and Prosecutions

Infringement of the provisions of the Act is punishable with imprisonment which may extend to 3 months or with fine which may extend to Rs. 500/- or with both. Prosecution has to be instituted before a Presidency Magistrate or a Magistrate of the first class, by or with the previous sanction of the Insurance Commissioner within six months of the commission of the offence.

Employees' State Insurance (Amendment) Act, 1951 (LIII of 1951)

Though the Employees' State Insurance Act was enacted in April, 1948, it was not possible to implement the scheme throughout the country simultaneously due to setting up of necessary administrative arrangements and statutory bodies. A programme of phased implementation of the scheme was drawn up by the Employees' State Insurance Corporation and it was proposed to introduce two pilot schemes, in the first instance, in Kanpur and Delhi by July, 1950. The employers of Kanpur, however, raised certain objections to the scheme and pointed out that if the scheme was to be implemented only in few regions without its simultaneous application in other areas, it would increase the cost of production in these places and would thus adversely affect their competitive position. The Government of India recognised the force of the above argument and decided to distribute the employers' contribution all over the country in an equitable manner so that the phased implementation of the scheme is not affected in any way. As the levy of employers' contribution outside the scheme area was not provided in the original Act, an Amending Bill was introduced in the Parliament and was passed as the Employees' State Insurance (Amendment) Act, 1951.

The main object of this amendment is to spread the incidence of cost of the scheme equitably over all employers throughout India and to provide for the employers' special contribution for a temporary period till the original Act is implemented throughout the country. Under the amendment, the employers all over India shall pay the employers' special contribution which will not exceed 5% of their total wage bill. The percentage is to specified by the Central Government from time to time. By a notification dated the 1st February, 1952, the Central Government has decided that the employers' special contribution in the places where the scheme is introduced will be one and one-fourth per cent of their total wage bill and in other places the employers' special contribution will be three-fourths of one per cent of the total wage bill, with effect from 24th February, 1952. The provisions of the amendment are designed to meet the needs of the transitory period and will be inoperative after the scheme is implemented in full throughout the country.

Enforcement and Implementation

Chapters I (Preliminary), II (Corporation, Standing Committee and Medical Benefit Council), III (Finance and Audit) and VIII (Miscellaneous) were brought into force in all Part A States from 1st September, 1948. Chapter IV (Contributions)—Sections 44 (Employers to furnish returns and maintain registers in certain cases) and 45 (Inspectors, their duties and functions) and Chapter VII (Penalties) were brought into force in all Part A States, States of Delhi, Ajmer, Coorg and Andaman and Nicobar Islands from 1st April, 1950. The above provisions were also brought into force in the remaining Part C States from 1st December, 1950 and in all Part B States except the State of Jammu and Kashmir from the 24th November, 1951. Chapter V-A of the Amending Act of 1951 by which a special contribution is leviable on all employers was brought into force all over India except the State of Jammu and Kashmir with effect from the 24th of November, 1951.

The benefit provisions of the Act were first introduced in (1) Kanpur and Delhi on the 24th February, 1952 and were later extended to (2) eight industrial cities of Punjab with effect from the 17th May, 1953; (3) Nagpur on the 11th July, 1954; (4) Greater Bombay on the 2nd October, 1954; (5) four industrial cities of Madhya Bharat, *viz.*, Ujjain, Gwalior, Ratlam, Indore on the 23rd January, 1955; (6) Coimbatore in Madras from the 23rd January, 1955; (7) Hyderabad and Secunderabad cities on the 1st May, 1955; (8) Madras city and eleven revenue villages in Chingleput District on the 20th November 1955; (9) Calcutta city and Howrah district on the 15th August, 1955 and (10) municipal areas of Agra, Lucknow and Saharanpur and cantonment areas of Agra and Lucknow from 15th January, 1956. The scheme will be extended shortly to Ahmedabad, Bangalore, Saurashtra and certain industrial towns of Travancore-Cochin and West Bengal.

The working of the scheme in the implemented areas has proved that the benefits provided therein are a boon to the factory workers in as much it not only guarantees their income security in case of sickness, maternity or disablement and makes easily available expert medical attention in case of illness but also it saves the dependant widow and children of the employee dying as a result of an employment injury from utter destitution through periodical cash payments.

The employers in the implemented areas are also absolved of their liability under the Workmen's Compensation Act, Maternity Benefit Act and cost of medical care of their employees as all these functions have been taken over by the Employers' State Insurance Corporation.

Employees' State Insurance (Central) Rules, 1950

The Rules framed by the Central Government under Section 95 of the Act was finally published on the 1st July, 1950. These rules relate to the election of members to the Standing Committee, salaries, allowances, conditions of service, powers and duties of the Principal Officers of the Corporation; raising and repayment of loans; disposal and investment of funds; annual budget estimates, audit and accounts and provident fund.

Medical Benefit Rules & Insurance Court Rules

A set of model rules under Section 96 of the Act was also framed by the Central Government and forwarded to the State Governments for adoption. Most of the States have framed Employees' State Insurance (Medical Benefit) Rules and Employees' Insurance Courts Rules.

Employees' State Insurance (General) Regulations, 1950

In exercise of the powers conferred by Section 97 of the Act, the Employees' State Insurance Corporation at its meeting held in May, 1950, has framed Regulations for administration of its affairs and for carrying into effect the provisions of the Act. The Corporation has also made certain amendments to the regulations as were considered necessary.

Further Extension of Social Insurance Scheme in India

The Employees' State Insurance Act of 1948, though first of its kind in South-East Asia, is limited in its scope and application. The Social Security Act, 1954 (LXVII of 1954) enacted in Burma in October 1954, provides for (1) general insurance for sickness, maternity and death and (2) employment injuries insurance for employment accidents and occupational diseases and its scope is more wide than the Indian legislation. It appears to (a) industrial establishments employing at least ten workers; (b) Government railways; (c) public industrial and transport establishments; (d) ports; (e) mines; (f) oilfields; (g) stevedoring establishments; (h) employees of Social Security Board administering the law and (i) any other establishment notified by the President from time to time.

Though the Act was passed in April, 1948, it has not yet been fully implemented all over India even during the end of 1955. Of course, in a vast country like India, it has not been possible to implement the scheme throughout the country simultaneously after setting up different statutory bodies envisaged under the law. It is expected that at the present rate of progress in the implementation of the scheme, all factory workers throughout the country will be covered by the end of 1956 and then it will cover only about two and half million workers. It may be mentioned here that the National Insurance Act, though passed in 1946 in Great Britain, was implemented in full from July, 1949.

The Planning Commission, also, in the First Five Year Plan (April, 1951 to March, 1956) remarked that "both in its coverage and the amount of benefits provided the scheme may appear to be modest as compared with similar schemes in some of the advanced countries" and recommended that "in view of its novelty, administrative and other difficulties and the financial implications of the scheme, effort should be directed during the period of Plan only to the proper implementation of the scheme in its present form and to putting it on a sound and sure foundation."⁴

The Central Labour Minister while closing his speech on the Workmen's State Insurance Bill in the Constituent Assembly on the 2nd April, 1948, remarked that "it is the beginning of the social security measures but there is a provision in the

⁴ Planning Commission—The First Five Year Plan, page 586.

Bill itself by which the benefits of this measure may be expanded and extended to any extent in order to cover the various categories of the working classes in the country. I hope the Corporation, the Provincial Governments and the Central Government will take the earliest opportunity to extend the scope of this Bill as soon as conditions permit."⁵ The former Director-General of the Employees State Insurance Corporation in the concluding portion of his article on State Insurance Scheme published in the Indian Labour Gazette in April 1952, remarked, "As we gather experience and as our national income increases, I am confident the scope as well as benefits provided under this measure will be enhanced and it will not be long when other risks such as unemployment, old age, death, etc., will be covered and not only industrial workers but everyone in this country will be protected against the social risks to which a man is ordinarily exposed in his life. That is our cherished goal and we hope to achieve it in not too distant a future."⁶

EMPLOYEES' STATE INSURANCE ACT, 1948 (XXIV OF 1948)

Statement of Objects and Reasons¹

1. The introduction of a scheme of Health Insurance for Industrial Workers has been under the consideration of the Government of India for a long time. The necessity for such a scheme has become more urgent in view of the conditions brought about by war. The scheme envisaged is one of compulsory State insurance providing for certain benefits in the event of sickness, maternity and employment injury to workmen employed in or in connection with work in factories other than seasonal factories.

2. A scheme of this nature has to be planned on an all-India basis and administered uniformly throughout the country. With this object, the administration of the scheme is proposed to be entrusted to a Corporation constituted by central legislation.

3. The functions of the Corporation will be performed by a Central Board constituted of representatives of Central and Provincial Governments, and of employers, workers and the medical profession. The Board will also include certain members elected by the Central Legislative Assembly. A Standing Committee of the Board will act as the executive of the Board, and a Medical Benefit Council will also be set up to advise on matters relating to the administration of medical benefit.

4. The insurance fund will be mainly derived from contributions from employers and workmen. The contributions payable in respect of each workman will be based on his average wages and will be payable in the first instance by the employer. The employer will be entitled to recover the workman's share from the wages of the workman concerned. Workmen whose earnings do not exceed 10 annas a day will be totally exempt from payment of any share of the contribution, the entire contribution on account of such workmen being met by the employer. Provision has been made for the preparation of proper budgets and the audit of accounts.

5. The insured workman will be entitled to the following benefits:—

(a) Sickness Cash Benefit—A workman, if certified sick and incapable of working, will receive for a period not exceeding 8 weeks in any continuous 12 monthly period, a cash allowance equal approximately to half his average daily wages during previous six months. He will also be entitled to receive medical care and treatment at such hospitals, dispensaries or other institutions to which the factory in which he is employed may be allotted.

(b) Maternity Benefit—Woman workers will be entitled to receive a maternity benefit at 12 annas a day for 12 weeks. They will also be entitled to medical aid at the aforesaid medical institutions.

(c) Disablement and Dependents' Benefits—A workman disabled by employment injury will receive, for the period of disablement or life depending on whether the disablement is temporary or full and permanent as the case may be, a monthly pension equivalent to half his average wages during the previous twelve months, subject to a maximum and

minimum. Where disablement is partial, the pension will be proportionately reduced. In case of death resulting from employment injury, the pension will be payable to the widow or widows, minor sons and minor and unmarried daughters, or in case there are no widow and legitimate children, to other dependants, of the deceased workman. The workman will also be entitled to medical care and treatment.

6. Medical care and treatment to insured workmen will be provided by Provincial Governments at such hospitals, dispensaries and other institutions as may be prescribed for the purpose. The cost of the medical benefit will be shared between the Provincial Government and the Corporation in such proportions as may be agreed upon between them. In case the average incidence of sickness cash benefit in any Province is in excess of the all-India average, Provincial Government will also bear such share of the cost of the excess incidence as may be agreed upon between it and the Corporation.

7. Workmen's State Insurance Courts will be set up to decide disputes and adjudicate on claims. The cost of the tribunal will be paid by the insurance fund.

8. Central Government will make rules on matters relating to the administration of the Corporation, such as nomination and election of members of the Board, Standing Committee, Medical Benefit Council, powers and duties of the principal officers, raising of loans, investment of funds, accounts to be maintained by the Corporation, their audit and publication. Provincial Government will make rules on matters relating to the workmen's insurance courts to be set up under the Act, establishment of hospitals, dispensaries, medical institutions, etc., and the scale of medical benefit to be provided to insured persons. The Board will make regulations on matters relating to the working of the scheme, *e.g.*, collection of contributions, payment of benefits, returns and other particulars to be submitted by employers in respect of workmen employed by them, the conditions to be observed by insured persons in receipt of benefits, etc.

9. The Bill makes detailed provisions in regard to the above matters. As the clauses are self-explanatory, Notes on Clauses have not been appended.

AMENDING ACT OF 1951 (LIII OF 1951)

Statement of Objects and Reasons²

The Employees' State Insurance Act, 1948, was passed by the Dominion Legislature in April 1948. It provides for certain benefits to industrial employees in case of sickness, maternity and employment injury. The Act permits the implementation of the scheme by stages.

2. It was intended that the scheme should be implemented in the first instance in Delhi and Kanpur, but regional implementation of such schemes is always attended with certain practical difficulties. The principal difficulties are the rise in the cost of production and the diminution of the competitive capacity of industries located in those regions. The main objections of the employers centred round the former difficulty and those of the Uttar Pradesh Government emphasised the latter. The Central Government have considered those objections and are anxious to avoid any competitive handicap to any region. This may be best achieved by an equitable distribution of the employer's contribution, even where implementation is effected only in certain areas, among the employers in the whole country—employers in regions where the scheme is implemented paying slightly higher contributions. This will minimise the contribution leviable from the employers and spread the incidence of the cost of the scheme equitably. This Bill is primarily intended to achieve this object.

3. Advantage has been taken of this opportunity to effect some other amendments to the Act which have been found necessary for rectifying certain defects and removing certain lacunae in the Act. The reasons for the amendments are, wherever necessary, given in the Notes on Clauses attached to this Bill.

Notes on Clauses

Clause 2—Sub-section (3) of section 1 does not permit of implementing the scheme directly in a part of a State. This amendment provides for such implementation.

Clause 3(c)—Railway running sheds are excluded from the definition of factories in the Factories Act, 1948. This amendment seeks to achieve the same object in respect of the Employees' State Insurance Act.

² Gazette of India, 1951, Part II—Section 2, pages 141-143.

Clause 5—In order to avoid frequent elections and notifications arising out of the changes in the State Governments' nominees, this clause provides for notification by the Central Government of three States Governments whose representatives would automatically be on the Standing Committee.

Clause 8—This clause provides for the cessation of membership on the loss of representative character.

Clause 12—This clause provides for the maintenance of records and furnishing of some additional information.

Clause 14—The principal change is liberalisation of the daily rate of maternity benefit. By this amendment the insured woman would be entitled to the existing daily rate of 12 annas or the sickness rate whichever is the higher.

Clause 15—This clause removes the power to determine rates of dependants' benefits in certain cases from the Workmen's Compensation Act Commissioner and vests it in the Employees' Insurance Court. Similarly the ultimate responsibility for the other duties of Workmen's Compensation Act Commissioner is being shifted to the Employees Insurance Court by other amendments in the Bill. This is in conformity with the general procedure for adjudications of other disputes and claims under the Act.

Clause 16.—The power of review is to be exercised in cases of dependants' benefits also.

Clause 20—A new self-contained chapter is proposed providing for the collection of employer's special contribution throughout the Union. The rate of the contribution which may be varied from time to time is to be fixed by the Central Government after two months' notice by notification. The rate of the contribution shall be higher in areas where the scheme applies than in other areas. The manner of and time within which the special contribution is to be paid would be notified by the Central Government. Consequential provisions fitting the employer's special contribution into the existing scheme of the Act and other necessary provisions have been made in this Chapter. The Central Government is empowered to give direction or provide for such matters as may be necessary for the removal of any difficulty. The Chapter can be withdrawn from operation by the Central Government after giving three months' notice.

Clause 24—This provision enables the Corporation and the Standing Committee to delegate to their officers such of their powers as they may think fit. This power is necessary for carrying on day to day administration.

Clause 25—The principal change is the avoidance of previous publication in the case of regulations relating to the conditions of service of employees of the Corporation.

Clause 28—The amendment is intended to simplify calculation and clarify certain doubtful points.

Clause 29—The amendments are principally intended to remove certain doubts, anomalies and obvious omissions.

SCHEDULE II—(See sections 49, 51, 52 and 53)

Sickness Benefit and Disablement and Dependants' Benefits

1. The average daily wages of an employee in each of the groups specified in the first column of the table below shall, for the purpose of calculating the sickness benefit and disablement and dependants' benefits be assumed to be the rate specified in the corresponding entry in the second column thereof.

TABLE

Group of employees	Average assumed daily wages	Rs. A. P.
1	2	
1. Employees whose average daily wages are below Re. 1	...	0 14 0
2. Employees whose average daily wages are Re. 1 and above, but below Rs. 1-8-0	1 4 0	1 4 0
3. Employees whose average daily wages are Rs. 1-8-0 and above, but below Rs. 2	1 12 0	1 12 0
4. Employees whose average daily wages are Rs. 2 and above, but below Rs. 3	2 3 0	2 3 0

6. Employees whose average daily wages are Rs. 4 and above, but below Rs. 6	5 0 0	5 0 0
7. Employees whose average daily wages are Rs. 6 and above, but below Rs. 8	7 0 0	7 0 0
8. Employees whose average daily wages are Rs. 8 and above	...	10 0 0

2. The daily rate of sickness benefit during any benefit period shall be an amount equivalent to one-half of the sum of the assumed average daily wages as aforesaid for each of the weeks for which contributions were paid in respect of the person during the corresponding contribution period, divided by the number of weeks in that contribution period in which he was deemed to have been available for employment within the meaning of section 48 ⁵⁷[plus the number of any other weeks in that contribution period for which contributions were paid in respect of the person]; provided that where the amount of the benefit so calculated includes a fraction of an anna, it shall be rounded to the next higher anna. The calculation indicated above is illustrated by the following examples:—

Example 1.—If the assumed average daily wages of the person as an employee were Rs. 1-4-0 a day for 10 weeks, Rs. 1-12-0 a day for 10 weeks and Rs. 2-8-0 a day for 6 weeks, the average of the assumed daily wages for the purpose of the rate of sickness benefit will be:—

$$\frac{10 \times 20 + 10 \times 28 + 6 \times 40}{26} = 27 \frac{18}{26}$$

The daily rate of sickness benefit payable in the benefit period will then be 13 — 22
26
annas rounded to the next higher anna, namely, 14 annas.

Example 2.—If the person was deemed to have been not available for employment for 14 weeks in any contribution period and was employed as an employee for only 12 weeks in that contribution period, his assumed average daily wages being Rs. 1-4-0 for the 12 weeks, the average of the assumed daily wages for the purpose of the rate of sickness benefit will be:—

$$\frac{12 \times 20}{(26 - 14)} = 20 \text{ annas.}$$

The daily rate of sickness benefit payable in the benefit period will then be 10 annas.

Example 3.—If the person was deemed to have been not available for employment for 4 weeks in any contribution period and was employed as an employee for only 20 weeks (he having been without any employment for 2 weeks) in that contribution period, his assumed average daily wages being Rs. 1-12-0 for 20 weeks, the average of the daily wages for the purpose of the rate of sickness benefit will be:—

$$\frac{20 \times 28}{(26 - 4)} = 25 \frac{5}{11} \text{ annas.}$$

The daily rate of sickness benefit payable in the ¹[benefit period] will then be 12 — 8
11
annas, rounded to the next higher anna, namely, 13 annas.

⁵⁷ Subs. by Act 53 of 1951, s. 29.

3. Disablement and dependants' benefit shall be an amount equivalent to one-half of the sum of the assumed average daily wages for each of the weeks for which contributions were paid in respect of the employee during the period of fifty-two weeks immediately preceding the week in which the employment injury occurs, divided by the number of weeks for which contributions were so paid: ⁵⁸[Provided that where no contribution was paid in respect of the employee during the aforesaid period of fifty-two weeks the disablement and dependants' benefit shall be an amount equivalent to one-fifty-second part of the monthly wages calculated in accordance with section 5 of the Workmen's Compensation Act, 1923, (VIII of 1923), and provided further that] where the amount or the benefit so calculated includes a fraction of an anna, it shall be rounded to the next higher anna. The calculation indicated above is illustrated by the following examples:—

Example 1.—If the assumed average daily wages of an employee were 14 annas a day for 20 weeks, Rs. 1-4-0 a day for 20 weeks and Rs. 1-12-0 a day for 12 weeks, the average of the assumed daily wages for the purpose of disablement and dependants' benefit will be:—

$$\frac{20 \times 14 + 20 \times 20 + 12 \times 28}{52} = 19 \frac{28}{52} \text{ annas.}$$

The disablement or dependants' benefit will then be $9 \frac{20}{26}$ annas to the next higher anna, namely, 10 annas a day.

Example 2.—If the employee worked only for 34 weeks in the period of 52 weeks preceding the week in which the employment injury occurs and his assumed average daily wages were 14 annas a day for 20 weeks and Rs. 1-4-0 for 14 weeks, the average of the assumed daily wages for the purpose of disablement and dependants' benefit will be:—

$$\frac{20 \times 14 + 14 \times 20}{34} = 16 \frac{16}{34} \text{ annas}$$

The disablement or dependants' benefit will be $8 \frac{8}{34}$ annas, rounded to the next higher anna, namely, 9 annas a day.

The disablement or dependants' benefits calculated as aforesaid shall be called the full rate.

4. The disablement or dependants' benefit shall be payable to a person suffering from disablement as a result of an employment injury sustained as an employee in a factory or establishment to which this Act applies, or if he dies as a result of such injury, to his dependants, as follows:—

(i) to the insured person—

- (a) for temporary disablement, during the period of such disablement at the full rate;
- (b) for permanent partial disablement, at a percentage of the full rate, as provided in section 4 of the Workmen's Compensation Act, 1923 (VIII of 1923), for life;
- (c) for permanent total disablement, at the full rate for life;
- (d) in cases of disablement not covered by causes (a), (b) and (c) above, as may be provided in the regulations.

(ii) in the case of the death of the person, to his widow and children as follows:—

- (a) to the widow during life or until remarriage an amount equivalent to three-fifths of the full rate and, if there are two or more widows, the amount payable to the widow as aforesaid shall be divided equally between the widows;
- (b) to each legitimate or adopted son, an amount equivalent to two-fifths of the full rate until he attains fifteen years of age;

⁵⁸ Subs. by Act 53 of 1951, s. 29.

- (c) to each legitimate unmarried daughter, an amount equivalent to two-fifths, of the full rate until she attains fifteen years of age or until marriage, whichever is earlier:

Provided that the Corporation may continue such benefit to any legitimate or adopted son or any legitimate unmarried daughter until he or she attains the age of eighteen years if such son or daughter continues education to the satisfaction of the Corporation:

Provided further that if the total of the dependant's benefits distributed among the widow or widows and ⁵⁹[legitimate children or adopted son] of the deceased person as aforesaid ⁵⁹[exceeds at any time the full rate], the share of each of the dependants shall be proportionately ⁵⁹[altered], so that the total amount payable to them does not exceed the amount of disablement benefit at the full rate.

5. In case the deceased person does not leave a widow or legitimate child, dependants' benefit at such rates as may be determined by the ⁵⁹[Employees' Insurance Court having jurisdiction], shall be payable as follows:—

- (a) to a parent or grand parent, for life;
- (b) to any other male dependant, until he attains fifteen years of age;

- (2) Any review under this Regulation shall be made after giving due notice by registered post to each of the dependants, stating therein the reasons for the proposed review and giving them an opportunity to submit objections, if any, to such review.

(3) Subject to the provisions of the Act and these Regulations the appropriate Regional Office may, as a result of such review, commence, continue, increase, reduce or discontinue from such date as it may decide the share of any of the dependants.

Provided that such a declaration shall not be required more than once in every six months.

86. Appointment of another guardian.—If at any time the appropriate Regional Office is satisfied that a child who is in receipt of dependants' benefit is being neglected by his guardian, not being a guardian appointed under the Guardian and Wards Act, 1890, and the child's share of the dependants' benefit is not being properly spent on his or her maintenance, the appropriate Regional Office may direct that such share may be paid subject to such conditions as it may specify to such other person as it deems fit and as in its opinion would utilise it for the care and maintenance of the child.

PROVIDENT FUND LEGISLATION

Absence of Early Provident Fund Laws

There was no legislation in India providing for benefits for old age, invalidity and death of industrial workers. Some of private and government undertakings attempted to solve these problems by means of provident funds, gratuity and pension schemes.

Provident Funds Act, 1925 (XIX of 1925)

The first legislative measure relating to provident funds was undertaken by the Central Government with the enactment of the Provident Funds Act in 1925. The Act which came into force on the 27th August, 1925, is greatly restricted in scope and deals only with provident funds relating to Government, railway administration and local authorities and certain other provident funds and lays down rules for the protection of compulsory deposits.

Legislation Regarding Recognised Provident Funds (XII of 1929)

There was practically no legislation relating to provident funds in private industries till the year 1929 when the Indian Income-tax Act of 1922 was amended by the Indian Income-tax (Provident Funds Relief) Act, 1929 (XII of 1929) incorporating a new Chapter IXA containing special provisions relating to certain classes of provident funds. Under this amendment, the Commissioner of Income-tax may accord recognition to any provident fund satisfying the following conditions, viz., (1) the employee's contribution shall be a definite proportion of his salary and shall be deducted by the employer from his salary and credited to his individual account of the fund; (2) the employer's contribution shall not exceed the employee's contribution and shall be credited to the employee's individual account at least once a year. The employer's contribution may exceed the employee's contribution for the same period only in certain cases where an employee is in receipt of a salary not exceeding Rs. 500/- per month or where the regulations of the fund permit periodical bonuses; (3) the fund consisting of the total amount accruing from the employer's and employee's contributions and interest thereon shall be vested in two or more trustees or in an official trustee under a trust which shall not be revocable save with the consent of the beneficiaries; (4) the accumulated balance to the credit of the employee shall be paid to him when he leaves his employment after a specified period's approved service, unless he is dismissed for misconduct or voluntarily leaves his employment before expiration of a specified term of service otherwise than on account of ill-health or other unavoidable cause. In the latter case, the employee's contributions and the interest thereon must be refunded to him.

Subject to the specified maxima under the Indian Income-tax Act, the contributions paid by the employee and his employer to the provident fund, the annual accretion to the credit of the former and the accumulated balance paid to him are exempt from income-tax.

Rules Regarding Recognised Provident Funds

Under Chapter IX-A of the Indian Income-tax Act, the Central Board of Revenue has framed the Indian Income-tax (Provident Funds Relief) Rules on the 15th March 1950, with the approval of the Central Government. Under the rules, the trustees may allow the employee to withdraw part of his provident fund balance on special grounds in the following instances or circumstances of a similar nature—(a) to pay expenses incurred in connection with illness of the member or any of his family; (b) to pay expenses which

the member is obliged by his religion to incur in connection with marriages and funerals; (c) to pay for the passage over sea of the member or any of his family; (d) to meet the expenditure for purchasing a house or site for a house or for construction of a house provided that the house or site is assigned to the trustees. and (e) to pay life insurance premium provided the policy is assigned to the trustees. Such withdrawals shall exceed the member's three month's salary except for the purposes of building or life insurance where six month's salary may be withdrawn. The withdrawals must be repaid in not more than 24 monthly instalments.

Royal Commission on Labour, 1931

The Royal Commission on Labour in the Report published in 1931 admitted the necessity of making some provisions against old age. Sri M. N. Joshi and Sri Diwan Chaman Lall, two members of the Commission who were in intimate touch with the working classes, pointed out the miseries experienced by the workers in their old age in the absence of any such provision. The Commission remarked: "It is appreciated that in this report it is impossible to make provision for meeting every contingency in the life of the worker but, the importance of the matter being generally admitted, they feel it incumbent to recommend that, until such time as it is found practicable to institute either a general scheme of old age pensions or provident funds for industrial workers, Government should, whenever possible, encourage employers by financial grants or other means to inaugurate schemes of this nature for their employees."¹

Labour Investigation Committee, 1946

The position of provident funds in private industries has been nicely summed up by the Labour Investigation Committee in their Main Report published in 1946 in the following words: "The whole problem of provision against old age or death of bread-winners legitimately falls within the scope of social security and it is a matter for consideration whether either the initiation or management of schemes of provident funds, gratuities and pensions should be left to employers themselves. Of course, so long as there are no schemes of social security introduced in a particular industry or area, the existing private schemes of provident fund, etc., should be allowed to continue under the management of employers. The existing schemes in this connection do not appear to be very liberal, and specially in regard to the employer's contribution to provident funds of workers the restrictions on withdrawal of employer's contribution seem to be somewhat unsatisfactory. If provision against old age or death of bread-winner is intended to stabilise the industrial worker in employment, the employer's contribution, which is really in consideration for permanent service by the worker, should as far as possible be made available to him on early retirement, etc. The absence of social security measures like provident funds, gratuities and pensions in most concerns has largely contributed to the migratory character of Indian labour, and is one of the most important causes of large labour turnover in factories. Though some of the larger employers have instituted tolerably good schemes, the number of such employers is very small. During the last few years, however, some progress has been achieved in this direction. Generally speaking, provident funds are most common, gratuities are given only in some cases and pensions are rather rare. Only some of the provident funds are registered, while most are not.* * * * In case of unregistered funds, the amount standing to the worker's credit is attachable, but not so in the case of registered funds. We are of opinion that all provident funds, wherever they exist, should be compulsorily registered and treated as trusts."²

Model Provident Fund Rules for Industrial Workers

The subject of compulsory provident funds was discussed in the third conference of Labour Ministers held in January, 1942 and it was considered advisable to prepare a set of model provident fund rules for circulation to employers. A set of model rules was accordingly prepared and placed for discussion in the fifth Labour Conference held in September, 1943 but owing to the short notice, it could not be discussed there.

The subject was again placed in the fourth meeting of the Standing Labour Committee held in January, 1944. Several suggestions were made for amending the model rules in regard to (1) constitution and management of the fund; (2) rate of contribution by employees; (3) eligibility to get benefits of employer's contributions and (4) restrictions on advances. The model rules were subsequently circulated by the Central Government to the then Provincial and State Governments, employers' and employees' organisations for information and adoption, if required.

Coal Mines Provident Fund and Bonus Schemes Act, 1948 (XLVI of 1948)

The Board of Conciliation appointed by the Central Government in March, 1947 in connection with trade disputes in Bengal and Bihar coalfields recommended the establishment of a central compulsory provident fund for coal miners. This proposal was discussed in the first meeting of the Industrial Committee on Coal Mining held in January, 1948. Following the discussions the Central Government promulgated the Coal Mines Provident Fund and Bonus Schemes Ordinance on the 23rd April, 1948 authorising the Central Government to frame a provident fund scheme and a bonus scheme for workers in coal mines throughout the country. The Ordinance was replaced by the Coal Mines Provident Fund and Bonus Schemes Act, 1948 (XLVI of 1948) which received the assent of the Governor General on the 3rd September, 1948.

The Coal Mines Provident Fund Scheme set up under the Act applied originally to all coal miners in the States of West Bengal, Bihar, with retrospective effect from May, 1947 and in Madhya Pradesh and Orissa from October, 1947 and later extended to the collieries of Assam, Talcher, Korea, Rewa, Hyderabad and Rajasthan and is administered by a Board of Trustees consisting of the representatives of the Central Government, State Governments, colliery owners and colliery workers. The membership of the provident fund is compulsory for all employees earning bonus by conforming to a prescribed minimum attendance in a quarter. Employees pay contributions at the rate of about $\frac{1}{16}$ th of their total earnings and the employers contributing a like amount. The employers also pay an additional five per cent. of the employers' and employees' contributions towards the expenses of the administration of the fund. Members will receive a refund of their total accumulations with the whole or part of employers' contribution depending upon the duration of their membership but in cases of superannuation, death or permanent incapacity, the full amount standing to the member's credit is payable.

Workers' Provident Fund Bill, 1948⁴

A private member's Bill for providing for establishment and grant of provident funds to certain classes of workers by their employers, was introduced in the Constituent Assembly of India (Legislative) on the 11th February, 1948. The Bill

⁴ Statement of Objects and Reasons—The Provident Funds Act, 1925 (Act XIX of 1925) is not applicable to workers employed in factories or labourers in industrial establishments such as house-building, quarrying, docks and other such establishments. Under Section 58B(1) of the Income-tax Act 1922, the Commissioner of Income-tax may accord recognition to any provident fund which, in his opinion, satisfies the condition prescribed in Section 58(c) and the rules made thereunder. It will be evident that under section 58B(1)

provides for compulsory establishment of provident funds by every employer in industrial concerns for the betterment of his employees and their families. The mover of the Bill, Sri R. K. Sidhva suggested that that Bill should go to the Select Committee but at the instance of the Government, the Bill was circulated for the purpose of eliciting public opinion by the 30th June, 1949. After the opinions were received, Sri Sidhva again moved on the 16th December, 1949 that the Bill should be referred to a Select Committee. During the course of discussion, the Central Labour Minister remarked that the Government felt that some provision should be made for granting of provident fund facilities not only to the employees in industrial establishments but also to employees in commercial and other undertakings, and gave an assurance that the Government would "try to bring in a comprehensive measure for the introduction of provident fund for all categories of employees, and the scheme will be such that it will embrace also the smaller units"⁵. The Labour Minister further remarked, "By the introduction of a provident fund scheme on an industry-cum-regional basis, the employees in smaller units which by themselves may not be able to maintain or undertake the administrative expenditure necessary for the maintenance of provident fund schemes in those units may not be deprived of the benefits of provident fund"⁵. On the above assurance, Sri Sidhva withdrew the Bill on the 16th December, 1949.

Employees' Provident Funds Act, 1952 (XIX of 1952)

The subject of provident fund for industrial workers was discussed in the 12th meeting of the Standing Labour Committee held in November, 1950 and the Government agreed to draft a Bill and circulate it to the members of the Committee. Subsequently, the Government of India promulgated the Employees' Provident Funds Ordinance on the 15th November, 1951 which came into force from that date in all factories mentioned in Schedule 1 employing 50 or more persons; but the operative part becoming effective after framing of the Scheme by the Central Government.

The Ordinance was replaced by the Employees' Provident Funds Act which was passed on the 4th March, 1952. The Employees' Provident Funds Scheme framed under the Act and brought into force in the following industries: cement, cigarette, engineering (electrical, mechanical), iron and steel, paper and textile (cotton, woolen, jute or silk), on the 1st November, 1952, covers factories in these industries employing 50 or more persons of not less than three years' standing and exempts

the first move to obtain recognition of provident fund, for employees in factories and in other industrial establishments, should be made by the employer. It is very rare that an employer would volunteer to establish a contributory provident fund for his employees. The main object of the Bill is to make it compulsory for every employer of workers and labourers in the industrial concerns to establish provident fund for the betterment of such employees and their families. From the meagre pay they get, the employees are not in a position to lay by anything for themselves or their family for day day. Establishment of provident fund will teach them frugality and the advantages of such a system will not meet with any objection or disapproval on their part as they would realise that the Bill aims at the good of their family and for themselves also.

The contribution by the employer will also be impetus for them to join the fund. The interests of the employers and the employees are generally found to be at variance. In order to establish mutual trust and confidence and to cement the differences between the employers and the employees, a measure like the one in this Bill would go a great way to promote mutual healthy relations between the capitalists and the labourers. This Bill seeks to promote growth of spirit of confidence, and with co-ordination of employees, the employers would be able to yield better results. By creating such fund, the employers would attract to themselves a class of labourers which will be contended and in view of the provisions of the Bill, they would prefer to remain attached to a particular employer and there will be few occasions of strike in work. (Indian Labour Gazette, Vol. V, July, 1947 to June, 1948, page 704).

⁵ Constituent Assembly of India (Legislative) Debates, 1949, Vol. VI, Part II, p. 671.

factories owned by Government or local authority. The Act extends to the whole of India and covers every employee completing one year's continuous service and drawing a basic monthly wages of Rs. 300/- or less. The Act provides for exemption of factories or class of employees if the provident fund benefits already prevalent in the factory are more advantageous to the employees than the statutory benefits. The contributions of both employers and employees are six and a quarter per cent. of the basic wages and dearness allowance rounded off to the nearest quarter of an anna.

The actual working of the Act revealed certain defects and administrative difficulties which were rectified by the Employees' Provident Funds (Amendment) Act in 1953 (Act No. XXXVII of 1953).

The Act has been extended to 13 additional industries with effect from the 31st of July, 1956.

COAL MINES PROVIDENT FUND LEGISLATION

Board of Conciliation and Fact Finding Committees

The Board of Conciliation (Colliery Dispute)¹ which was appointed by the Government of India on the 5th February, 1947 to promote a settlement of trade disputes then existing in the collieries in Bengal and Bihar, made certain recommendations regarding the institution of a compulsory provident fund scheme and the payment of attendance and production bonus to the workers. Two Fact Finding Committees appointed in pursuance of Government Resolution dated the 12th May, 1947 to report on the grant of monetary benefits and concessions to the colliery workers in the Central Provinces and Berar² and Orissa and also Assam³ recommended the constitution of provident funds on the same lines as the collieries in Bengal and Bihar. The recommendations of the Board and Committees were accepted by the Government and the question of their implementation was discussed in the first meeting of the Industrial Committee on Coal Mining held at Dhanbad on the 23rd and 24th January, 1948. Following these discussions, the Coal Mines Provident Fund and Bonus Schemes Ordinance, 1948 (VII of 1948) was promulgated by the Government on the 23rd April, 1948. The Ordinance was the first of its kind in India and provided for statutory constitution of a compulsory provident fund scheme and a bonus scheme for the colliery workers.

Coal Mines Provident Fund and Bonus Schemes Act, 1948 (XLVI of 1948)

A Bill was introduced in the Constituent Assembly (Legislative) on the 9th August, 1948 to replace the Ordinance. The Coal Mines Provident Fund and Bonus Schemes Act, 1948 (XLVI of 1948) was passed on the 20th August, 1948 and received the assent of the Governor-General on the 3rd September, 1948.

Framing of Provident Fund Scheme under the Act

The Act empowers the Central Government to frame the Coal Mines Provident Fund Scheme for the establishment of a provident fund for the employees in coal mines, specifying the coal mines to which the scheme shall apply, the employees who shall join the fund and the conditions under which they may be exempted and the rate, time and manner of payment of contributions by employers and employees. It provides for constitution of a Board of Trustees consisting of the nominees of the Central Government and representatives of employers' and employees' organisations. The Fund shall be deemed to be a recognised provident fund within the meaning of Chapter IX-A of Indian Income-tax Act, 1922 (XI of 1922). To

meet the cost of administering the scheme, the Act provides for levy of a charge payable by the employer.

Framing of Bonus Scheme under the Act

The Act also empowers the Central Government to frame a scheme to be called the Coal Mines Bonus Scheme (1) providing for payment of bonus dependent on the attendance of an employee in a coal mine during any period, (2) specifying the employees or class of employees eligible for the bonus and the conditions of eligibility, (3) fixing the rate of bonus and manner of calculation, (4) specifying the conditions under which an employee is debarred from getting bonus in whole and in part and (5) fixing the rate at which sums shall be set apart by the employer for payment of bonus and the time and manner of such payment.

Protection Against Attachment

The Act lays down that the amount of the provident fund standing to the credit of any member shall not in any way be capable of being assigned or charged and shall not be liable to attachment under any decree or order of any Court in respect of any debt or liability incurred by the member. The Act also provides that the amount standing to the credit of any member of the Fund at the time of his death and payable to his nominee under the Coal Mines Provident Fund Scheme shall vest in the nominee and shall be free from any debt or liability incurred by the deceased or the nominee before the death of the member.

Coal Mines Provident Fund Scheme, 1948

The Coal Mines Provident Fund Scheme framed by the Central Government on the 11th December, 1948 provides for compulsory membership of all colliery workers who qualify for bonus under the Coal Mines Bonus Scheme. The workers contribute, monthly or weekly, approximately one anna per rupee of their basic wages and the employers contribute an equal amount. The contribution is payable by affixing contribution stamps to the cards of the members concerned and the stamps are sold to the employers through treasuries and post offices. The employers have to pay an administrative charge of five per cent. calculated on the total amount of employers' and employees' contributions. The full amount standing to the employee's credit is payable at any time on permanent retirement from service after reaching 50 years and completing five years' membership or on retirement due to permanent incapacity.

The Scheme was originally applied to coal mines in West Bengal and Bihar with retrospective effect from the 12th May, 1947 and to Madhya Pradesh and Orissa from the 10th October, 1947 and was later extended to the coal mines in Assam, Talcher, Korea, Rewa, Vindhya Pradesh and partially excluded areas of Madhya Pradesh, Bihar, Orissa and West Bengal. It was subsequently enforced in Hyderabad from the 12th March, 1956.

Coal Mines Bonus Scheme, 1948

The Coal Mines Bonus Scheme framed by the Central Government on the 3rd July, 1948 applies to colliery workers getting up to Rs. 300/- as basic wages but excludes three types of workers—(1) mali, sweepers or domestic servants, (2) workers in State railway coal mine on pay and under conditions of service similar to those obtaining in other railway establishments and (3) labourers hired by contractors for building, brick or tile-making. Employees covered under the scheme are entitled to one-third of their basic earning as quarterly bonus, provided they fulfil the qualifying period of attendance in each quarter. The qualifying period of attendance in West Bengal and Bihar is 64 days per quarter for underground mines and underground piece-workers and 66 days for others; in other States 60 days for underground miners and underground piece-workers and 65 days for

others. An employee taking part in an illegal strike in any period or quarter, forfeits his right to receive the bonus for that period or quarter.

The Scheme was applied to coal mines in West Bengal and Bihar retrospectively from May, 1947 and to Madhya Pradesh and Orissa from October, 1947. It was later extended to Vindhya Pradesh, Rewa, Korea, Talcher and partially excluded areas of West Bengal, Bihar, Madhya Pradesh and Orissa. It was extended to Hyderabad on the 4th October, 1954, to Rajasthan on the 17th December, 1954 and to Assam on the 8th September, 1955.

Administration of the Act

The Scheme is being administered by a Board of Trustees constituted by the Central Government, consisting of the representatives of the Central and State Governments and of employers' and workers' organisations. The Coal Mines Provident Fund Commissioner administers the fund as the Chief Executive Officer with a Central Office at Dhanbad and is assisted by Inspectors appointed by the Central Government.

Amending Acts of 1950 and 1951 (LXXX of 1950 and XXI of 1951)

The Act was amended in 1950 to remove the doubt about the definition of the expression "employee" and again in 1951 to provide for recovery of contributions from members who fail or refuse to pay.

Social Security for Colliery Labour

The Preparatory Asian Regional Conference held in New Delhi in October-November 1947, unanimously recommended that the Governments of Asian Countries, as a first step towards making adequate provisions against risks of old age and death, should take measures for the institution of compulsory provident funds for as many categories of workers as possible and in particular for all regulated labour and the extension of the scope of the existing state-managed insurance schemes or the introduction of such schemes for the benefit of persons of small means. This question was discussed in the Standing Labour Committee and the Indian Labour Conference held in April, 1948 and there was general agreement about the institution of provident fund. It was pointed out on behalf of the Central Government that if the compulsory provident fund scheme started in the coal fields of West Bengal, Bihar, Central Provinces where labour was mostly casual, proved successful, it would not be difficult to introduce it in other industries and the Ministry of Labour would prepare a comprehensive scheme for other industrial workers.

During the final reading of the Coal Mines Provident Fund and Bonus Schemes Bill in the Constituent Assembly (Legislature), the Central Labour Minister assured that the Government was very anxious to introduce provident fund schemes for other industries as well and the Government stood committed to that.

The introduction of a compulsory provident fund for the colliery worker with a view to make some provisions for his old age is an important measure in the field of social security legislation in India. "The scheme will, in effect, change the status of the miner from a helpless pauper in old age to a man of some means, with something to fall back upon, when his earning ceases."⁴ "Thus the Coal Mines Provident Fund and Bonus Schemes Act, 1948, may well prove to be an important landmark in the evolution in India of a system of statutory provision for the wage earner during his old age."⁵

COAL MINES PROVIDENT FUND AND BONUS SCHEMES ACT, 1948 (XLVI OF 1948)

Statement of Objects and Reasons¹

The Board of Conciliation appointed in 1947 in connection with certain disputes in the Bengal and Bihar coalfields recommended the payment of bonus to, and the establishment of a provident fund for, the employees in coal mines. With a view to implementing these recommendations, Government promulgated the Coal Mines Provident Fund and Bonus Schemes Ordinance, 1948, on the 23rd April 1948. A Coal Mines Bonus Scheme has since been framed under that Ordinance and the details of a Provident Fund Scheme are being worked out.

2. As the life of an Ordinance is six months, the Ordinance will cease to be effective on the 23rd October, 1948. As the schemes which are being framed under it must be continued beyond that date, this Bill seeks to replace the Ordinance by an Act.

1. AMENDING ACT OF 1950 (LXX OF 1950)

Statement of Objects and Reasons²

The expression "employee" is defined by section 2 of the Coal Mines Provident Fund and Bonus Schemes Act, 1948, to mean any person who is employed in any kind of work, manual or otherwise, in or in connection with a coal mine and who gets his wages directly or indirectly from the employer. A doubt has been expressed that by reason of the use of the words "employee in a coal mine" or "employees in coal mines" in certain parts of the Act it is not permissible to extend the provident fund and bonus schemes to persons employed, say, in the central offices of a group of colliery-owners and ancillary organisations, although such offices are situated within the precincts of a mine and are connected with the mine. The present Bill seeks to make the definition apply uniformly throughout the Act. Ample powers exist in the Act to determine the employees or class of employees who shall be entitled to join the fund.

2. AMENDING ACT OF 1951 (XXI OF 1951)

Statement of Objects and Reasons³

The Coal Mines Provident Fund Scheme framed under the Coal Mines Provident Fund and Bonus Schemes Act, 1948, provides for contribution both by the employers as well as the employees in equal proportion. Although contributions have all along been made on this basis, paragraph 2 of the First Schedule to the Act refers only to contributions by the employers on behalf of the employees which they subsequently recover from the employees' wages, and not the contributions which the employers themselves are required to make for the benefit of the employees. The Act also does not provide for the manner in which employers' contributions are to be recovered from those who fail to refuse to pay. The present Bill seeks to remedy these defects.

EMPLOYEES PROVIDENT FUND LEGISLATION

Compulsory Provident Fund for Industrial Workers

There was no statutory provision for the institution of compulsory provident fund schemes for industrial workers in India. The subject was discussed in the ninth session of the Indian Labour Conference held in April, 1948 when the Labour Minister stated that the Government would watch the working of the compulsory provident fund scheme for coal miners recently introduced and in the light of the experience gained therefrom, a comprehensive scheme for other industries would be framed and placed before the Standing Labour Committee.

The subject was again discussed at the twelfth meeting of the Standing Labour Committee held in November, 1950 and the Government agreed to draft a Bill and circulate it to the members of the Committee, as there was an unanimous recommendation for the introduction of a scheme of provident fund for industrial workers.

The urgency of enacting the legislation was emphasised at the conference of the Labour Ministers held in January, 1951 and the Central Government came to the conclusion of initiating the requisite legislative measure as the provident fund scheme was already discussed in principle in the twelfth meeting of the Standing Labour Committee.

Employees' Provident Funds Ordinance, 1951 (Ord. VIII of 1951)

The Central Government promulgated the Employees' Provident Funds Ordinance on the 15th November, 1951 for the institution of compulsory provident funds for employees in factories and other industrial establishments. The Ordinance has come into force on that date and applies to all factories which are in existence for three years employing 50 or more persons and engaged in the manufacture or production of cement, cigarettes, electrical, mechanical or general engineering products, iron and steel, paper and textiles.

The Ordinance authorised the Central Government to frame a Scheme called the Employees' Provident Funds Scheme for the establishment of provident funds for the various classes of employees. The Scheme will cover certain matters enumerated in the Schedule II of the Ordinance. The employer and the employee are required each to contribute $6\frac{1}{4}$ per cent. of the basic wages and dearness allowance payable to the employee. The Ordinance provides for the continuance of the existing schemes of provident fund in the factories till a regular scheme is framed.

Employees' Provident Funds Act, 1952 (XIX of 1952)

The Central Government introduced a Bill in the Parliament on the 14th February, 1952 with a view to replace the Ordinance, which was passed on the 23rd February, 1952 and received the assent of the President on the 4th March, 1952 (XIX of 1952).

Main Provisions of the Employees' Provident Funds Act, 1952

The Act extends to the whole of India except the State of Jammu and Kashmir and applies, in the first instance, to factories employing 50 or more persons and engaged in the manufacture or production of the following six scheduled industries—(1) cement; (2) cigarettes; (3) electrical, mechanical or general engineering products; (4) iron and steel; (5) paper and (6) textiles (made wholly or in part of cotton or wool or jute or silk, whether natural or artificial). The Central Government are empowered to add any other industry to the Schedule

and also to apply the provisions of the Act to the scheduled industries employing less than 50 persons.

The Act will not apply to any factory belonging to the Government or a local authority or to any other factory unless three years have elapsed from its establishment. The appropriate (Central or State) Government are empowered to exempt, subject to certain conditions, (a) any factory if its provident fund rules with respect to contributions are in conformity with or are more favourable to the employees than those specified in the Act and if the appropriate Government are satisfied that the provident fund benefits enjoyed by the employees are on the whole not less favourable than the benefits provided under the Act, or (b) any class of persons if the Central Government feel that such persons are entitled to benefits in the nature of old age pension or gratuity or both and that such benefits are on the whole not less favourable to such persons than the benefits provided under the Act.

The contributions of both the employer and employee have been fixed at the rate of one anna in a rupee or $6\frac{1}{4}$ per cent. of the basic wages plus dearness allowance. An employee may undertake to increase his contribution to a maximum of $8\frac{1}{2}$ per cent. of his basic wages and dearness allowance.

The Act provides that the amount standing to the credit of any member in the fund shall not be liable to attachment under any decree or order of any Court. The Act further provides that any amount standing to the credit of any member at the time of his death payable to his nominee under the Scheme, shall subject to any authorised deduction, vest in the nominee free from any debt or other liability incurred by the deceased or by the nominee before the death of the member.

The Act authorises the Central Government to frame a Scheme for the establishment of provident funds under the Act for the employees or any class of employees and specify the factory or factories to which the said Scheme shall apply.

The Fund shall be deemed to be a recognised provident fund within the meaning of the Chapter IX-A of the Indian Income-tax Act, 1922.

The Act provides that all provident fund schemes in existence in factories on the 15th November, 1951 shall be continued without any modifications till a regular scheme is made applicable to them. The accumulation standing to the credit of the employees shall be transferred to the new fund after the regular scheme is enforced.

The Act prohibits the reduction of the wages of an employee because of the contribution that has become payable by the employer. The employer is also prohibited to discontinue or reduce any benefit to which the employee is entitled under the terms of his employment.

Employees' Provident Funds Scheme, 1952

The Scheme framed by the Central Government under the Act was finally published in the Gazette of India Extraordinary dated the 2nd September, 1952. Under the Scheme, every person, except an excluded employee, is required to become member of the provident fund on completing one year's service.

An excluded employee is an employee (i) who after becoming member of the provident fund withdrew the full amount of his accumulations on retirement after attaining the age of 55 years or on retirement due to total incapacity on account of bodily or mental infirmity; (ii) whose monthly basic wages exceed Rs. 300; (iii) who is employed by or through a contractor; (iv) who is an apprentice; (v) who is exempted from the operation of the scheme under Section 17 of the Act and (vi) who is employed for not less than ten years in a factory to which the

scheme applies and who by a declaration in writing has opted for the benefits to which he was entitled before the date of notification issued under section 17 (b) of the Act.

Under the Scheme an employee who is a member of the fund shall not cease to be a member after leaving the factory to which the scheme applies. An employee whose monthly basic wages exceed Rs. 300 after he has become a member of the fund is permitted to continue the membership but the contribution payable by him and in respect of him is not to exceed one anna in the rupee on Rs. 300 and the dearness allowance admissible on this amount. Any subscriber, other than an excluded employee, to a provident fund recognised under Chapter IX-A of the Indian Income-tax Act, 1922 or to which the Provident Funds Act of 1925 applies, shall become a member of the Fund under the scheme, unless he applies to the Commissioner for the Employees' Provident Fund, within three months from the date of the enforcement of the scheme, to continue the membership of the old fund.

The Scheme requires that every authority in charge of, or entrusted with the management of any provident fund in existence on the 15th of November, 1951, has to send a return before the 1st of January, 1953 or such later date fixed by the Board of Trustees of the Fund under the Act, showing the amounts standing to the credit of each subscriber and advances taken by him, if any and also to transfer to the fund in cash the total accumulations standing to the credit of the subscribers.

The rate of employee's contribution is fixed at one anna in the rupee of basic wages and dearness allowance actually drawn during the whole month, whether paid on daily, weekly, fortnightly or monthly basis, calculated to the nearest quarter of a rupee. The employer is required to contribute an equal amount and pay the same along with the employee's contribution which can be recovered from his wages by means of deduction. Besides the contributions, the employer is required to pay an administrative charge for meeting the expenses for the administration of the fund. By a notification dated the 28th January, 1952, the Central Government has fixed 3% of the total employers' and employees' contributions as administrative charges. No administrative charge was previously payable by factories exempted under section 17 of the Act, but it is now fixed at $\frac{3}{4}$ %.

A member is permitted to withdraw any amount out of his own contributions standing to his credit in the fund, once in every six months, for the purpose of payment of life insurance premium.¹ The insurance policy has to be assigned to the Board and delivered to the Commissioner as security.

Total accumulations in the fund are payable to the member (1) on retirement after attaining superannuation age and (2) on retirement on account of permanent and total incapacity to work in any industry due to bodily or mental infirmity duly certified.

Employees' Provident Funds (Amendment) Ordinance, 1953 (Ord. I of 1953)

The actual working of the Act and the Scheme framed thereunder revealed certain defects and administrative difficulties. Various proposals for amendment

¹ At the time of piloting the Bill in the Parliament, the Labour Minister said, "I would not agree to-day to any withdrawal from the provident fund. If in three or four years the country makes any progress and workers in the country are placed in a more secure position, we may consider whether we would advance loan or not. One thing has appeared to me, no doubt, and that is advancing certain amounts out of the provident fund for the payment of insurance premium, that is for the very purpose for which the fund is meant. That means that they will not be spending the money on marriages or death ceremonies and things like that but they will be paying that portion which they take as advances or loans from the provident fund towards their insurance premium." (Parliamentary Debates, 1952, Vol. I, Part II, pp. 1186-1187)

were also received by the Central Government from time to time. The matter was discussed in the first meeting of the Regional Provident Fund Commissioners and Accounts Officers held at Calcutta in July 1953. Subsequently an Amending Bill was introduced in the Council of States on the 14th September, 1953. As the Bill could not be passed during that session of the Parliament and as the Government felt that some provisions of the Bill called for immediate enforcement, the Employees' Provident Funds (Amendment) Ordinance was promulgated by the President on the 14th October, 1953. The Ordinance added explanation to the Schedule elucidating the various items as there was considerable doubt regarding the expressions used.

Employees' Provident Funds (Amendment) Act, 1953 (XXXVII of 1953)

The Bill to replace the Ordinance came up for consideration before the Council of States in November, 1953 and after being passed by the House of People received the assent of the President on the 12th December, 1953. The Amending Act provides for inspection of factories whether covered by the Act or not, to ensure strict compliance with its provisions. Certain expressions used in the Schedule to the Act have been clarified beyond doubt and the Central Government is empowered to give directions to remove any doubts or difficulties in giving effect to the provisions of the Act.

Enforcement and Administration

The provisions of the Employees' Provident Funds Scheme has been brought into force piecemeal. Chapters I, II and III, viz., constitution and proceedings of the Board of Trustees, appointment and powers of the Commissioner and staff came into force on the 2nd September 1952 with the publication of the Scheme in the Gazette of India. Some paragraphs of Chapters IV and VI came into force on the 6th October, 1952 and the remaining provisions including the one relating to contribution came into force on the 1st November, 1952.

The administration of the Fund constituted under the Scheme vest in the Central Board of Trustees consisting of a chairman and representatives of the Central and State Governments, employers and workers affected by the Scheme. The Central Government are empowered to appoint a Commissioner for Employees' Provident Fund who will act as the Chief Executive Officer of the Central Board. A Central Board of Trustees was constituted by the Central Government on the 31st October, 1953 with the Secretary of the Ministry of Labour as Chairman. The Central Government are also empowered to constitute State Boards and appoint Regional Commissioners for the States.

Proposals for Amendment of the Employees' Provident Funds Act

In May 1955, the Central Government forwarded some proposals for amendment of the Act to the State Governments in view of the defects noticed in course of administration of the Act for the past 2½ years. The main proposals were—(1) incorporation of an enabling provision for extending the Act to plantations, mines (gold, limestone, iron ore, mica and manganese), banks, insurance companies, shops and establishments, etc., (2) to cover the employees of an establishment other than a factory such as head office, etc.; (3) to empower the Central Government to add to, amend and vary any provision of the scheme, either prospectively or retrospectively; (4) extension of the provisions prohibiting the employer from reducing the benefits in the nature of old-age pension, gratuity or provident fund payable to the employees of the exempted factories; (5) to empower an Inspector to require an employer to present accounts with relevant records as may be specified; (6) continuance of the service and provident fund benefit to the employees of factory which has undergone a change of management; (7) to enable

the Central Government to acquire power for imposing further conditions on exempted factories in the matter of submission of returns, maintenance of accounts, making investment, facilities for inspection and payment of inspection charges; (8) to empower the Central Government to give retrospective effect of the provisions of the Act from the 6th October, 1952.

In February, 1956, the Central Government circulated another proposal for amendment of the Act under which, when an employee of a factory to which the Act applies is transferred to another factory run by the same employer but falling outside the purview of the Act, the employer would be compelled to continue provident fund contributions in respect of such transferred employees.

Extension of the Act to Certain Additional Industries

There has been a persistent demand for extension of provident fund benefit to all industrial workers. The Planning Commission, in the First Five Year Plan, recommended that the provisions of the Act should be extended in gradual stages during the period of the Plan to all industries after it had been put on a sound basis and that a programme for its gradual extension should be drawn up. The matter was discussed in the meetings of the Central Board of Trustees of the Employees' Provident Fund held in November, 1953 and in the fourteenth session of Indian Labour Conference held in May, 1955. It was proposed to extend the Act to all industries including plantations, mines and commercial establishments, etc., with an employment strength of 10,000 workers or more during the period of the Second Five Year Plan.

Act extended to 13 New Industries from 31st July, 1956

The Central Government considered the above proposals, and by a Notification dated the 4th July, 1956, added the following 13 additional industries, with effect from 31st July, 1956, to Schedule I of the Employees' Provident Funds Act—

(1) Matches; (2) Edible oils and fats; (3) Sugar; (4) Rubber and rubber products; (5) Electricity including generation, transmission and distribution thereof; (6) Tea; (7) Printing (other than printing industry relating to newspaper establishments as defined in the Working Journalists (Conditions of Service) and Miscellaneous Provisions Act, 1955 (45 of 1955), including the process of composing types for printing, printing by letter press, lithography, photogravure or other similar process or book binding; (8) Glass; (9) Stone-ware pipes; (10) Sanitary wares; (11) Electrical Porcelain Insulators of high and low tension; (12) Refractories and (13) Tiles.

The provisions of the Scheme shall not apply to (1) match factories having annual production of five lakhs gross boxes of matches or less; (2) glass factories other than sheet glass and glass shell factories having installed capacity of 600 tons per month or less and (3) tea factories in the State of Assam.

The extension of the scheme will benefit about four lakhs of additional workers in approximately 1,400 factories belonging to 13 new categories of industries.

Proposal for Raising the Wage Limit for Membership

In April 1955, the Central Provident Fund Commissioner asked the views of the State Governments on the proposal to raise the limit of eligibility for membership of the provident fund from the basic wage of Rs. 300 to Rs. 500 inclusive of dearness allowance and cash value of food concessions. The proposal was based on the consideration that the Employees' State Insurance Act as well as the Workmen's Compensation Act are applicable to employees whose total wage income is Rs. 400 per month and the Press Commission has recommended that the Employees Provident Funds Act should be extended to journalists, the bulk of whom are in receipt of monthly income ranging from Rs. 500. Though the Payment of

Wages Act applies at present to employees receiving a monthly salary of Rs. 200, there is a proposal to raise the limit also to Rs. 400.

Enhancement of Contribution & Other Suggestions

There was a demand from some members for permission to save up to the maximum limit of $8\frac{1}{3}\%$ (1 anna 4 pies per rupee) contemplated in the Act and also a suggestion that the members should be permitted to contribute as much as they desire without prescribing any upper limit for the voluntary contribution.

The question of enhancing the rate of contribution from $6\frac{1}{4}\%$ to $8\frac{1}{3}\%$ was considered by the Joint Consultative Board of Industry and Labour in the meeting held on the 16th September, 1955. The employers' representatives did not agree to raise their share of contribution from the present rate of $6\frac{1}{4}\%$ to $8\frac{1}{3}\%$ of the basic wages and dearness allowance and expressed the view that the scheme should be given more time before the rate of contribution was enhanced. This question was also discussed in the meeting of the Labour Panel of the Planning Commission held in September, 1955. The Sub-Committee appointed by the Panel suggested that the Planning Commission should take steps to draw up a comprehensive social insurance scheme merging all the existing schemes and this report was discussed at a meeting of the Labour Panel held in February, 1956 but a final decision was not taken as the question needed further exploration.

The proposal whether the Employees' Provident Funds Scheme should be amended to permit employees to contribute up to $8\frac{1}{3}\%$ of their basic wages and dearness allowance or whether the Act should be amended to allow them to contribute even more than $8\frac{1}{3}\%$ was made in a Memorandum placed before the fifteenth meeting of the Standing Labour Committee held at Delhi in April, 1956. The Labour Minister explained that there was insurmountable difficulty in giving effect to this proposal and stated that the question would further be examined.

The Planning Commission in the Second Five Year Plan recommended that the Scheme should be extended to cover industries and commercial establishments having 10,000 workers or more and suggested that enhancement of contribution from $6\frac{1}{4}\%$ to $8\frac{1}{3}\%$ should be further studied and conversion of provident fund into a suitable pension scheme should be examined.

EMPLOYEES' PROVIDENT FUNDS ACT, 1952 (XIX OF 1952)

Statement of Objects and Reasons¹

The question of making some provision for the future of the industrial worker after he retires or for his dependants in case of his early death, has been under consideration for some years. The ideal way would have been provision through old age and survivors' pensions as has been done in the industrially advanced countries. But in the prevailing conditions in India, the institution of a pension scheme cannot be visualised in the near future. Another alternative may be for provision of gratuities after a prescribed period of service. The main defect of a gratuity scheme, however, is that the amount paid to a worker or his dependants would be small, as the worker would not himself be making any contribution to the fund. Taking into account the various difficulties, financial and administrative, the most appropriate course appears to be the institution compulsorily of contributory provident funds in which both the worker and the employer would contribute. Apart from other advantages, there is the obvious one of cultivating among the workers a spirit of saving something regularly. The institution of a provident fund of this type would also encourage the stabilisation of a steady labour force in industrial centres.

2. The subject of legislation for institution compulsorily of contributory provident funds in industrial undertakings was discussed several times at tripartite meetings in which representatives of the Central and State Governments and of employers and workers took part. A large measure of agreement was reached that there should be such legislation. Further,

¹ Gazette of India, 1952, Part II—Sec. 2, pages 67—69.

a non-official Bill on this subject was introduced in the Central Legislature in 1948 and was withdrawn only on an assurance given that Government itself would soon consider the introduction of a comprehensive Bill. The view that the proposed legislation should be undertaken was lastly endorsed by the Conference of Provincial Labour Ministers held in January, 1951. It may be added that a statutory Contributory Provident Fund already exists for workers in coal mines, covering about 300,000 persons. This has been in operation for about five years and is working very satisfactorily.

3. The Bill provides for institution, in the first instance, of contributory provident funds in the six major organised industries named in Schedule I, except undertakings owned by the Central or a State Government or by a local authority. There is also a provision empowering the Central Government, by notification, to add other industries to the Schedule or to apply the Act to industrial undertakings employing less than fifty persons.

4. To avoid any hardship to new establishments, a provision has been made for exempting them for a period of three years and similar exemptions are given to other establishments which are less than three years old till they have been in operation for a period of three years in all. The rate of contribution will be $6\frac{1}{4}$ per cent. of the total emoluments of the worker, the worker and the employer each contributing these amounts. Further, the scheme could empower payment of a higher subscription by the workers at their option.

5. Where Provident Funds exist in private industry, contributions are usually a percentage of the basic wage. Unlike Government Departments, wages in private industry have not, however, been rationalised and there are very great variations in the level of basic wages in private industry, even in different units in the same industry. If contributions are reckoned on the basis of basic wage only, there will, therefore, be wide changes in the degree of benefit received. This will be unfair to the workers and may also penalise those employers who have brought the level of basic wages more in accord with current requirements. Government appreciates that dearness allowance is a variable factor depending on the cost of living. Nevertheless, for the reasons explained, Government is satisfied that contributions to the Provident Fund should be on the basis of basic pay *plus* dearness allowance. This should not be construed as in any way implying that dearness allowances on the existing rates are to be recognised as a permanent measure.

6. Most of the details relating to the Fund will be settled in accordance with a Scheme which, in the interest of uniformity, will be framed by the Central Government. The administration will, to a large extent, be decentralised in regard to undertakings falling within the sphere of State Governments.

7. Where provident funds offering equal or more advantageous terms are operating efficiently, provision has been made for them to continue subject to certain safeguards in the interest of the workers.

8. This Bill, when enacted, will repeal and re-enact an Ordinance promulgated on the same lines on the 15th November, 1951.

AMENDING ACT OF 1953 (XXXVII OF 1953)

Statement of Objects and Reasons²

The working of the Employees' Provident Funds Act has brought out certain defects.

The principal defect relates to the application of the Act and the Scheme. There are considerable doubts regarding the expressions used in Schedule I. No authority has been prescribed for removing doubts and difficulties. There is no power for applying the Scheme to a factory not covered by the Act even when the employer and the employees ask for such application.

At present the employees of exempted factories are not entitled to the benefits of nomination, protection against attachment or prior claim on the assets of an insolvent employer. It is not possible to grant exemption to any factory from the operation of the Scheme on economic grounds.

There are also certain administrative difficulties to be set right. There is no provision for inspection of exempted factories; nor is there any provision for the recovery of dues from such factories. An employer can delay payment of provident fund dues without any additional financial liability. No punishment has been laid down for contraventions of some of the provisions of the Act.

This Bill seeks primarily to remedy these defects.
